Dell – Microsoft Windows 2000							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
17	PowerEdge 2650	PCI-X	Microsoft Windows 2000 Advanced Server: SP2[24], SP3[24], SP4; Microsoft Windows 2000: Datacenter SP4, Server SP2[24], Server SP3[24], Server SP4	Emulex: LP9002-E (LP9002L-E)[14, 15], LP9002DC-E[20, 25, 27, 31], LP9802-E[18, 19], LP9802DC-E[18, 19, 27], LP982-E[18, 19, 20]; QLogic: QLA2310F-E-SP[21, 22], QLA2340-E-SP[22, 23], QLA2342-E-SP[22, 23]	FC-AL, FC-SW	Y[3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13]	See[1, 2, 14, 16]

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA
4. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
5. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
6. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
7. Supports PowerPath 3.0 or greater
8. No MirrorView or SnapView used on boot LUNs.
9. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
10. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
11. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
12. MSCS cluster configurations are supported with CX600, CX400 and FC4700
13. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32
14. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
15. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.**
16. **CLARiiON FC4500 array is also supported for these configurations.**
17. **Not supported with Emulex LP8000-EMC HBA.**
18. **Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.**
19. **CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.**
20. **The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.**
21. **If using ATF/CDE, requires 2.1.6 or greater.**
22. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
23. **PowerPath supported. ATF/CDE not supported.**
24. **EMC strongly recommends that HBAs of different vendors not be used in the same host server.**
25. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**
26. **The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.**
27. **QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).**
28. **PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.**
29. **Supported on CX600, CX400, CX200 and FC4700-2 only.**
30. **PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.**
31. **Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.**
NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

Fuji Serv (ICL)

Fuji Serv (ICL) – Microsoft Windows 2000							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	Trimetra Nova	PCI	Microsoft Windows 2000 Advanced Server: SP2[13], SP3[13], SP4; Microsoft Windows 2000: Datacenter SP4, Server SP2[13], Server SP3[13], Server SP4	Emulex: LP8000-EMC[3, 4], LP9002-E (LP9002L-E)[3, 5], LP9002DC-E[9, 14, 15, 16], LP9802-E[7, 8], LP9802DC-E[7, 8, 14], LP982-E[7, 8, 9]; QLogic: QLA2310F-E-SP[10, 11], QLA2340-E-SP[10, 12], QLA2342-E-SP[10, 12]	FC-AL, FC-SW	N	See[1, 2, 5, 6]

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
4. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
5. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
6. The LP9002-E now ships with the LP9002L-E low profile adapter.
7. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
8. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
9. CLARiiON FC4500 array is also supported for these configurations.
10. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
11. Symmetrix 8000 Series: 66/67 support at Windows 2000 SP1, SP2 and SP3 5568 support at Windows 2000 SP1, SP2 and SP3.
12. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
13. Must use standard PCI 32bit/33MHz slot for SCSI
14. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
15. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
16. Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.
17. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

19.959
J

1. Windows 2000 Professional is supported as the management workstation
2. CX200 available through selected channels.
3. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA
4. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
5. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
6. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
7. Supports PowerPath 3.0 or greater
8. No MirrorView or SnapView used on boot LUNs.
9. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
10. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
11. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation
12. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
13. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
14. **The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.**
15. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.**
16. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
17. **CLARiiON FC4500 array is also supported for these configurations.**
18. **HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.**
19. **Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.**
20. **CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.**
21. **The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.**
22. **Requires driver 8.2.2.25. and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
23. **If using ATF/CDE, requires 2.1.6 or greater.**
24. **PowerPath supported. ATF/CDE not supported.**
25. **EMC strongly recommends that HBAs of different vendors not be used in the same host server.**
26. **Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.**
27. **The LP9002-E now ships with the LP9002L-E low profile adapter.**
28. **Requires minimum BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.**
29. **Includes both Pentium PRO and XEON models**
30. **This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.**
31. **QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).**
    BIOS for the BL20p mezzanine card must be obtained from HP. Cannot use BIOS from Qlogic web site. EMC NVRAM settings must be configured manually. Refer to page 2-6 of the Readme document "EMC Fibre Channel with QLogic Host Bus Adapters in the Windows NT/Windows 2000 Environment" found at http://www.qlogic.com for the settings.
32. **Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789**
33. **Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.**
34. **Booting off of an EMC storage array is not currently supported with the HPQ BL20P.**
35. **BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.**
36. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
37. **Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.**
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
38. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
5. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
6. CLARiiON FC4500 array is also supported for these configurations.
7. The LP9002-E now ships with the LP9002L-E low profile adapter.
8. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
9. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
10. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
11. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
12. Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.
13. If using ATF/CDE, requires 2.1.6 or greater.
14. PowerPath supported. ATF/CDE not supported.
15. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
16. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.

19.956

17. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
18. If using ATF/CDE with Emulex, requires v2.1 5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
19. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
20. Supports PowerPath 3.0 or greater.
21. No MirrorView or SnapView used on boot LUNs.
22. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
23. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
24. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation
25. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
26. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
27. **This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850**
28. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
29. **For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: http://www-3.ibm.com/pc/support/site.wss/document.do?lndocid=MIGR-39723**
30. **This HBA is equivalent to the qLogic QLA2310.**
31. **This HBA is equivalent to the qLogic QLA2340.**
32. **Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API. NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.**
33. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**
34. **If using ATF/CDE, requires 2.0.9 or greater.**
35. **When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)" This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.**
36. **This server has a built-in FC-SW and must be direct-attached to the external storage.**
37. **Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.**
38. **IBM BIOS 1.34, EMC Approved Qlogic Driver Version 8.2.2.25. Available at http://www.qlogic.com.**
39. **EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.**
40. **IBM HS20 Fibre Channel Expansion Card (48P7061)**
41. **Booting Windows 2000 systems through ISLs (inter-switch links) in heterogenous fabrics is not currently supported.**
42. **Booting Windows 2000 systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops.**
43. **MSCS cluster configurations are supported. PowerPath 3.0 or greater required. Host must be offline for interfamily Symmetrix microcode upgrade. Symmetrix 8000 Series: 66/67 support at Windows 2000 SP1, SP2 and SP3 5568 support at Windows 2000 SP1, SP2 and SP3.**

NEC

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
4. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
5. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
6. If using ATF/CDE with QLogic, requires v2.1 6 or greater.
7. Supports PowerPath 3.0 or greater.
8. No MirrorView or SnapView used on boot LUNs.
9. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
10. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
11. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation
12. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
13. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
14. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.**
15. **The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.**
16. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
17. **CLARiiON FC4500 array is also supported for these configurations.**
18. **64-bit slots for 3.3v HBAs only.**
19. **The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.**
20. **Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.**
21. **QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).**
22. **CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.**
23. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
24. **If using ATF/CDE, requires 2.1.6 or greater.**
25. **PowerPath supported. ATF/CDE not supported.**
26. **EMC strongly recommends that HBAs of different vendors not be used in the same host server.**
27. **Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.**

NOTE: LP8000/850 HBAs without –EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

28. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

Stratus

Stratus – Microsoft Windows 2000							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	ftServer: 5240, 6500	PCI	Microsoft Windows 2000 Advanced Server SP3[7, 8, 9, 10]	QLogic QLA2310F–E–SP[2, 3, 4]	FC–AL, FC–SW	N	See[1, 5, 6]
2	ftServer: 3210, 3220, 3300, 5200	PCI	Microsoft Windows 2000 Advanced Server: SP2[7, 8, 9], SP3[7, 8, 9, 10]	QLogic QLA2310F–E–SP[2, 3, 4]	FC–AL, FC–SW	N	See[1, 5, 6]

1. Windows 2000 Professional is supported as the management workstation.
2. Requires driver 8.2.1.20, and bios 1.33 for Stratus ftServers. Supports SNIA HBA API. Available at http://www.qlogic.com.
3. FC–AL supported for direct attach only. No support for hubs or Quickloop at this time.
4. Qlogic SANSurfer/SANBlade Manager is not supported.
5. CLARiiON FC4500 array is also supported for these configurations.
6. FC–SW applies only to CX600, CX400, FC4500, FC4700, and FC5300. FC5300 with FC–SW available from selected channels.
7. Refer to the Stratus, Bull or NEC documentation for hardware, software and non–storage related setup and configuration.
8. Requires Stratus ftServer 1.2.2.x.
   Requires Microsoft HotFix Q327477, available from Microsoft customer support.
   Requires VxVM 2.7 HotFix 5A, available from http://support.veritas.com/index.htm choose support downloads, choose Volume Manager, choose Volume Manager for Windows 2000. Choose VM2K27HF05aENU 248733.exe Patch – VERITAS Volume Manager 2.7 for Windows 2000 HotFix05a, English Version Size: 5892Kb
   Requires PowerPath 3.0.0 or higher.
9. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
10. Symmetrix 8000 Series: 66/67 support at Windows 2000 SP1, SP2 and SP3 5568 support at Windows 2000 SP1, SP2 and SP3.

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. CX600 only.
4. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
5. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. ATF/CDE is not supported with driver 2.20a12. For ATF/CDE, use driver version 2.11a2. Supports SNIA HBA API. Emulex drivers are available at http://www.emulex.com. NOTE: LP8000/850 HBAs without –EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC. Supports SNIA HBA API.
6. The LP8000–EMC HBA has a permanent GBIC, and does not have copper cable support.
7. FC–SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC–SW available from selected channels.
8. CLARiiON FC4500 array is also supported for these configurations.
9. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
10. PowerPath not supported. ATF is supported only using Emulex 5–2.11a2 driver.

11 The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
12 Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.
13. If using ATF/CDE, requires 2.1.6 or greater.
14. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only
15. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
16. The LP9002-E now ships with the LP9002L-E low profile adapter.
17. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
18. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
19. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

Microsoft Windows 2003

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. Requires STORPort driver version 1.00a15, and firmware 3.90a7. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
2. CLARiiON FC4500 array is also supported for these configurations.
3. PowerPath is not supported.
4. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
5. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
6. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
7. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
8. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
9. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
10. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
11. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
12. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
13. Requires STORPort driver version 1.00a15, and firmware 1.00a4. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789

4	eServer BladeCenter HS20 (Model 8678)[15]	PCI-X[16]	Microsoft Windows 2003: DataCenter[3, 4, 5], Enterprise Edition (Advanced Server)[3, 4, 5], Standard Edition (Server)[3, 4, 5]	IBM HS20 FC Expansion card 48P7061[11, 12, 13, 14]	FC-SW	Y	

1. Requires STORPort driver version 1.00a15, and firmware 3.90a7. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
2. CLARiiON FC4500 array is also supported for these configurations.
3. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
4. PowerPath is not supported.
5. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
6. This HBA is equivalent to the qLogic QLA2340.
7. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
8. This HBA is equivalent to the qLogic QLA2310.
9. Requires STORPort driver version 1.00a15, and firmware 1.00a4. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
12. This server has a built-in FC-SW and must be direct-attached to the external storage.
13. IBM BIOS 1.34, EMC Approved Qlogic STORPort Driver Version 8.2.2.20. Available at http://www.qlogic.com.
14. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
15. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
16. IBM HS20 Fibre Channel Expansion Card (48P7061)

Microsoft Windows NT

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. CLARiiON FC4500 array is also supported for these configurations.
3. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
4. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
5. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
6. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
7. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
8. If using ATF/CDE, requires 2.0.9 or greater.
9. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
10. Booting Windows NT systems through ISLs (inter-switch links) in heterogenous fabrics is not currently supported. Booting Windows NT systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops.
11. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. CLARiiON FC4500 array is also supported for these configurations.
3. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
4. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
5. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
6. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
7. If using ATF/CDE, requires 2.0.9 or greater.
8. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
9. Booting Windows NT systems through ISLs (inter-switch links) in heterogenous fabrics is not currently supported. Booting Windows NT systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops.
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. Dell PowerEdge supports a maximum of 2 Emulex HBAs at one time and the total power cannot exceed 20 Watts.
12. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
13. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.

