O QUE É O HOTLINE?

A SaferNet Brasil oferece um serviço de recebimento de denúncias anônimas de crimes e violações contra os Direitos Humanos na Internet, contanto com procedimentos efetivos e transparentes para lidar com as denúncias. Além disso, contamos com suporte governamental, parcerias com a iniciativa privada, autoridades policiais e judiciais, além, é claro, de você usuário da Internet. Caso encontre imagens, vídeos, textos, músicas ou qualquer tipo de material que seja atentatório aos Direitos Humanos, faça a sua denúncia.

FIGURE 3 - FOREIGN INFLUENCE OPERATIONS ON SOCIAL MEDIA
COUNTRIES ATTRIBUTED BY FACEBOOK AND TWITTER FOR ENGAGING IN FOREIGN INFLUENCE OPERATIONS

Source: Authors' evaluations based on data collected. **Note:** Facebook has also taken down accounts engaged in 'coordinated inauthentic behaviour' that are not explicitly linked to a government or political party. These takedowns include accounts originating from: Egypt, Macedonia, Kosovo, Thailand, and the United Arab Emirates. Additionally, some cyber troop activity identified by Facebook and Twitter is domestically focused, such as in the case of Bangladesh and Honduras, and is therefore not included in this figure on foreign operations.

Source: Authors' evaluations based on data collected. Note: This table reports on the types of political actors using social media influence operations, and the number of examples of those organizations found. For government agencies, political parties, civil society groups, and private contractors, ■ = one organization found, ▨ = two organizations found, ▨ = three or more organizations found. Since it is difficult to assess the number of individual citizens using these tools, evidence of citizen use is indicated by ▨.

Strategies, Tools, and Techniques

Although there is nothing necessarily new about propaganda, the affordances of social networking technologies – algorithms, automation, and big data – change the scale, scope, and precision of how information is transmitted in the digital age.

Messaging and Valence

Cyber troops use a variety of messaging and valence strategies when communicating with users online. Valence describes how attractive or unattractive a message, event, or thing is. For the 2019 report, we have expanded our typology of messaging and valence strategies that cyber troops use when engaging in conversations with users online:

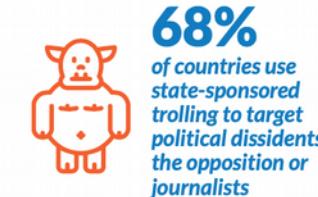

- (1) spreading pro-government or pro-party propaganda;
- (2) attacking the opposition or mounting smear campaigns;
- (3) distracting or diverting conversations or criticism away from important issues;
- (4) driving division and polarization; and
- (5) suppressing participation through personal attacks or harassment.

TABLE 3 - MESSAGING AND VALENCE

Communication Strategies

Cyber troops use a variety of communication strategies. We have categorized these activities into four categories:

- (1) the creation of disinformation or manipulated media;
- (2) mass-reporting of content or accounts;
- (3) data-driven strategies;
- (4) trolling, doxing or harassment;
- (5) amplifying content and media online.

The creation of disinformation or manipulated media is the most common communication strategy. In 52 out of the 70 countries we examined, cyber troops actively created content such as memes, videos, fake news websites or manipulated media in order to mislead users. Sometimes, the content created by cyber troops is targeted at specific communities or segments of users. By using online and offline sources of data about users, and paying for advertisements on popular social media platforms, some cyber troops target specific communities with disinformation or manipulated media.

The use of trolling, doxing or harassment is a growing global challenge and threat to fundamental human rights. In 2018, we identified 27 countries that used state-sponsored trolls to attack political opponents or activists via social media. This year, 47 countries have used trolling as part of their digital arsenal. Cyber troops also censor speech and expression through the mass-reporting of content or accounts. Posts by activists, political dissidents or journalists often get reported by a coordinated network of cyber troop accounts in order to game the automated systems social media companies use to take down inappropriate content. Trolling and the takedown of accounts or posts can happen alongside real-world violence, which can have a deep and chilling effect on the expression of fundamental human rights.

- Economics

Influence the world view

- Psychometrics
- Digital Anthropology

PERSONALITY THAT DRIVES BEHAVIOUR & BEHAVIOUR THAT INFLUENCES HOW SOMEONE VOTE.