14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
15. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

1. Booting Windows NT systems through ISLs (inter-switch links) in heterogeneous fabrics is not currently supported. Booting Windows NT systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops.
2. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
3. CLARiiON FC4500 array is also supported for these configurations.
4. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
5. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
6. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
7. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
8. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
10. If using ATF/CDE, requires 2.0.9 or greater.
11. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
12. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
13. Requires BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
14. Includes both Pentium PRO and XEON models
15. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
16. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).

1. Booting Windows NT systems through ISLs (inter-switch links) in heterogenous fabrics is not currently supported. Booting Windows NT systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops.
2. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
3. CLARiiON FC4500 array is also supported for these configurations.
4. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
5. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
6. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
7. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
8. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
9. If using ATF/CDE, requires 2.0.9 or greater.
10. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
11. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable). qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
12. For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: http://www-3.ibm.com/pc/support/site.wss/document.do?lndocid=MIGR-39723
13. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
14. It is recommended that the QLogic QLA2340 is not installed in Slot 1.
15. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
16. This HBA is equivalent to the qLogic QLA2310.
17. This HBA is equivalent to the qLogic QLA2340.
18. The LP9002-E now ships with the LP9002L-E low profile adapter.

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
3. CLARiiON FC4500 array is also supported for these configurations.
4. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
5. CX600 only.
6. Booting Windows NT systems through ISLs (inter-switch links) in heterogenous fabrics is not currently supported. Booting Windows NT systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops
7. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
8. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
9. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.

1. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
2. Supports eight (8) hosts per array
3. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
4. Remote boot not supported with PERC controllers enabled in system BIOS.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability

8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
12. PowerPath and ATF supported.
13. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
14. Powerpath & ATF supported.
15. Novell Storage Services supported.
16. **CLARiiON FC4500 array is also supported for these configurations.**
17. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
18. **Maximum number of NWFS volumes that can be mounted is 64.**
19. **HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.**
20. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
21. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
22. **Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.**
23. **Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)**
24. **Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com**
25. PowerPath supported. ATF/CDE not supported.
26. **Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)**
27. **CX200 available through selected channels.**
28. Requires NetWare patches: NWPAPT2A and NSS5J.
29. **PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.**
30. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**
31. **Requires HBA bios 1.83 and driver 6.50v.**
32. **Requires HBA firmware revision 1.83 and HBA driver revision 6.50v, available at http://www.qlogic.com**
Requires SP4 or higher for NetWare 5.00.
33. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**
(QLA2200) For IBM xSeries and Netfinity servers only.
Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
36. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
37. **This HBA is equivalent to the qLogic QLA2310.**
38. **This HBA is equivalent to the qLogic QLA2340.**
39. **Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.**
40. **For ATF on Pre CX series, Multipath support or connections to the secondary port are not supported at this time. One path per SP, 2 HBAs per host.**
41. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**

1. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
2. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
3. Supports eight (8) hosts per array.
4. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT C: partition will.
12. PowerPath and ATF supported.
13. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
14. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
15. **CLARiiON FC4500 array is also supported for these configurations.**
16. **CX200 available through selected channels.**
17. Powerpath & ATF supported.
18. Novell Storage Services supported.
19. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
20. **Requires HBA bios 1.83 and driver 6.50v.**
21. **Maximum number of NWFS volumes that can be mounted is 64.**
22. Requires NetWare patches: NWPAPT2A and NSS5J.
23. **Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.**
24. **Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)**
25. **Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com**
26. PowerPath supported. ATF/CDE not supported.
27. **Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)**
28. **HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.**
29. **This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.**
30. **Includes both Pentium PRO and XEON models**
31. **HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.**
32. **Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.**
33. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**
34. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**
35. **Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.**
36. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**

1. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
2. Supports eight (8) hosts per array.
3. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
4. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
5. No MirrorView or SnapView used on boot LUNs.
6. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
7. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
8. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
9. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
10. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
11. PowerPath and ATF supported.
12. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
13. Powerpath & ATF supported.
14. **CLARiiON FC4500 array is also supported for these configurations.**
15. Novell Storage Services supported.
16. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
17. **CX200 available through selected channels.**
18. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
19. **Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.**
20. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels
21. **Maximum number of NWFS volumes that can be mounted is 64.**
22. **Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com**
23. **Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)**
24. PowerPath supported. ATF/CDE not supported.
25. **Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)**
26. Requires NetWare patches: NWPAPT2A and NSS5J.
27. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
28. **This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850**
29. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**
30. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
31. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
32. **(QLA2200) For IBM xSeries and Netfinity servers only.**
33. **This HBA is equivalent to the qLogic QLA2310.**
34. **This HBA is equivalent to the qLogic QLA2340.**
35. **HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.**
36. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**
37. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**
38. **Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.**
39. **Requires HBA bios 1.83 and driver 6.50v.**

1. This kernel is limited to 110 devices, not 128.
2. Requires QLogic driver 4.47.18 and BIOS 1.83.
3. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. **Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.**
12. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
13. **Requires v6.0.5 or higher Navisphere host Agent/CLI.**
14. **Supported with QLogic driver v6.04.02 or v6.05.00.**
15. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
16. **PowerPath supported. ATF/CDE not supported.**
17. **CLARiiON FC4500 array is also supported for these configurations.**
18. **Not available for FC5700**
19. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
    CX200 available through selected channels.
20. Requires v6.2.1 or higher Navisphere host agent/CLI.
22. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
23. **This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.**
    Booting from EMC storage arrays is NOT supported with PowerPath.
24. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
25. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
26. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
27. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
28. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
29. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
30. **Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.**
31. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
32. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
33. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
34. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
35. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
36. **Single HBA zoning is required regardless of the switch being utilized.**
37. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.**

1. Not available for FC5700
2. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
3. **CLARiiON FC4500 array is also supported for these configurations.**
4. **PowerPath supported. ATF/CDE not supported.**
5. **CX200 available through selected channels.**
6. Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
7. **Requires v6.0.5 or higher Navisphere host Agent/CLI.**
8. **An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
9. Requires v6.2.1 or higher Navisphere host agent/CLI.
10. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
11. This kernel is limited to 110 devices, not 128.
12. Supported with QLogic driver v6.04.02 or v6.05.00.
13. Requires QLogic driver 4.47.18 driver disk, dd.img–i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
14. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
15. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
16. Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
17. No MirrorView or SnapView used on boot LUNs.
18. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
19. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
20. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
21. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
22. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
23. FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
24. FC–SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC–SW available from selected channels.
25. **PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.**
26. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
27. **Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.**
28. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
29. **This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.**
30. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
32. FC–AL and FC–SW can run concurrently on separate HBAs on the same Host.
33. **This system is supported with Red Hat 2.1 Advanced Server v2.4.9–E.3 and updated with v2.4.9–E.9, E.10, and E.12 RPMs.**
34. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
35. **Requires v6.05 or higher Navisphere host agent/CLI.**
36. Requires QLogic driver 4.47.18 and BIOS 1.83.
37. Install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
38. **Host must be offline for interfamily Symmetrix microcode upgrade.**
39. **Single HBA zoning is required regardless of the switch being utilized.**
40. **Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
41. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
42. **Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
43. **Install with driver provided by Red Hat 7.2 installer and upgrade to the EMC–approved driver after installation.**

1. **Not available for FC5700**
2. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
3. **PowerPath supported. ATF/CDE not supported.**
4. **CLARiiON FC4500 array is also supported for these configurations.**
5. **CX200 available through selected channels.**
6. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
7. **Requires v6.0.5 or higher Navisphere host Agent/CLI.**
8. **Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.**
9. **Supported with QLogic driver v6.04.02 or v6.05.00.**
10. Requires v6.2.1 or higher Navisphere host agent/CLI.
11. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
    This kernel is limited to 110 devices, not 128
12. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
14. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
15. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
16. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
17. No MirrorView or SnapView used on boot LUNs.
18. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group.
    Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
19. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
20. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
21. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
22. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
23. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
24. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
25. **This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.**
26. **Includes both Pentium PRO and XEON models**
27. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
28. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
29. **Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.**
30. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
31. **This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.**
32. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
33. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
34. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
35. **This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.**
36. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
37. Requires QLogic driver 4.47.18 and BIOS 1.83.
38. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
39. **Single HBA zoning is required regardless of the switch being utilized.**
40. **Host must be offline for interfamily Symmetrix microcode upgrade.**
41. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.**

42. The kernel version listed is included in the corresponding standard distributed release.
43. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
44. PowerPath v3.02 not supported on this system.
45. Requires v6.05 or higher Navisphere host agent/CLI.
46. For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
47. This HBA is equivalent to the qLogic QLA2310.
48. This HBA is equivalent to the qLogic QLA2340.
49. (QLA2200) For IBM xSeries and Netfinity servers only.
50. Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.
51. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
52. Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
53. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
54. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
55. This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
56. Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
57. Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.

1. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
2. **CLARiiON FC4500 array is also supported for these configurations.**
3. **CX200 available through selected channels.**
4. **Not available for FC5700**
5. **PowerPath supported. ATF/CDE not supported.**
6. **Requires v6.0.5 or higher Navisphere host Agent/CLI.**
7. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
8. PowerPath v3.02 not supported on this system.
9. This kernel is limited to 110 devices, not 128.
10. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
11. Requires v6.2.1 or higher Navisphere host agent/CLI.
12. Supported with QLogic driver v6.04.02 or v6.05.00.
13. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
14. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
15. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
16. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
17. No MirrorView or SnapView used on boot LUNs.
18. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
19. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
20. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
21. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
22. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
23. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
24. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
25. **PowerPath v3.0.2 b069 is not supported on this system.**
26. **This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.**
27. **This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850**
28. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
29. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
30. **Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.**
31. Requires Emulex driver v4.20Q and firmware v1 00a4. Available from http://www.emulex.com.
32. **This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.**
33. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
34. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
35. **(QLA2200) For IBM xSeries and Netfinity servers only.**
36. **This HBA is equivalent to the qLogic QLA2310.**
37. **This HBA is equivalent to the qLogic QLA2340.**
38. **The kernel version listed is included in the corresponding standard distributed release.**
39. Single HBA zoning is required regardless of the switch being utilized.
40. **Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.**
41. **Host must be offline for interfamily Symmetrix microcode upgrade.**
42. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
43. Requires QLogic driver 4.47.18 and BIOS 1.83.
44. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
45. **For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.**
46. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
47. Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.
48. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
49. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
50. **This HBA is equivalent to the QLogic QLA2200.**
51. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

1. This kernel is limited to 110 devices, not 128.
2. Requires QLogic driver 4.47.18 and BIOS 1.83.
3. Install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.

19.848

5 Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9 Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. **Requires v6.0.5 or higher Navisphere host Agent/CLI.**
12. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
13. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
14. **Supported with QLogic driver v6.04.02 or v6.05.00.**
15 **Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.**
16. **PowerPath supported. ATF/CDE not supported.**
17. **CLARiiON FC4500 array is also supported for these configurations.**
18 **Not available for FC5700**
19. **Optical cables apply to CX600, CX400, FC4500 and FC4700.**
20 **CX200 available through selected channels.**
21. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
22 Requires v6.2.1 or higher Navisphere host agent/CLI.
23. **This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.**
24. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
25 Requires QLogic driver 4.47.18 driver disk, dd img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
26 Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
27. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
28. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
29. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
30. **Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.**
31. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
32. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
33. **Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.63a1. Emulex drivers are available at http://www.emulex.com. Supports SNIA HBA API.**
34. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
Single HBA zoning is required regardless of the switch being utilized.
Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
38. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.**

1. Uses native HBA driver and firmware.
2. RPQ only.
3. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
4. PCI-FC-1P-OPT-B supports a data rate of 2 Gb/sec.
5. FC5500 and Origin 2000 only.
6. No support for CX600, CX400, and FC4700.
7. No cable with kit; order separately.
8. Field support for FC5500, requires minimum Flare revision 2.04.42; no new shipments.
9. CX600, CX400, FC4700, and FC5500 only.
10. CX600, CX400, and FC4700 do not require a MIA and are both FC-AL and FC-SW
11. A MIA is required for FC5500.

1. CLARiiON FC4500 array is also supported for these configurations.
2. Not available for FC5700
3. Optical cables apply to CX600, CX400, FC4500 and FC4700.
4. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
5. Requires v6.2.1 or higher Navisphere host agent/CLI.
6. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
7. Requires rev1 sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
8. Supported with QLogic driver v6.04.02.
9. An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
10. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
11. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
12. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
13. Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
14. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
15. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
16. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
17. Requires QLogic v6.04.02 driver.
18. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
19. Requires QLogic driver v6.04.00 or above.
20. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
21. Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
22. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
23. Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
24. QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.
25. Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65

1. CLARiiON FC4500 array is also supported for these configurations.
2. Not available for FC5700
3. Optical cables apply to CX600, CX400, FC4500 and FC4700.
4. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
5. Requires v6.2.1 or higher Navisphere host agent/CLI.
6. Requires rev1 sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
7. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
8. Supported with QLogic driver v6.04.02.
9. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
10. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
11. Includes both Pentium PRO and XEON models
12. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
13. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
14. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
15. Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
16. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
17. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
18. Linux v2.4.x Kernels support a maximum of 128 devices per system.
19. Host must be offline for interfamily Symmetrix microcode upgrade.
20. QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.
21. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
22. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
23. Requires QLogic v6.04.02 driver.
24. Requires QLogic driver v6.04.00 or above.
25. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
26. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
27. Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
28. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
29. Requires rev1 sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
30. Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65

1. Optical cables apply to CX600, CX400, FC4500 and FC4700.
2. CLARiiON FC4500 array is also supported for these configurations.
3. Not available for FC5700
4. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
5. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
6. Supported with QLogic driver v6.04.02.
7. Requires v6.2.1 or higher Navisphere host agent/CLI.
8. Requires rev1_sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
9. This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
10. Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
11. QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.
12. (QLA2200) For IBM xSeries and Netfinity servers only.
13. This HBA is equivalent to the qLogic QLA2310.
14. This HBA is equivalent to the qLogic QLA2340.
15. Linux v2.4.x Kernels support a maximum of 128 devices per system.
16. The kernel version listed is included in the corresponding standard distributed release.
17. Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.
18. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
19. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
20. Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
21. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
22. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
23. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
24. Host must be offline for interfamily Symmetrix microcode upgrade.
25. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
26. Requires QLogic v6.04.02 driver.
27. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
28. Requires QLogic driver v6.04.00 or above.
29. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
30. Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
31. Requires rev1 sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
32. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
33. Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
34. Single HBA zoning is required regardless of the switch being utilized.

Sun – Sun Solaris							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
33	**Ultra: 60, 80**	PCI	**Sun Solaris: 8[19, 28], 9[11, 19]**	**Emulex LP9002DC-E[6, 8, 9]**	FC-AL[16] FC-SW[14, 15]	Y[4, 23, 24, 25]	**See[1, 2, 3]**

1. Optical cables apply to CX600, CX400, FC4500 and FC4700.
2. Sun "clone" hosts are not supported
3. Veritas DMP coexistence with EMC CLARiiON failover packages:
   VERITAS DMP can be enabled and coexist on the same host with ATF or PowerPath. VERITAS Volume Manager 3.5 is the curently recommended version.
   VERITAS DMP, as part of Volume Manager 3.2, can be used to manage CLARiiON arrays without ATF or PowerPath by using CLR-ASL.
4. Emulex LP8000-EMC/LP9002-E/LP9002L-E/LP9002DC-E/LP9802-E requires fcode 1.33a1. Emulex LP9002S-E requires fcode 2.33a0.
5. Support for FC-AL or FC-SW.
6. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
7. Mixing JNI and Emulex SBUS HBAs on the same host connected to the same storage system is not supported. If there is a business reason to do so, submit an RPQ.
8. Requires driver lpfc-SPARC V5.01e. Emulex LP8000-EMC/LP9002-E/LP9002L-E/LP9002C-E/LP9002DC-E/LP9002S-E requires firm-ware 3.90A7, LP9802-E requires firmware 1.00A4, all available at http://www.emulex.com. Supports SNIA HBA API.
9. See the EMC price book for HBA vendor ordering information. This HBA is not sold by EMC.
10. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
11. **EMC required Sun patches for Solaris 9:**
    112233-06 Sun OS 5.9: kernel patch
    112834-02 Sun OS 5.9: patch SCSI
    113277-11 Sun OS 5.9: sd and ssd patch
12. Dynamic Reconfiguration is supported (Enterprise 10000 SBus only); requires ATF v3.1.2 or higher
13. FC-AL and FC-SW topologies can co-exist on the same server but not on the same HBA, provided that the different topologies are attached to different HBAs
14. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
15. FC-SW applies only to CX600, CX400, FC4500 and FC4700
16. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
17. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
18. EMC required Sun patches for Solaris 2.6:
    105181-34 SunOS 5.6: kernel update patch
    105356-21 SunOS 5.6: /kernel/drv/ssd and /kernel/drv/sd patch.
    105580-19 SunOS 5.6: /kernel/drv/glm patch (for X6541 HBA only).
19. For new installations, core software minimum requirement with
    CX600
    Array software – Access Logix 02.02.1.60.5.005
    Array software – Non-Access Logix 02.02.0.60.5.005
    CX400
    Array software – Access Logix 02.02.1.40.5.006
    Array software Non-Access Logix 02.02.0.40.5.006
20. The Emulex LP9002L-F2 HBA requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can be either 3.3 VDC or 5.0 VDC signaling interface.
21. Requires driver rev lpfc-SPARC v5.01e and firmware V1.00a4.
22. Requires Qlogic GUI 1.26 and driver 4.09.
23. Requires at least Rev 03 of LP8000-N1 HBA (part # 118031355-03)
24. PCI Boot support is from 1 or 2 servers for FC-AL and from 1 to 4 servers for FC-SW.
25. Note: Boot with DS-8B/DS-16B switches using 2.2.1a or 2.3 switch firmware requires HBA fcode v1.12a1 or higher.
26. EMC required Sun patches for PCI at Solaris 7: 106541-24 SunOS 5.7: kernel update patch
27. QCP2202F-E-SP/QLA234x-E-SP requires fcode v2.00.06. Fcode should be loaded on all HBA's at the time of installation.
28. **EMC required Sun patches for Solaris 8:**
    108528-21 SunOS 5.8: kernel update patch.
    108974-30 SunOS 5.8: data, uata, dad, sd, and scsi patch.
    109657-09 SunOS 5.8: isp driver patch (for X1062A and X1065A HBAs only).
    109885-12 SunOS 5.8: glm driver patch (for X6541A HBA only).
29. 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.
30. **The LP9002-E now ships with LP9002L-E low profile adapter. The older full form factor LP9002-E will not fit into the Sun Fire 12K or 15K.**
31. **Supports DR on Sun 12K and 15K.**
32. Support for FC4500, FC4700, and FC5300.
33. Requires driver rev 2.07.17 or higher and fcode 13.3.8.02C
34. EMC required Sun patches for SBUS at Solaris 7: 106541-24 SunOS 5.7: kernel update patch
35. Requires at least HBA firmware 13.3.8C.
    Boot through DS-08B or DS-16B switch requires minimum HBA firmware 13.3.8.01C.
    Boot through DS-16M, DS-32M, ED-64M, ED-140M or ED-1032 switches requires switch firmware v1.2.0 or higher
36. No longer available
37. **If ATF is used, requires at least v3.3.0 ATF.**

Clustered Host

DG DG/UX

DG

3	AViiON: AV25000[2, 9], AV3750[9]	DG DG/UX R4.20MU07[6]	DG R1.27 gold 10.3ix86		Emulex LP8000-F1[2, 7, 8]	FC-AL, FC-SW[3, 4, 5]
4	AViiON AV35000[2, 3, 4, 5, 9]	DG DG/UX R4.20MU07[6]	DG R1.27 gold 10 3ix86	HA: 2	Emulex LP8000-F1[2, 7, 8]	FC-AL, FC-SW[3, 4, 5]

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. Maximum of 2 HBAs per NUMA block (1 per fabric) in clustered environments.
3. DS-8B or DS-16B switches only; qualified with firmware v2.1.4a, v2.2, and v2.3
4. FC4700 clusters must use FC-SW mode and switches.
5. Support for FC4500, FC4700, and FC5300.
6. FC4700 is only supported on DG/UX 4.20 MU07. Maximum of 2 fabrics, each with a maximum of 4 switches. Maximum of 4 FC4700s per fabric. Maximum of 16 HBAs per fabric. Maximum of 32 HBAs per FC4700 SP. Maximum of 6 DG/UX servers per FC4700. Maximum of 4 HBAs per AV3750 server (2 per fabric). Maximum of 4 HBAs per NUMA block (2 per fabric in non-clustered environments). 2. FA4500 may be mixed within the same fabric with FC4700 running Access Logix, but must be separately zoned.
   3. The release notice for DG/UX (included with the software release at path: "/usr/release/dgux".rn) lists supported platforms.
7. FC-AL support requires LP8000 BIOS version DB1.60A7 and firmware version DS3.20x4.
8. DG/UX automatically loads the firmware and BIOS onto the Emulex HBA during boot-up as needed. Current DG/UX R4.20MU06 OS supported firmware is V3.20x1 and BIOS
9. For more information see http://athena.europe.dg.com

1. 2-node clusters require special configurations. See Support Note S010106A on Customer Service web site.
2. Refer to MC/Service Guard Release Notes at www.docs.hp.com for patch requirements.
3. Can mix HP-UX 11.00 and HP-UX 11i in same cluster, all nodes must be MC/SG 11.09, 11.13 or later.
4. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
5. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
6. See Technical Bulletin T010820 for supported patch levels.
7. HP-UX 11.0: MC/SG 11.13 and 11.14 LVM only.
   HP-UX 11i: MC/SG 11.13 and 11.14 can be used with LVM, VxVM 3.1 and VxVM 3.2. No DMP node failover supported at this time.
8. rp5470, rp7400: (PA-8700 processors) : Initial support with HP-UX 11.0 Sept 2001, 11i Sept 2001 .
9. HP A5158A is enabled in March 2000 HWCR Bundle XSWHWR1100.48. Additional patches may be required for support.
10. Supported with CX600, CX400, FC4500 and FC4700.
11. Patch PHSS_21996 or patches replaced or superseded by are required with HP-UX 11i.
12. Virtual Partitions (VPAR) is supported on the rp8400 server with 4.x and 5.x Symmetrix models and DMX Series. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 4.0 or later.
13. Switched fabric (FC-SW) first supported on FC4500, requires Core Software 6.32.05 or higher, Navisphere Agent 4.3 or higher, and Access Logix enabled (data access control enabled).
14. Supported in 2-CPU systems only (2-way).
15. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
16. K2xx, K3xx, K4xx,K5xx
17. PA-8700 processors: Initial support with HP-UX 11.0 Sept 2001, HP-UX 11i Sept 2001.
18. Virtual Partitions (VPAR) is supported on the rp7405 server with 4.x and 5.x Symmetrix models. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.02.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 4.0 or later.
19. **Virtual Partitions (VPAR) is supported on the rp7405/7410 server with 4.x and 5.x Symmetrix models and DMX Series. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.02.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 4.0 or later.**
20. Supported with cx600, cx400,fc4500, fc4700

1. Supported on CX600, CX400 and FC4700-2 only
2. KGPSA-CA/KGPSA-DA(FCA2354). Minimum firmware revision 3.81A4.
3. Identical to KGPSA-DA.