Most communication companies **still segment** their audiences by demographics and geographics.

The idea that all women should receive the **same message** because of their gender, or all African Americans because of their race is getting old fashion and losing effect.

Psychometrics helps the understanding of the voter's **personality**.

Digital Anthropology helps the understanding of how **digital communities** appear and behave in the world wide web.

BEHAVIOURAL SCIENCE

IDEIA BIG DATA

Electorate Traits EXAMPLE

0+

EXPLORER

- Is curious about a wide range of topics.
- Is easily bored.
- Is less bound by rules and more playful.
- Language and thinking are more future-oriented.
- Expresses more liberal views.
- Achievement, ambition, success, competence.
- Self-direction, creativity, independent thought.

C+

FOCUSED

- Is punctual.
- Tends to go by the rules.
- Is reliable
- Sees life as tasks and goals to accomplish.
- Tradition, family, respect, commitment.
- Achievement, ambition, success, competence.
- Universalism, social justice, welfare of all.

E+

EXTRAVERT

- Is warm and friendly.
- Makes more eye contact.
- Is cheerful
- Takes on responsibility for others
- Readily trusts others.
- Achievement, ambition, success, competence.
- Universalism, social justice, welfare of all.

A+

ADAPTER

- Enjoys being helpful.
- Is concerned about others' opinions and reactions.
- Is warm and friendly.
- Tries to maintain harmony in the team.
- Universalism, social justice, welfare of all.
- Tradition, humility, respect, commitment.
- Security, reciprocity, safety, harmony.

N-

RESILIENT

- Rationality, keeping emotions subdued.
- Is optimistic and cheerful.
- Speaks with a controlled pace and vocabulary.
- Doesn't show signs of discouragement.
- Recovers quickly from crisis.
- Has a normal amount off eye contact.
- Is slow to anger.