4. KGPSA-CA/KGPSA-DA(FCA2354): Latest firmware revision 3.82A1.
5. FC4700: Minimum AccessLogix 8.45.5x and Navisphere Manager 6.0.5.4.x.
6. **Tru64 V5.1B latest qualified Patch Kit 2 (T64V51BB22AS0002-20030415).**
7. KGPSA-CA and KGPSA-DA(FCA2354) only supported on this server
8. Tru64 UNIX V5.1A minimum requirement for ES45.
9. KGPSA-BC: Minimum firmware revision 3.03A1.
10. KGPSA-BC. Latest firmware revision 3.20X7
11. Tru64 UNIX V5.1A minimum requirement for DS25
12. KGPSA-BC/KGPSA-CA supported ONLY
13. **AlphaServer GS1280,ES80,ES47: Minimum Tru64 V5.1B with Patch Kit 1 (T64V51BB1AS0001-20021229)**

1. Includes support for FC4700, FC4700-2, CX600, CX400.
2. Minimum Powerpath version 3.0.2 is supported.
3. Minimum CLArrayS3.4.3.0.x fileset is supported. Supports FC4700, FC4700-2 with minimum Flare code 8.46.xx.
4. FC-SW and FC-AL are supported on the same server.
5. Minimum CLArrayS3.4.3.0.x fileset is supported. Supports FC4700, FC4700-2, with minimum Flare code 8.46.xx.
6. Minimum PowerPath 3.0.2 is supported
7. Includes support for the FC4700, FC4700-2, CX600, CX400.
8. Minimum Powerpath version 3.0.2 is supported
9. Includes support for FC4500, FC4700, FC4700-2 Requires EMC 4.0.5.0 Fibre Channel driver. FC-AL for FC4700 requires base software or Access Logix 8.42.xx or higher.
10. AIX 5.1-32/64 bit kernel supported. Requires CLArrayS3.5.1 fileset support.
11. For IBM AIX 4.3.3: requires Oracle RAC9i (9.0.1), HACMP/ES 4.4.x. PowerPath 3.0.2 or greater is supported.
    A SAN implementation with ISLs will observe significant delay in failover times if link failures non-contiguous to host HBA occur
    For IBM AIX 5.1:requires Oracle RAC9i (9.2), HACMP/ES 4.4.x. PowerPath 3.0.2 or greater is supported.
    A SAN implementation with ISLs will observe significant delay in failover times if link failures non-contiguous to host HBA occur.
12. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
13. Minimum AIX 4.3.3 ML9, APAR IY22024
14. Requires minimum AIX 4.3.3 with APAR IY22024, Requires PSSP 3.4 with APAR IY32625
15. Requires minimum PSSP 3.4 APAR IY32625, IY31025
16. Refer to Primus case #1.0.128870403.2749464 for configuration instructions.
17. Requires minimum PSSP 3.2 APAR IY18172, IY31012
18. AIX 4.3.3 ML9, APAR IY22024
19. The following link provides detailed data for all 9076-SP2 models and feature codes:
    http://www1.ibmlink.ibm.com/cgi-bin/master?request=salesmanual&parms=SMS&xh=NTZH*daEMSRi4n1USenGnN9332&xhi=usa.main%7Csalesmanual%5E&type=D&search=9076&title=T&product
20. Requires minimum AIX 4.3.3 APAR IY22024.
21. Requires minimum PSSP 3.4 APAR IY33448
22. Requires minimum PSSP 3.2 APAR IY18172
23. AIX 5.1 supported with 32-bit kernel. Requires minimum EMC ODM fileset support 5.0.0.0.
24. IBM 6227 and IBM 6228 adapters are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server
    6227 Filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte ;
    6228 Filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f9.diag, devices.pci.df1000f9.rte
25. Supported in SMP and LPAR modes
26. PowerPath is supported with LVM and JFS
27. GAB disks (membership and service group heartbeat disks) are not supported.
28. AIX 5.1 supported with 32/64 bit kernel.
29. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
30. IBM Native Fibre Channel drivers with feature code 6227 and with feature code 6228 are supported on the same server. Feature 6228 and 6239 are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server. 6227 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte; 6228 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f9.diag, devices.pci.df1000f9.rte; 6239 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1080f9.diag, devices.pci.df1080f9.rte
31. For minimum Powerpath version 3.0.3, minimum CLArray S3.5.1.0.6 version is required.
32. Requires adapter firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx.
33. Requires AIX 5.1 with minimum maintenance level 03 APAR IY32749.
34. Minimum Powerpath version 3.0.3 is supported.
35. PSSP 3.5 supports a 32 or 64 bit kernel.
36. Requires minimum AIX5.1 with maintenance level 03 APAR IY32749.
37. Requires minimum PSSP APAR IY38509
38. AIX 5.1 supported only with 32-bit kernel.
39. Requires adapter firmware 3.22A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum flare code 8.46.xx.

Microsoft Windows 2000

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
2. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
3. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
4. CLARiiON FC4500 array is also supported for these configurations.
5. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
6. PowerPath supported. ATF/CDE not supported.
7. If using ATF/CDE, requires 2.1.6 or greater..
8. GAB disks (membership and service group heartbeat disks) are not supported.
9. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. Supported on CX600, CX400, CX200 and FC4700-2 only.
12. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
13. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
14. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
    VxVM not supported.
    PowerPath 3.0 supported.
15. For CX200 direct-connect only, boot from array for clusters not supported.
16. PowerPath not supported. ATF is supported.
17. RPQ required for PowerPath support.
18. An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65

1. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
2. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
5. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
6. CLARiiON FC4500 array is also supported for these configurations.
7. PowerPath supported. ATF/CDE not supported.
8. If using ATF/CDE, requires 2.1.6 or greater..
9. GAB disks (membership and service group heartbeat disks) are not supported.
10. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
11. Must use standard PCI 32bit/33MHz slot for SCSI

No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type	Comments
25	Proliant 8500	Microsoft Windows 2000 Advanced Server: SP2[11], SP3[11], SP4; Microsoft Windows 2000 Datacenter: SP2[11], SP3[11]; Microsoft Windows 2000 Server: SP2[11], SP3[11], SP4	Microsoft MSCS	HA: 4	HPQ: FCA2354 (LP9002), FCA2355 (LP9002DC)	FC-SW	See[6]

1. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
2. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
5. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
6. CLARiiON FC4500 array is also supported for these configurations.
7. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
8. If using ATF/CDE, requires 2.1.6 or greater..
9. PowerPath supported. ATF/CDE not supported.
10. GAB disks (membership and service group heartbeat disks) are not supported.
11. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
12. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
13. Includes both Pentium PRO and XEON models
14. HP NetServer LC2000 is only supported with two processors.Uni-Processor configurations are not supported
15. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
16. Requires QLogic driver v6.04.02 and BIOS v1.34.
17. Supported on CX600, CX400, CX200 and FC4700-2 only.
18. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
    VxVM not supported.
    PowerPath 3.0 supported.
19. CX600 only.
20. PowerPath not supported. ATF is supported.
21. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
22. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0
    . VxVm not supported. PowerPath 3.0 supported.
23. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN]:817789
24. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
25. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
26. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.

1. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
2. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
3. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
4. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
5. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
6. CLARiiON FC4500 array is also supported for these configurations.
7. PowerPath supported. ATF/CDE not supported.
8. This HBA is equivalent to the qLogic QLA2310.
9. IBM xSeries Servers only:
10. If using ATF/CDE, requires 2.1.6 or greater..
11. GAB disks (membership and service group heartbeat disks) are not supported.
12. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
13. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
14. Supported on CX600, CX400, CX200 and FC4700-2 only.
15. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
    VxVM not supported.
    PowerPath 3.0 supported.
    This HBA is equivalent to the qLogic QLA2340.
    For CX200 direct-connect only. boot from array for clusters not supported.
16. If using ATF/CDE, requires 2.1.6 or greater.
19. Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
20. MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
21. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

    This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
22. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
23. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.

1. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
2. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
5. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
6. CLARiiON FC4500 array is also supported for these configurations.
7. PowerPath supported. ATF/CDE not supported.
8. If using ATF/CDE, requires 2.1.6 or greater..
9. GAB disks (membership and service group heartbeat disks) are not supported.
10. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
11. PowerPath not supported. ATF is supported.
12. FC4500, FC4700 only.

Microsoft Windows 2003

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. CLARiiON FC4500 array is also supported for these configurations.
2. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
3. PowerPath is not supported.
4. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
5. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
6. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
7. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
8. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
9. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

IBM

IBM – Microsoft Windows 2003							
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type	Comments

2	eServer BladeCenter HS20 (Model 8678)[11]	Microsoft Windows 2003: DataCenter[3, 4, 5], Enterprise Edition (Advanced Server)[3, 4, 5], Standard Edition (Server)[3, 4, 5]	Microsoft MSCS[8, 9, 10]	HA: 4	IBM HS20 FC Expansion card 48P7061[12]	FC-SW	See[1]

1. CLARiiON FC4500 array is also supported for these configurations.
2. This HBA is equivalent to the qLogic QLA2310.
3. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
4. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
5. PowerPath is not supported.
6. This HBA is equivalent to the qLogic QLA2340.
7. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
8. MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
9. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
10. Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
11. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
12. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

    This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

1. CLARiiON FC4500 array is also supported for these configurations.
2. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
3. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
4. PowerPath is not supported.
5. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

1. CLARiiON FC4500 array is also supported for these configurations.
2. PowerPath is not supported.
3. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
4. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
5. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

Microsoft Windows NT

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. Powerpath & ATF supported.
2. CLARiiON FC4500 array is also supported for these configurations.
3. Novell Storage Services supported.
4. Maximum number of NWFS volumes that can be mounted is 64.
5. Requires NetWare patches: NWPAPT2A and NSS5J.
6. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
7. FC-AL for CX200 requires the following:
   1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
   2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
8. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
9. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
10. Includes both Pentium PRO and XEON models
11. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
12. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
13. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
14. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).

1. Powerpath & ATF supported.
2. CLARiiON FC4500 array is also supported for these configurations.
3. Novell Storage Services supported.
4. Maximum number of NWFS volumes that can be mounted is 64.
5. Requires NetWare patches: NWPAPT2A and NSS5J.
6. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
7. FC-AL for CX200 requires the following:
   1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
   2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
8. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
9. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
10. This HBA is equivalent to the qLogic QLA2340.
11. If using ATF/CDE, requires 2.1.6 or greater.

19.870

1. Requires QLogic driver v6.04.02 and BIOS v1.34
2. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
3. CLARiiON FC4500 array is also supported for these configurations.
4. OCFS (Oracle Cluster File System) is not supported.
5. Watchdog Timer should be disabled in ocmargs.ora
6. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
7. Supported with QLogic driver v6.04.02 or v6.05.00.
8. Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
9. An RPM from Dell may be used to install the QLogic v6.X driver. RPM may be obtained from the QLogic website.
10. QLogic driver is available with Dell/Oracle CC kit.
11. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
12. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
13. PowerPath is not supported.
14. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
15. Requires patch p2646914_9202_LINUX.zip (Private Network Fix).

16. requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
17. Oracle Cluster File System v1.0 supported with Linux v2.4.9-E9 through E12.
18. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
19. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
20. Review single attach VxVM notes for PowerPath and DMP restrictions.
21. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
22. GAB disks (membership and service group heartbeat disks) are not supported.

1. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
2. Requires QLogic driver v6.04.02 and BIOS v1.34
3. CLARiiON FC4500 array is also supported for these configurations.
4. Watchdog Timer should be disabled in ocmargs.ora
5. Supported with QLogic driver v6.04.02 or v6.05.00.
6. OCFS (Oracle Cluster File System) is not supported.
7. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
8. Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
   FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
9. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
10. Oracle Cluster File System v1.0 supported with Linux v2.4.9-E9 through E12.
11. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
    Booting from EMC storage arrays is NOT supported with PowerPath.
12. Includes both Pentium PRO and XEON models
13. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
14. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
15. Host must be offline for interfamily Symmetrix microcode upgrade.
16. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
17. Review single attach VxVM notes for PowerPath and DMP restrictions.
18. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
19. GAB disks (membership and service group heartbeat disks) are not supported.

1. PowerPath support for Sun Cluster 2.2 with Solaris 8 only FC4700 with Flare level 08.45 only. ODS is not available at this time.
2. Support for FC4500, FC4700 and FC5300, FC5500, FC5700.
3. No longer available
4. Mixing JNI and Emulex SBUS HBAs on the same host connected to the same storage system is not supported. If there is a business reason to do so, submit an RPQ.
5. Requires driver rev 2.07.17 or higher and fcode 13.3.8.02C
6. JNI FC64-1063 HBA's cannot be connected directly to an FC4500 storage array in a multi-host environment. Hubs or switches must be used.
7. Support for FC4500, FC4700, and FC5300.
8. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
9. FC-AL and FC-SW topologies can co-exist on the same server but not on the same HBA, provided that the different topologies are attached to different HBAs
10. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
11. FC-SW applies only to CX600, CX400, FC4500 and FC4700
12. No OPS support for Solaris 7.

13. Dynamic Reconfiguration is supported (Enterprise 10000 SBus only); requires ATF v3.1.2 or higher
14. Cluster with more than 4 nodes requires VCS patch P2 and VxVM v3.1 patch P4
15. GAB disks (membership and service group heartbeat disks) are not supported.
16. Supported on CX600, CX400, FC4500, FC4700 Only
17. Clusters with more than 4 nodes require VCS patch P2 and VxVM v3.1 patch P4
18. Requires Solaris 8 update 7
19. Supported with Powerpath 3.x configuration only. Native names only, no "power devices". Review the ESN topology guide section on Oracle DBED/AC case studies for configuration restrictions.
20. Veritas HA clusters are supported with FC-SW only
21. Review the ESN Topology Guide section on Oracle DBED/AC Case Studies for configuration restrictions.
22. If all FC connectivity to the array is lost (without a server shutdown), then after connectivity is restored, the user must execute a vxdctl enable command, before the VCS Oracle 9iRAC service group is brought back online.
23. Veritas MP1 is required for clusters with more than 2 servers
24. 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.
25. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support
26. See the EMC price book for HBA vendor ordering information. This HBA is not sold by EMC
27. OPS, RAC, or greater than 2-node HA are supported with FC-SW only
28. **For new installations, core software minimum requirement with**
    CX600
    Array software – Access Logix 02.04.1.60.5.002
    Array software – Non-Access Logix 02.04.0.60.5.002
    CX400
    Array software – Access Logix 02.04.1.40.5.002
    Array software – Non-Access Logix 02.04.0.40.5.002
    FC4700
    Array software – Access Logix 08.49.51
    Array software – Non-Access Logix 08.49.01

19.864

Solaris 9:
Core software minimum requirements same as new installations (above)
Support for Veritas Volume Manager VxVM 3.2 Patch 03 and Solaris Volume Manager require an RPQ.

Solaris 8:
Supported on CX600, CX400 running release core software, FC4700 running Flare level 08.46 or later. Requires PowerPath 3.0.2 or later, no ATF support.
Greater than 2-node OPS, RAC configurations supported on CX600 running 02.02.1.60.5.005, CX400 running 02.02.1.40.5.006 level core software (or later), FC4700 running Flare level 08.47 or later.
If using VxVM, requires VxVM 3.2 patch 03. Do not install VxVM patch 112388-01.

29. Supported with VCS only.
30. Supported on CX600, CX400 and FC4700-2 only.
31. Supported with VCS 3.5 Maintenance Patch 1
32. Please review Veritas support pages for latest patch information.
33. **EMC required Sun patches for Solaris 9:**
    112233-06 Sun OS 5.9: kernel patch
    112834-02 Sun OS 5.9: patch SCSI
    113277-11 Sun OS 5.9: sd and ssd patch
34. **Supported only on VxVM 3.2 P03, VxVM 3.5 MP1, and SDS 4.2.1**
35. **Requires RPQ**
36. **Supported only on VxVM 3.5 MP1 and SVM**

Fibre Connectivity: Hub

Please refer to the fibre channel cables and connectors reference file: EPIc_FibreCablesConnectors.pdf.Please refer to the Base Connectivity Interoperability Application for details concerning kernel versions, minimum driver and BIOS / firmware revisions.

HPQ HP-UX

HPQ HP-UX									
No.	Operating System	Host Bus Adapter	Hub	Fanin	Fanout	Luns/Storage Port	Luns/HBA	Luns/Loop	Comments
1	HPQ HP-UX; 11.0[6], 11.0 990P[6], 11.0 ACE[6], 11i v1.0 (HP-UX 11.11)[6]	HPQ: A3404A, A3591B, A3740A, A5158A, A6684A, A6685A, A6795A	Gadzoox FCL1063TW; HPQ: A3724A/AZ[7], A4839A/AZ[7]	4	1	256	256	128	See[1, 2, 3, 4, 5]

1. Fanout represents the maximum initiators (host adapters) per CLARiiON port. Fanin represents the number of CLARiiON ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see 'CLARiiON Open Systems Configuration Guide.
2. Hubs not supported for FC4700, CX600, CX400, CX200.
3. Lun Per HBA (FC-AL)

   CX600 256
   CX400 256
   FC4700 233
   FC4500 223
4. Fanout/Fan in

   CX600 4:1/1 4
   CX400 4:1/1 4
   FC4700 4:1/1 4
   FC4500 4:1/1 4
5. Luns Per Array (FC-AL)

   CX600 256
   CX400 256
   FC4700 223
   FC4500 223
6. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
7. HP optical Hubs (HP models A3724A and A4839A) have been qualified, but are not sold by EMC.

1. Single HBA zoning is required regardless of the switch being utilized.
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
3. **Supported with QLogic driver v6.04.02 or v6.05.00.**
4. Hubs not supported for FC4700, CX600, CX400, CX200
5. CX400 and FC4700
6. CX200
7. FC4500 and FC5300
8. CX600
9. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
10. FC5300
11. FC4500
12. CX400
13. FC4700
14. This kernel is limited to 100 devices, not 128.
15. Requires v6.2.1 or higher Navisphere host agent/CLI.
16. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
17. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
18. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
19. **FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.**
20. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
21. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
22. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**
23. **Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.**

SGI IRIX

SGI IRIX								
No.	Operating System	Host Bus Adapter	Hub	Fanin	Fanout	Luns/Storage Port	Luns/HBA	Luns/Loop
1	SGI IRIX 6.5.11, 6.5.12	SGI PCI-FC-1P-OPT-A	Gadzoox FCL1063TW[7]	4[1]	8[1, 6]	255[4, 5]	256	223[2, 3] See notes[2, 3]
2	SGI IRIX 6.5.13, 6.5.14, 6.5.15, 6.5.16, 6.5.17, 6.5.18	SGI: PCI-FC-1P-OPT-A, PCI-FC-1P-OPT-B	Gadzoox FCL1063TW[7]	4[1]	8[1, 6]	255[4, 5]	256	223[2, 3] See notes[2, 3]

1. Fanout represents the maximum initiators (host adapters) per CLARiiON port. Fanin represents the number of CLARiiON ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see CLARiiON Open Systems Configuration Guide.
2. FC4700 223, CX400 512, CX600 1024
3. The maximum number of LUNs which IRIX can address on a single CLARiiON is 255.
4. Maximum for FC4700 is 223
5. This is the maximum number of LUNs supported by IRIX on a single CLARiiON, independent of the number of ports on the array.
6. FC4700, CX400 4:1; CX600 8:1
7. Hubs not supported for FC4700 CX600, CX400, CX200

SuSE Linux

SuSE Linux								
No.	Operating System	Host Bus Adapter	Hub	Fanin	Fanout	Luns/Storage Port	Luns/HBA	Luns/Loop

1. Requires at least v5.11.09 of FC5700 Core Software (a.k.a. Flare), v5.32.01 of FC4500 Core Software or v5.24.00 of FC5300 Core Software.
2. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
3. Switch support can be QuickLoop dedicated to any HP hosts in Table 84 on page 226 or heterogeneous fabric with HP FC-SW (fabric) hosts in that table. For FC4700, one port on each SP may be used for QuickLoop when the other port is used for FC-SW. QuickLoop support requires chargeable model DSBQLP-0D.
4. Luns Per Array (FC-SW)

   CX600 1024 (256 LUNs per storage group, 32 LUNs maximum per RAID group, 32 RAID groups maximum.