Eixo III) Cyberbullying e os ataques à dignidade humana

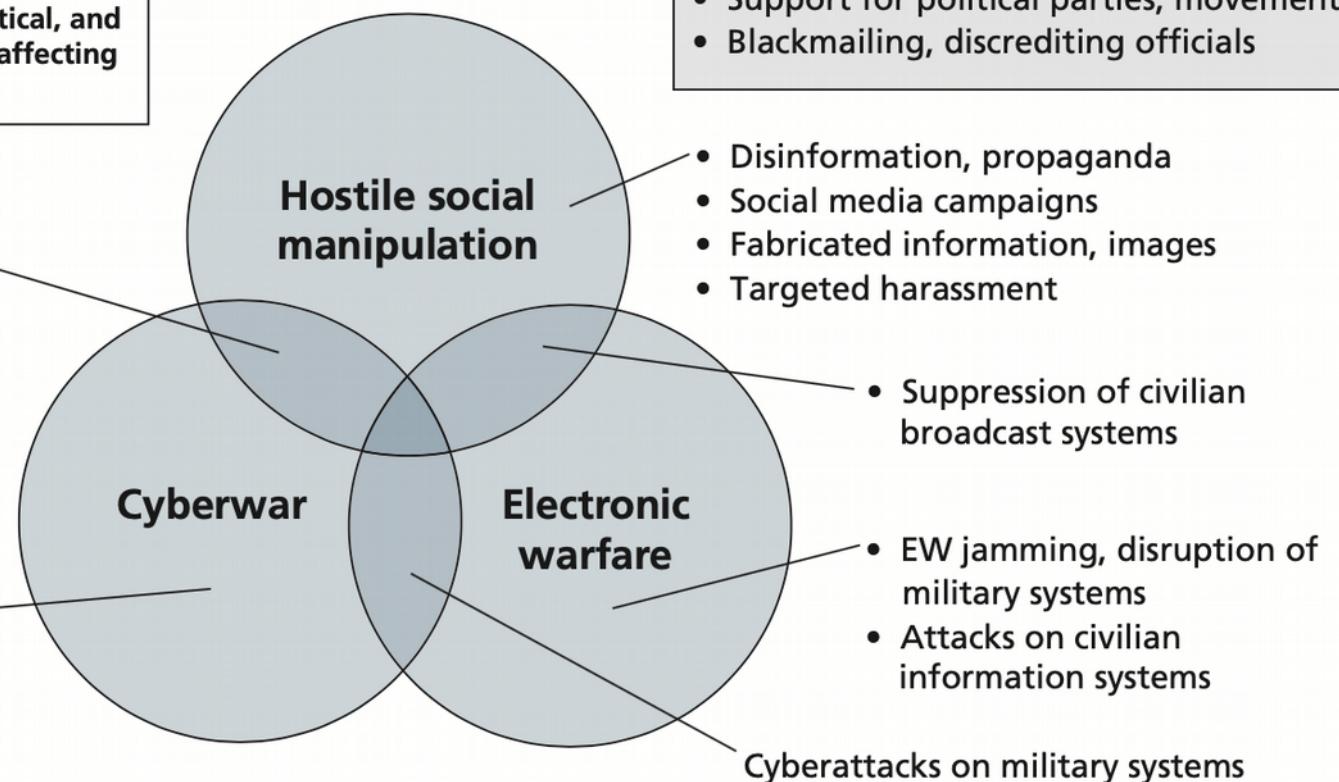

The Boundaries of Social Manipulation

Competition in the information space

Hostile social manipulation is the purposeful, systematic generation and dissemination of information to produce harmful social, political, and economic outcomes in a target country by affecting beliefs, attitudes, and behavior.

- Hacking to gain data for information operations
- Cyberbullying of targeted opponents
- Disruption of automated trading
- Disruption of internet of things

- Malware attacks on power grids
- Distributed denial of service attacks on governments

Competitors see these realms as integrated and holistic, do not distinguish among components

NOTE: HUMINT = human intelligence.