   CX400 512
   FC4700 223
   FC4500 223
5. Fanout/Fan in

   CX600 32:1/1:4
   CX400 32:1/1:4
   FC4700 32:1/1:4 (08.42.xx or higher microcode)
   15:1/1:4 (08.41.xx or lower microcode)

   FC4500 15:1/1:4
6. Luns Per HBA

   CX600 256
   CX400 256
   FC4700 223
   FC4500 223
7. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
   EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
   QuickLoop is not supported with Brocade 3200/3800/12000 or DS-16B2, ED-12000B.
10. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only
11. FC4700-2 supported at 1 Gb and 2 Gb.
12. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware. 1 x L1 or 2 x L2 ports per quad only.
13. Boot support Minimum fw.v4.0.2a
14. CX600 Fanout/in 32:1/1:4
    CX400 Fanout/in 32:1/1:4
    FC4700 Fanout/in 32:1/1:4
    FC4500 Fanout/in 15:1/1:4
15. supported sever model: rp5470 PDC 42.06
16. NDU base: 08.49.51
17. During initial switch configuration, the Persistent FC ID's must be enabled on the Vsan that contains any HPUX HBAs. If Persistent FC IDs are enabled to an existing Vsan containing non HPUX HBAs, the process may be disruptive. See MDS 9000 Family Configuration Guild for details.
18. Minimum microcode revision: 08.49.51

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. Refer to Table 71 on page 202 for single-vendor and mixed-vendor switched fabrics and supported switch firmware
3. Requires at least v5.11.09 of FC5700 Core Software (a.k.a Flare), v5.32.01 of FC4500 Core Software or v5.24.00 of FC5300 Core Software.
4. ED-64 and ED-1032 not supported for FC5300
5. "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
   1. Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
   2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
   3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
6. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
7. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only
8. Multipath support or connections to the secondary port are not supported at this time.
9. See Switched Fabric Topology Parameters for switch firmware levels.
10. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware. 1 ISL per quad only.
11. CX600 only.
12. CX400 Only
13. FC4700 only

11. "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
    1. Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
    2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
    3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
12. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
13. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
    ED-64 and ED-1032 not supported for FC5300.
    EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
16. **For IBM Netfinity and xSeries Intel servers only.**
17. **This HBA is equivalent to the qLogic QLA2340.**
18. **This HBA is equivalent to the qLogic QLA2310.**
19. **(QLA2200) For IBM xSeries and Netfinity servers only.**
20. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
21. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
22. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
23. **FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.**
24. **See Switched Fabric Topology Parameters for switch firmware levels.**
25. **CX200**
26. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
27. **Firmware 3.0.2a or later required.**
28. **Firmware v2.5.1b or later required**
29. **Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

1. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
   Firmware v2.5.1b or later required
   EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
4. **Supported with QLogic driver v6.04.02 or v6.05.00.**
5. CX200
6. CX600 and CX400
7. FC4700, FC4500, and FC5300
8. FC5300
9. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
10. Firmware 3.0.2a or later required.
11. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
12. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
13. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
    Booting from EMC storage arrays is NOT supported with PowerPath.
14. Single HBA zoning is required regardless of the switch being utilized.
15. Requires v6.2.1 or higher Navisphere host agent/CLI.
16. This kernel is limited to 100 devices, not 128.
17. CX600
18. CX400
19. FC4500
20. FC4700
21. See Switched Fabric Topology Parameters for switch firmware levels.
22. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.
23. FC-AL direct-connect or McData fabric connect only. Brocade fabric attach is not currently supported.
24. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
25. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
26. **FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.**
27. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
28. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
29. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
30. **Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.**
31. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**
32. **Refer to Table 71 on page 202 for single-vendor and mixed-vendor switched fabrics and supported switch firmware.**
33. **CX400, CX600, and FC4700(32 initiators per SP port (128 max.) with 08.42.xx or higher microcode.**
34. **FC4500 and FC4700(15 initiators per array with 08.41.xx or lower microcode**

35. **"Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):**
    1. Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
    2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
    3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
36. **CX600: 256 Luns per storage group for a maximum of 1024 LUNs. 256 LUNs without Access Logix.**
37. **CX400 : 256 LUNs per storage group for a maximum of 512 LUNs. 256 LUNs without Access Logix.**
38. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
39. **ED-64 and ED-1032 not supported for FC5300.**
40. **Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

1985 7

SGI IRIX

SGI IRIX								
No.	Operating System	Host Bus Adapter	Switch	Fanin	Fanout	Luns/Storage Port	Luns/HBA	Port sharing
1	SGI IRIX: 6.5.11, 6.5.12	SGI PCI-FC-1P-OPT-A	Brocade Silkworm: 12000[1], 3200[1], 3800[1], 6400[1]: EMC Connectrix: DS-16M2[1, 5], DS-24M2[1, 5], DS-32M2[1, 5], ED-12000B[1, 6], ED-140M[1], ED-64M[1, 5]; McDATA: ED-6064[1, 5], ED-6140[1], ES-3216[1, 5], ES-3232[1, 5], ES-4500[1]	4	32	255[2, 3]	256	Y[4]
2	SGI IRIX: 6.5.13, 6.5.14, 6.5.15, 6.5.16, 6.5.17, 6.5.18	SGI: PCI-FC-1P-OPT-A, PCI-FC-1P-OPT-B	Brocade Silkworm: 12000[1], 3200[1], 3800[1], 6400[1]: EMC Connectrix: DS-16M2[1, 5], DS-24M2[1, 5], DS-32M2[1, 5], ED-12000B[1, 6], ED-140M[1], ED-64M[1, 5]; McDATA: ED-6064[1, 5], ED-6140[1], ES-3216[1, 5], ES-3232[1, 5], ES-4500[1]	4	32	255[2, 3]	256	Y[4]

1. Refer to the Switched Fabric Topology Parameters Table (formerly Table 71 on Page 202 of the ESM) for single-vendor and mixed vendor switched fabrics and supported switch firmware
2. Maximum for FC4700 is 223
   This is the maximum number of LUNs supported by IRIX on a single CLARiiON, independent of the number of ports on the array.
   "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
   1. Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
   2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
   3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
5. FC4700 only with Access Logix 8.42.5x or higher.
6. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.

1. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
2. Firmware v2.5.1b or later required
3. Supported with QLogic driver v6.04.02.
4. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
5. Requires rev1 sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
6. CX200
7. CX600 and CX400
8. FC4700, FC4500 and FC5300.
9. FC5300
10. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
11. Firmware 3.0 2a or later required.
12. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
13. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
14. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
15. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
16. See Switched Fabric Topology Parameters for switch firmware levels
17. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
18. Requires QLogic v6.04.02 driver.
19. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
20. Requires QLogic driver v6.04.00 or above.
21. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
22. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
23. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
24. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**

25. **Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
26 **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
   1. Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
   2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
   3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
3. CX400
4. 256 LUNs per storage group for a maximum of 512 LUNs. 256 LUNs without Access Logix.
5. CX600
6. 256 Luns per storage group for a maximum of 1024 LUNs. 256 LUNs without Access Logix.
7. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
8. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
9. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
10. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
11. ED-64 and ED-1032 not supported for FC5300.
12. No boot support at this time.

Application Software

DG DG/UX

DG DG/UX				
No.	Operating System	Host Bus Adapter	Application Software	Comments
1	DG DG/UX R4.20MU07[3, 4, 5]	Emulex: LP8000-EMC[10], LP8000-F1[6, 7, 8, 9]	MirrorView 1.25.01; Navisphere: Agent/CLI 5.1.0, Analyzer 6.2.0, Integrator 6.2.0[11], Manager,Event Monitor 6.2.1[11, 12]	See[1, 2]

1. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
2. All installations currently require an RPQ with diagrams and revisions noted. Support for Core Array software is frozen at v8.42.10/60 for DG/UX systems.
3. Support for core software is frozen at v8.42 10/60 for DG/UX systems.
4. The release notice for DG/UX (included with the software release at path: "/usr/release/dgux*.rn) lists supported platforms.
5. FC4700 is only supported on DG/UX 4.20 MU07.
   Maximum of 2 fabrics, each with a maximum of 4 switches.
   Maximum of 4 FC4700s per fabric.
   Maximum of 16 HBAs per fabric.
   Maximum of 32 HBAs per FC4700 SP
   Maximum of 6 DG/UX servers per FC4700.
   Maximum of 4 HBAs per AV3750 server (2 per fabric).
   Maximum of 4 HBAs per NUMA block (2 per fabric in non-clustered environments).
   FA4500 may be mixed within the same fabric with FC4700 running Access Logix, but must be separately zoned.
6. Only the Brocade FC switch connection is supported. Connectrix FC switch is not supported.
7. DG/UX automatically loads the firmware and BIOS onto the Emulex HBA during boot-up as needed. Current DG/UX R4.20MU06 OS supported firmware is V3.20x1 and BIOS V1.4.
8. Requires firmware 3.20x4 using the native driver.
9. FC-AL support requires LP8000 BIOS version DB1.60A7 and firmware version DS3.20x4.
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. Shipped with Navisphere Manager Integrator supports HP Open view 6.1,Tivoli NetView 6.0b, and Unicenter TNG 2.2 and 2.4.
12. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200-arrays from a Windows 2000 host.

Fujitsu Technology Solutions Solaris

Fujitsu Technology Solutions Solaris			
No.	Operating System	Host Bus Adapter	Application Software
1	Fujitsu Technology Solutions Solaris: 2.6, 7, 8, 9	Emulex: LP8000-EMC[1], LP9002-E (LP9002L-E)	PowerPath: 3.0.3, 3.0.4

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

HPQ HP-UX

EMC storage (Clariion & Symmetrix) interoperability support is listed as part of the Base Connectivity, Clustered Host and Switch Interoperability tables of the EMC Support Matrix. It should be understood that arrays with matching matrix configurations can be used in a shared SAN, Shared Server or Shared HBA, unless explicitly noted. PowerPath and other load balancing software versions must be reviewed independently for mutual array support or coexistence concerns.

HPQ HP-UX				
No.	Operating System	Host Bus Adapter	Application Software	Comments
1	HPQ HP-UX: 11.0[1], 11i v1.0 (HP-UX 11.11)[1]	HPQ A3591B	PowerPath 3.0.2 b41[5]	See[3]
2	HPQ HP-UX: 11.0[1], 11i v1.0 (HP-UX 11 11)[1]	HPQ: A3404A, A3591B, A3740A, A5158A, A6684A, A6685A, A6795A	MirrorView 1.7[6]; Navisphere: Agent/CLI 6.4, Analyzer 6.4, Integrator 6.2.0[2], Manager, Event Monitor 6.4.1[2, 11], **SAN Copy v1.0[8, 9, 10]**; SnapView 2.1[6, 7]; admsnap 2.1[6, 7]	
3	HPQ HP-UX: 11.0[1], 11i v1.0 (HP-UX 11.11)[1]	HPQ: A3404A, A3740A, A5158A, A6684A, A6685A, A6795A	PowerPath 3.0.2 b41[5]	See[3, 4]

1. For HP-UX systems only.LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
2. Shipped with Navisphere Manager.Integrator supports HP Open view 6.1,Tivoli NetView 6.0b, and Unicenter TNG 2.2 and 2.4.
   Minimum code revisions levels -
   FC4700 - 08.49.51 AccessLogics
   - 08.49.01 Non-AcessLogics

   FC4500 - 06.32.18
4. CLARiiON and Symmetrix can coexist in the SAN with the same server.
5. Supported with HP-UX 11.0. 11i only
6. For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
7. A Snapshot must not be in a clustered Storage Group.
8. **SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.**
9. **SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 arrays. Data movement is supported in and between CX Series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.**
10. **Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, IRIX, and Linux**
11. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
3. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
4. **SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.**
5. **SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 arrays. Data movement is supported in and between CX Series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.**
6. **Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, IRIX, and Linux**
7. A Snapshot must not be in a clustered Storage Group.
Shipped with Navisphere Manager.Integrator supports HP Open view 6.1,Tivoli NetView 6.0b, and Unicenter TNG 2.2 and 2.4.
ATF/CDE and PowerPath cannot co-exist in the same server.
10. Powerpath supported on FC4500, FC5300, FC4700, CX600, CX400, and CX200.
PowerPath Base supported on FC4500, CX200 only
CLARiiON and Symmetrix can co-exist in the SAN with the same server.
11. **Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.**
12. This HBA is equivalent to the qLogic QLA2340.

Microsoft Windows 2003

Microsoft Windows 2003			
No.	Operating System	Host Bus Adapter	Application Software
1	Microsoft Windows 2003: DataCenter[1, 2, 3, 4], Enterprise Edition (Advanced Server)[1, 2, 3, 4], Standard Edition (Server)[1, 2, 3, 4]	Emulex: LP8000-EMC[7], LP9002-E (LP9002L-E), LP9802-E, LP9802DC-E, LP982-E; HPQ Dual-port mezzanine controller card; QLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	MirrorView 1.7[6]; Navisphere: Agent/CLI 6.4, Analyzer 6.4, Integrator 6.2.0[8], **Manager, Event Monitor 6.4.1[8, 12]**; **SAN Copy v1.0[9, 10, 11]**; SnapView 2.1[5, 6]; admsnap 2.1[5, 6]

1. Support limited to the following configurations: 1 HBA with 1 path to 1 SP; 2 HBAs, one with a single path to SPA and the other with a single path to SPB. Powerpath not supported. Refer to HBA guides for expected device behavior.
2. PowerPath is not supported.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
5. A Snapshot must not be in a clustered Storage Group.
6. For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix
7. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
8. Shipped with Navisphere Manager.Integrator supports HP Open view 6.1,Tivoli NetView 6.0b, and Unicenter TNG 2.2 and 2.4.
9. **Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, IRIX, and Linux**
10. **SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.**
11. **SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 arrays. Data movement is supported in and between CX Series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.**
12. **Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600,**

non-CX400, non-CX200 arrays from a Windows 2000 host.

1. Shipped with Navisphere Manager.Integrator supports HP Open view 6.1,Tivoli NetView 6.0b, and Unicenter TNG 2.2 and 2.4.
2. This kernel is supported with PowerPath v3.0.2 via RPQ only.
3. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
4. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
5. **Supported with QLogic driver v6.04.02 or v6.05.00.**
6. For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
7. A Snapshot must not be in a clustered Storage Group.
8. **Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, IRIX, and Linux**
9. **SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.**
10. **SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 arrays. Data movement is supported in and between CX Series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.**
11. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
12. **PowerPath Base is supported on the FC4500 and CX200 only.**
13. **Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
14. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
15. **FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.**
16. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
17. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
18. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
19. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
20. **Single HBA zoning is required regardless of the switch being utilized.**
    Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
    Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.

11. **SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 arrays. Data movement is supported in and between CX Series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.**
12. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
13. Requires QLogic driver v6.04.00 or above.
14. Requires QLogic v6.04.02 driver
15. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
16. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
17. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
18. **Requires QLogic v6.04.02 or v6.05.00 driver.**
    EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
    CLARiiON and Symmetrix can co-exist in the SAN with the same server.
21. **PowerPath supported on FC4500, FC4700, CX600, CX400, and CX200.**
22. **PowerPath Base is supported on the FC4500 and CX200 only.**
23. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
24. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
25. **Requires rev1 sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
26. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
27. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. Shipped with Navisphere Manager Integrator supports HP Open view 6.1,Tivoli NetView 6.0b. and Unicenter TNG 2.2 and 2.4.
3. ATF/CDE and PowerPath cannot co-exist in the same server
   For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
4. A Snapshot must not be in a clustered Storage Group.
5. Admsnap is not qualified with VERITAS Volume Manager
6. **SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.**
7. **Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, IRIX, and Linux**
8. **SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 arrays. Data movement is supported in and between CX Series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.**
9. Manager v6 x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31 01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
10. Powerpath supported on FC4500, FC4700, CX600, and CX400.
    CLARiiON and Symmetrix can co-exist in the SAN with the same server.
11. PowerPath supported as a migration path only. PowerPath Volume Manager not supported.
12. **The Volume Manager component of PowerPath 4.x is not currently supported with Sun SunCluster products.**

CLARiiON CX200

Base Connectivity

Do not use a LUN in the CLARiiON DAE2-ATA as a host OS boot device.Do not use a LUN in the CLARiiON DAE2-ATA as a host OS boot device.CX200LC configurations are limited to direct attach configurations under the CX200 section. PowerPath is not supported on CX200LC.Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN. EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.

Microsoft Windows 2000

1. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com
2. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
   EMC strongly recommends that HBAs of different vendors not be used in the same host server.
   Windows 2000 Professional is supported as the management workstation.
6. **Requires driver 8.2.1.20, and bios 1.33 for Stratus ftServers. Supports SNIA HBA API. Available at http://www.qlogic.com.**
7. **Qlogic SANSurfer/SANBlade Manager is not supported.**
8. **FC-AL supported for direct attach only. No support for hubs or Quickloop at this time.**
9. **Refer to the Stratus, Bull or NEC documentation for hardware, software and non-storage related setup and configuration.**

1. Windows 2000 Professional is supported as the management workstation
2. CX200 available through selected channels.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
5. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
6. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
7. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
8. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
9. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
10. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
11. If using ATF/CDE with QLogic, requires v2.1.6 or greater
12. Supports PowerPath 3.0 or greater.
13. No MirrorView or SnapView used on boot LUNs.
14. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
15. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
16. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
17. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
18. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
19. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
20. **PowerPath supported. ATF/CDE not supported.**
21. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**

22. **If using ATF/CDE, requires 2.1.6 or greater.**
23. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
24. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
25. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels
3. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
4. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
5. **If using ATF/CDE, requires 2.1.6 or greater.**
6. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
7. **PowerPath supported. ATF/CDE not supported.**
8. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
9. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
10. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only
11. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
12. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
13. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
14. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
15. Supports PowerPath 3.0 or greater.
16. No MirrorView or SnapView used on boot LUNs.
17. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
18. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
19. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
20. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
21. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
Not supported with Emulex LP8000-EMC HBA.
24. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
25. Supported on CX600, CX400, CX200 and FC4700-2 only.
26. PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.
27. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
28. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
29. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

1. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.

2. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
3. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
4. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
5. The LP9002-E now ships with the LP9002L-E low profile adapter
6. Symmetrix 8000 Series: 66/67 support at Windows 2000 SP1, SP2 and SP3 5568 support at Windows 2000 SP1, SP2 and SP3.
7. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
8. Must use standard PCI 32bit/33MHz slot for SCSI
9. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
10. CLARiiON CX200 NOTE. Requires 1.00x3 for direct-connect configurations only.
11. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
12. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
13. Windows 2000 Professional is supported as the management workstation.
14. CX200 available through selected channels.
15. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
16. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API
NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. Access Logic required. direct connect or fabric, (no booting through switch inter-switch links)
4. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
5. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
6. Supports PowerPath 3.0 or greater.
7. No MirrorView or SnapView used on boot LUNs.
8. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
9. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
10. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation
11. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
12. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
13. **PowerPath supported. ATF/CDE not supported.**
14. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
15. **If using ATF/CDE, requires 2.1.6 or greater.**
16. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
17. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
18. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
19. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
20. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
21. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
22. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
23. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
24. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
25. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
26. Includes both Pentium PRO and XEON models
27. The LP9002-E now ships with the LP9002L-E low profile adapter.
28. Requires minimum BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
29. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.

30. BIOS for the BL20p mezzanine card must be obtained from HP. Cannot use BIOS from Qlogic web site. EMC NVRAM settings must be configured manually. Refer to page 2-6 of the Readme document "EMC Fibre Channel with QLogic Host Bus Adapters in the Windows NT/Windows 2000 Environment" found at http://www.qlogic.com for the settings.
31. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
32. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
33. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
34. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
35. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
36. Requires driver 2.20a12, firmware 3.90a7 and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
37. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. This HBA is equivalent to the qLogic QLA2310.
3. Windows 2000 Professional is supported as the management workstation.
4. CX200 available through selected channels.
5. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
6. CLARiiON CX200 NOTE. Requires 1.00x3 for direct-connect configurations only.
7. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
8. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
9. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
10. PowerPath supported. ATF/CDE not supported.
11. This HBA is equivalent to the qLogic QLA2340.
12. FC-SW applies only to CX600. CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
13. For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: http://www-3.ibm.com/pc/support/site.wss/document.do?indocid=MIGR-39723
14. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
15. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
16. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
17. Supports PowerPath 3.0 or greater.
18. No MirrorView or SnapView used on boot LUNs.
19. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
20. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
21. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
22. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
23. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
24. This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
25. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
26. The LP9002-E now ships with the LP9002L-E low profile adapter.
27. **If using ATF/CDE, requires 2.0.9 or greater.**
28. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
29. **If using ATF/CDE, requires 2.1.6 or greater.**
30. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
31. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API. NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
32. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
33. **EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.**
34. **IBM HS20 Fibre Channel Expansion Card (48P7061)**
35. **When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)" This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.**
36. **Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.**
37. **This server has a built-in FC-SW and must be direct-attached to the external storage.**
38. **IBM BIOS 1.34, EMC Approved Qlogic Driver Version 8.2.2.25. Available at http://www.qlogic.com.**
39. **Host must be offline for interfamily Symmetrix microcode upgrade.**
40. **Booting Windows 2000 systems through ISLs (inter-switch links) in heterogenous fabrics is not currently supported.**
41. **Booting Windows 2000 systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops.**
42. **MSCS cluster configurations are supported. PowerPath 3.0 or greater required.**
43. **Symmetrix 8000 Series: 66/67 support at Windows 2000 SP1, SP2 and SP3 5568 support at Windows 2000 SP1, SP2 and SP3.**

4. If using ATF/CDE with Emulex, requires v2.1 5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
5. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
6. Supports PowerPath 3.0 or greater.
7. No MirrorView or SnapView used on boot LUNs.
8. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
9. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
10. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
    MSCS cluster configurations are supported with CX600, CX400 and FC4700.
11. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
13. EMC strongly recommends that HBAs of different vendors not be used in the same host server
14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
15. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
16. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
17. 64-bit slots for 3.3v HBAs only.
18. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
19. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
20. **PowerPath supported. ATF/CDE not supported.**
21. **If using ATF/CDE, requires 2.1.6 or greater.**
22. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
23. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
24. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
25. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
26. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

Stratus

Stratus – Microsoft Windows 2000							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments

1. CX600 only.
2. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
5. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
6. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
7. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
8. The LP9002-E now ships with the LP9002L-E low profile adapter.
9. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. ATF/CDE is not supported with driver 2.20a12. For ATF/CDE, use driver version 2.11a2. Supports SNIA HBA API. Emulex drivers are available at http://www.emulex.com. NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC. Supports SNIA HBA API.
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. Windows 2000 Professional is supported as the management workstation.
12. CX200 available through selected channels.
13. PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.
14. **If using ATF/CDE, requires 2.1.6 or greater.**
15. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
16. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

1. Requires STORPort driver version 1.00a15, and firmware 3.90a7. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
2. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
3. PowerPath is not supported.
4. EMC strongly recommends that HBAs of different vendors not be used in the same host server
5. This HBA is equivalent to the qLogic QLA2340
6. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
7. This HBA is equivalent to the qLogic QLA2310.
8. Requires STORPort driver version 1.00a15, and firmware 1.00a4. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
10. **IBM HS20 Fibre Channel Expansion Card (48P7061)**
11. **Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.**
12. **This server has a built-in FC-SW and must be direct-attached to the external storage.**
13. **IBM BIOS 1.34, EMC Approved Qlogic STORPort Driver Version 8.2.2.20. Available at http://www.qlogic.com.**
14. **When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"**

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
3. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
4. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
5. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
6. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
7. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
   If using ATF/CDE, requires 2.0.9 or greater.
   The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
3. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
4. Requires dnver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
5. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
6. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
7. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
8. Requires BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
9. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
10. Includes both Pentium PRO and XEON models
11. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
    The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
    If using ATF/CDE, requires 2.0.9 or greater.
14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. This HBA is equivalent to the qLogic QLA2310.
3. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
4. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
5. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
6. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
7. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
8. It is recommended that the QLogic QLA2340 is not installed in Slot 1.
9. For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: http://www-3.ibm.com/pc/support/site.wss/document.do?lndocid=MIGR-39723
10. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
11. This HBA is equivalent to the qLogic QLA2340.
12. If using ATF/CDE, requires 2.0.9 or greater
13. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
15. The LP9002-E now ships with the LP9002L-E low profile adapter.
16. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.