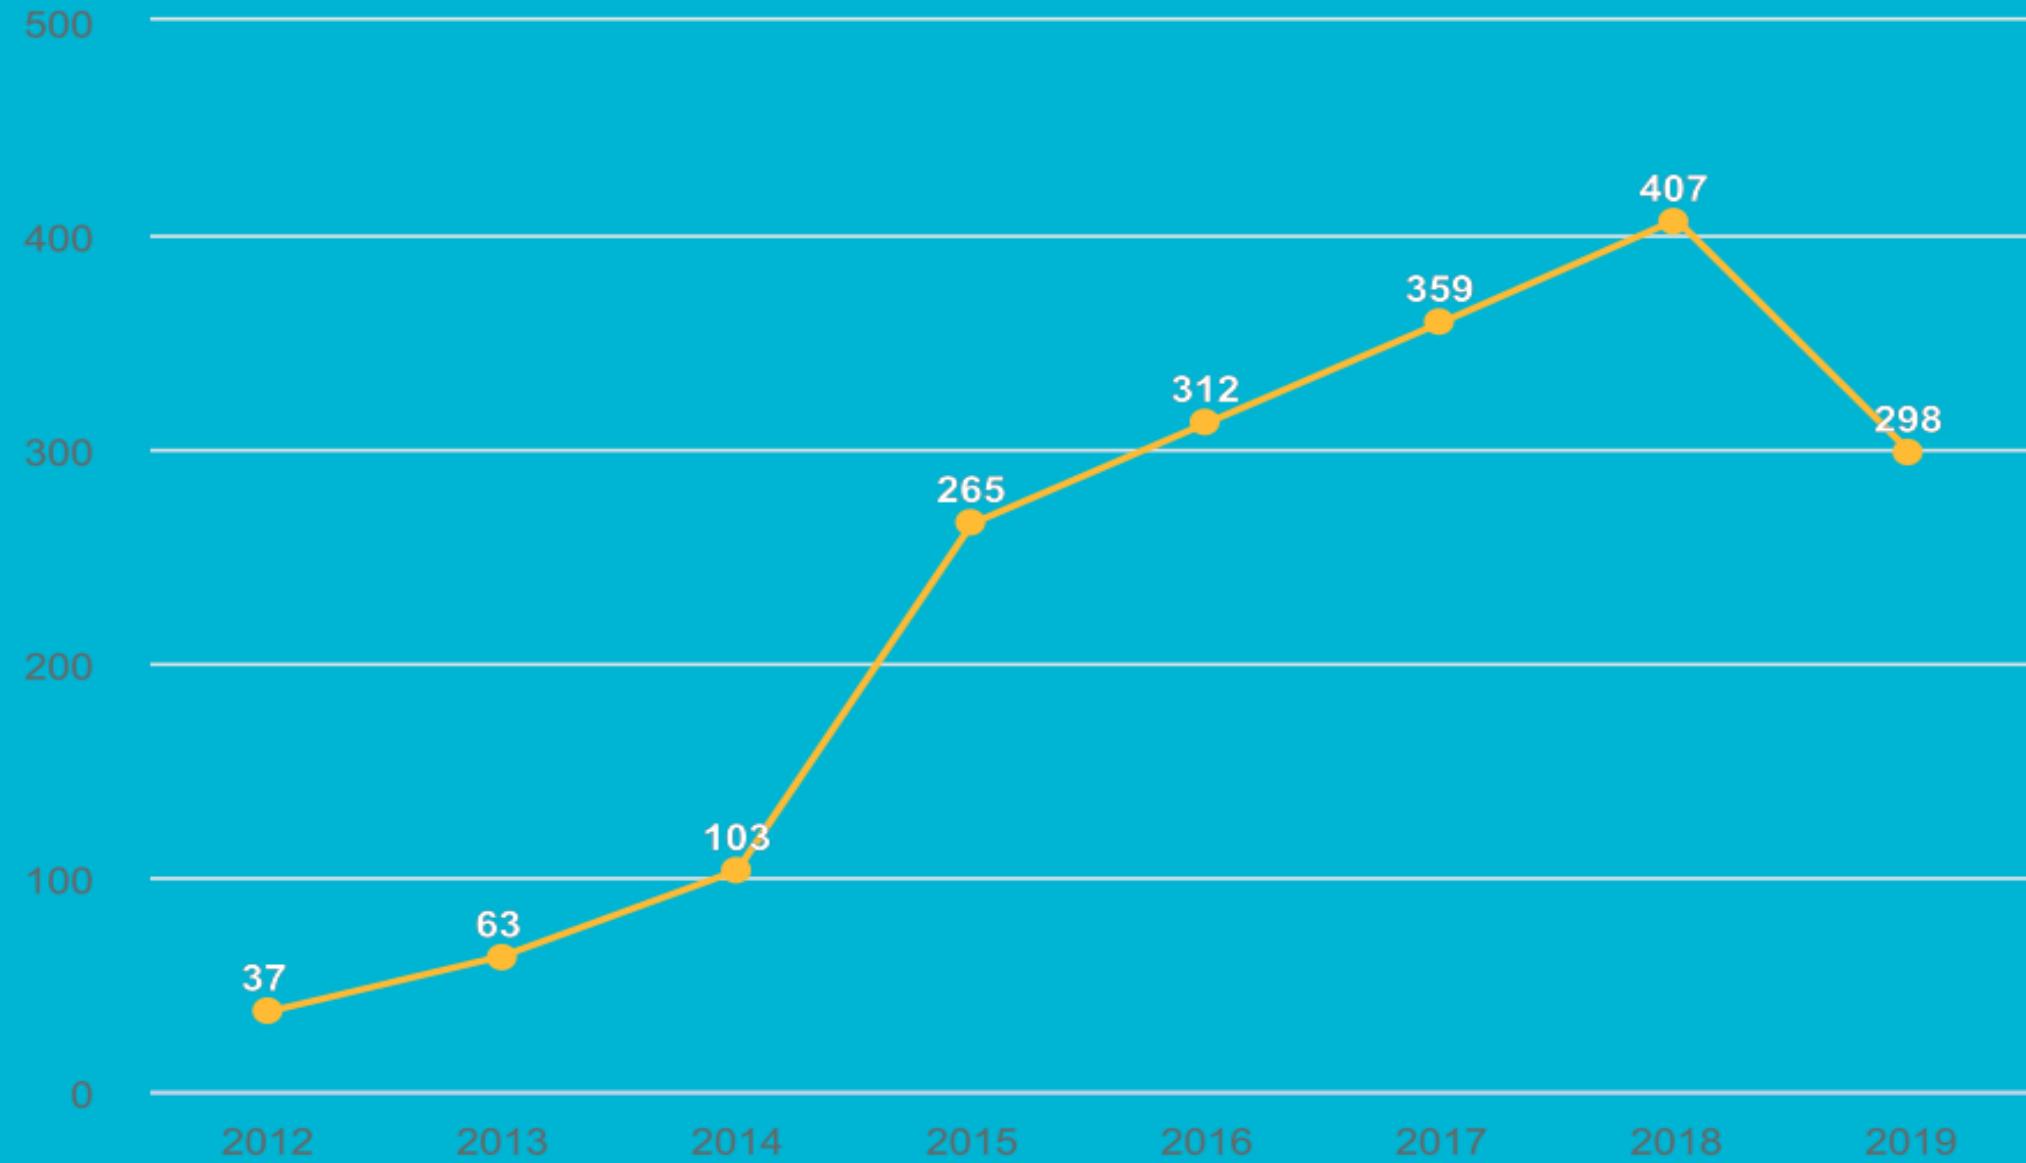

DENÚNCIAS RECEBIDAS (TOTAL)

| CONTEÚDO DENUNCIADO | Primeiro Turno (16/08 a 07/10) | Segundo Turno (08/10 a 28/10) | TOTAL (1º e 2º turnos) | Variação (1º p/ 2º turno) |

ESTADOS 10 / 27

MATRÍCULAS 21.154 / 50.000

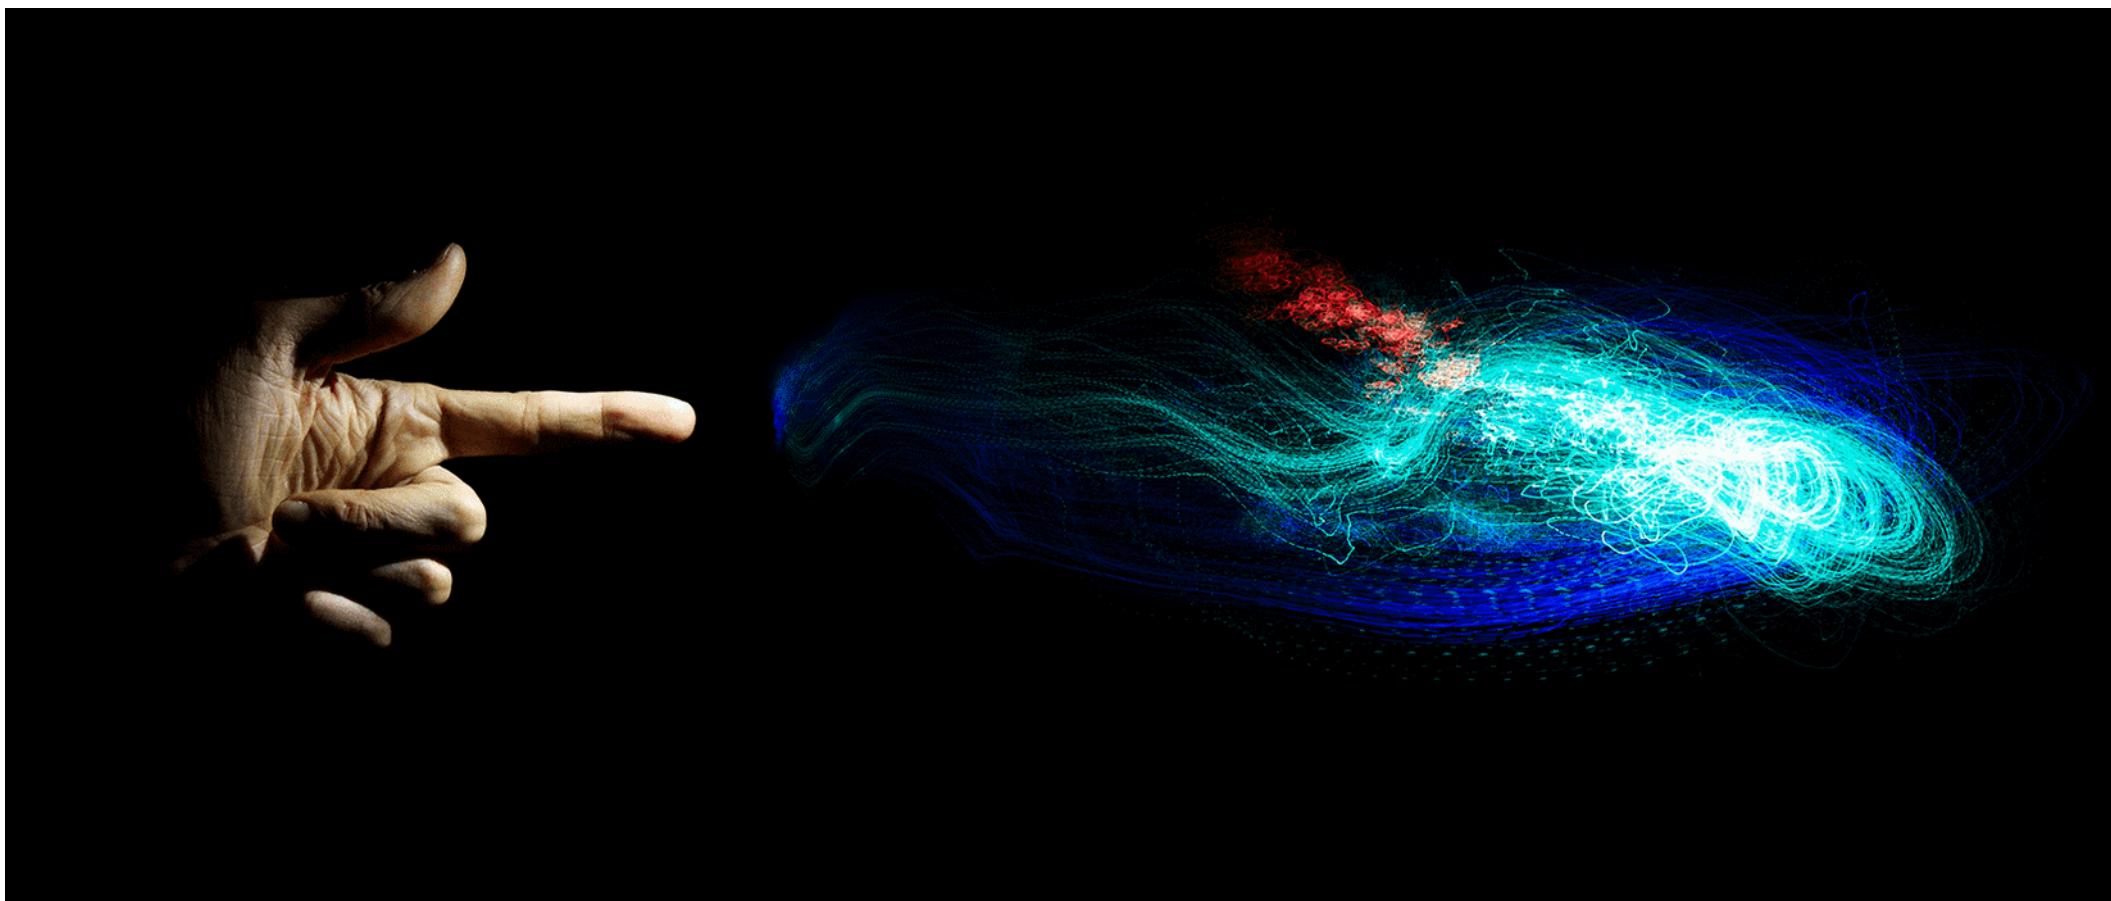

Dando continuidade as ações da Semana de Atenção Especial ao Bullying, ontem, dia 07 de maio, no Teatro Módulo, os alunos e alunas assistiram palestra ministrada por Rodrigo Nejm (psicólogo, diretor de Educação da Safernet e Pesquisador da UFBA). A temática abordada pelo representante da Safernet foi de extrema relevância para toda a comunidade escolar - alunos, professores, equipe técnica, colaboradores - já que englobou a importância do uso seguro e consciente da Internet, o combate ao Cyberbullying e a nossa responsabilidade individual e coletiva em promover ambientes saudáveis, pautados na Empatia e no Respeito Mútuo.

#ÉdaMinhaConta #combateabullying #cyberbullying #safernet #ColégioMódulo

Conclusão

Não existe bala de prata!

Foco em estratégias multisetoriais:

- a) detecção, resposta e accountability (curto prazo)
- b) educação para o uso ético, seguro e responsável da Internet (longo prazo)

OBRIGADO!