Edit config.sys with the following: Files=100 Buffers=99
When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditons exist where several LUNs are initially created and you perform your first install. NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.

3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. Requires NetWare patches: NWPAPT2A and NSS5J.
5. Novell Storage Services supported.
6. Powerpath & ATF supported.
7. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
8. Remote boot not supported with PERC controllers enabled in system BIOS.
9. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
10. No MirrorView or SnapView used on boot LUNs.
11. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
12. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
13. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
14. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
15. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT C: partition will.
16. PowerPath and ATF supported.
17. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
18. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
19. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
20. Maximum number of NWFS volumes that can be mounted is 64
21. Symmetrix 8000 Series: 66/67 support at NetWare 5.x, 5568 support at Netware 5.1.
22. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
23. Symmetrix 8000 Series: 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1.
24. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family
25. DOS boot device maximum accessible capacity is 2GB. Netware SYS volume must be in LUN 0.
26. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
27. PowerPath supported. ATF/CDE not supported.

28. Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
29. QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.
30. This HBA is equivalent to the qLogic QLA2340.
31. Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
32. This HBA is equivalent to the qLogic QLA2310.
33. (QLA2200) For IBM xSeries and Netfinity servers only.
34. Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.
35. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
36. For ATF on Pre CX series, Multipath support or connections to the secondary port are not supported at this time. One path per SP, 2 HBAs per host.
37. Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.
38. CX200 available through selected channels.
39. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
40. Requires HBA firmware revision 1.83 and HBA driver revision 6.50v, available at http://www.qlogic.com
    Requires SP4 or higher for NetWare 5.00.
41. Requires HBA bios 1.83 and driver 6.50v.
42. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
43. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
44. Requires NWPA.NLM V.3.07A update from Novell website.
45. PowerPath not currently supported.
46. Requires driver version 2.02e and firmware 3.90a7.
47. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

1. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
2. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
3. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
4. Maximum number of NWFS volumes that can be mounted is 64.
5. Must use standard PCI 32bit/33MHz slot for SCSI
6. Symmetrix 8000 Series: 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1.

19.823

7. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
8. Requires NWPA.NLM V.3.07A update from Novell website.
9. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
10. Edit config.sys with the following: Files=100 Buffers=99
11. When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditons exist where several LUNs are initially created and you perform your first install. NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
12. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
13. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
14. PowerPath not currently supported.
15. Requires driver version 2.02e and firmware 3.90a7.
16. Symmetrix 8000 Series: 66/67 support at NetWare 5.x, 5568 support at Netware 5.1.

4	Proliant DL580(G2)[31]	PCI, PCI-X	Novell Netware 6.0: SP1[20, 21], SP2[20, 21], SP3	QLogic QLA2340-E-SP[18, 25]	FC-AL, FC-SW[3]	Y[1, 2, 4, 7, 8, 9, 10, 11, 12, 13, 14, 15, 24]	

1. Edit config.sys with the following: Files=100 Buffers=99
2. When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditons exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. Novell Storage Services supported.
5. Powerpath & ATF supported.
6. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
7. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
8. No MirrorView or SnapView used on boot LUNs.
9. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
10. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
11. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
12. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
13. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT C: partition will.
14. PowerPath and ATF supported.
15. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
16. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
17. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
18. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
19. Requires NetWare patches: NWPAPT2A and NSS5J.
20. Maximum number of NWFS volumes that can be mounted is 64.
21. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
22. **Requires HBA bios 1.83 and driver 6.50v.**
23. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.** PowerPath supported. ATF/CDE not supported.
25. Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300 (FC5300 requires copper to Fibre transceiver.)
26. Symmetrix 8000 Series: 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1.
27. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
28. **Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.**
29. Symmetrix 8000 Series: 66/67 support at NetWare 5.x 5568 support at Netware 5.1.
30. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family
31. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
32. Includes both Pentium PRO and XEON models
33. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
34. **Requires NWPA.NLM V.3.07A update from Novell website.**
35. **NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
36. **PowerPath not currently supported.**
37. **Requires driver version 2.02e and firmware 3.90a7.**
38. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**
39. **Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.**
40. **CX200 available through selected channels.**
41. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**

1. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
2. **Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.**
3. **(QLA2200) For IBM xSeries and Netfinity servers only.**
4. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
5. Maximum number of NWFS volumes that can be mounted is 64.
6. Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
7. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Requires NetWare patches: NWPAPT2A and NSS5J.
9. Novell Storage Services supported.
10. Powerpath & ATF supported.
11. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
12. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
13. No MirrorView or SnapView used on boot LUNs.
14. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
15. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
16. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
17. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
18. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT C: partition will.
19. PowerPath and ATF supported.
20. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
21. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
22. Driver installation with NetWare 5.0 SP6A. Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
23. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
24. Edit config.sys with the following: Files=100 Buffers=99
25. When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditions exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
26. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
27. Symmetrix 8000 Series: 66/67 support at NetWare 5.x, 5568 support at Netware 5.1.
28. PowerPath supported. ATF/CDE not supported
29. Symmetrix 8000 Series. 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1.
30. **This HBA is equivalent to the qLogic QLA2310.**
31. **This HBA is equivalent to the qLogic QLA2340.**
32. **Host must be offline for interfamily Symmetrix microcode upgrade.**

33 **Requires driver 6.50v, BIOS 1.34 available from Qlogic.**
34 PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
35. This server only supports 5 Volt HBAs. qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
36. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
37. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
38 **NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
39. **Requires NWPA.NLM V.3.07A update from Novell website.**
40. **PowerPath not currently supported.**
41. **Requires driver version 2.02e and firmware 3.90a7.**
42. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with &lt:Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**
43. **Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.**
44. **CX200 available through selected channels.**
45. **Requires HBA bios 1.83 and driver 6.50v.**
46. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
2. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
12. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
13. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
14. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
15. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
16. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
17. This kernel is limited to 110 devices, not 128.
18. **Supported with QLogic driver v6.04.02 or v6.05.00.**
19. Requires QLogic driver 4.47.18 and BIOS 1.83.
20. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
21. Requires v6.0.5 or higher Navisphere host Agent/CLI.
22. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
23. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
24. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
25. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
26. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
27. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
28. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
29. **Single HBA zoning is required regardless of the switch being utilized.**
30. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.**

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
2. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7.

EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability

8 Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.

9 Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation

10 For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.

11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ

12. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

13 Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65

14. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

15. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**

16. Requires v6.0.5 or higher Navisphere host Agent/CLI.

17 Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.

18 Supported with QLogic driver v6.04.02 or v6.05.00.

19. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath

20 **An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

21 PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.

22. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300 FC5300 with FC-SW available from selected channels.

23. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

24 This kernel is limited to 110 devices, not 128

25. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com

26. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.

27 Requires QLogic driver 4.47.18 and BIOS 1.83.

28 Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.

29. **Requires v6.05 or higher Navisphere host agent/CLI.**

30 This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.

31. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.

32. **Host must be offline for interfamily Symmetrix microcode upgrade.**

33. **Single HBA zoning is required regardless of the switch being utilized.**

34 **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**

35. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

36. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

37. **Install with driver provided by Red Hat 7.2 installer and upgrade to the EMC-approved driver after installation.**

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
2. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
   Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
   Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
12. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
13. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
14. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
15. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
16. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
17. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
18. Requires QLogic driver 4.47 18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
19. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
    Booting from EMC storage arrays is NOT supported with PowerPath.
20. Includes both Pentium PRO and XEON models
21. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
22. Requires v6.0.5 or higher Navisphere host Agent/CLI.
23. **Supported with QLogic driver v6.04.02 or v6.05.00.**
24. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
25. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
26. This kernel is limited to 110 devices, not 128.
27. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
28. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
29. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
30. This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
31. Requires QLogic driver 4.47.18 and BIOS 1.83.
32. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation
33. **Host must be offline for interfamily Symmetrix microcode upgrade.**
34. **Single HBA zoning is required regardless of the switch being utilized.**

35 **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.**
36. **The kernel version listed is included in the corresponding standard distributed release.**
37. **For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.**
38. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable)
39. PowerPath v3.02 not supported on this system.
40 **Requires v6.05 or higher Navisphere host agent/CLI.**
41. **This HBA is equivalent to the qLogic QLA2340.**
42. **This HBA is equivalent to the qLogic QLA2310.**
43. **Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.**
44. **(QLA2200) For IBM xSeries and Netfinity servers only.**
45 Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
46. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
47. BIOS must be obtained from HP at http://h18000 www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
48. Requires QLogic driver v6 04 02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
49 **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
50 **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
51 **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

1. Requires v6.2.1 or higher Navisphere host agent/CLI
2. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
3. No MirrorView or SnapView used on boot LUNs.
4. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
5. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
6. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
7. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
8. **Host must be offline for interfamily Symmetrix microcode upgrade.**
9. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
10. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
11. (QLA2200) For IBM xSeries and Netfinity servers only
12. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
13. **This HBA is equivalent to the qLogic QLA2340.**
14. PowerPath v3.02 not supported on this system.
15. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
16. This HBA is equivalent to the qLogic QLA2310.
17. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
18. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
19. Requires v6.0.5 or higher Navisphere host Agent/CLI.
20. Supported with QLogic driver v6.04.02 or v6.05.00.
21. This server only supports 5 Volt HBAs. qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
22. PowerPath v3.0.2 b069 is not supported on this system.
23. This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
24. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
25. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
26. This kernel is limited to 110 devices, not 128.
27. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
28. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
29. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
30. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65

32. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
33. FC-SW applies only to CX600, CX400 CX200, FC4500, FC4700 and FC5300 FC5300 with FC-SW available from selected channels.
34. **Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.**
35. **For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.**
36. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
37. **The kernel version listed is included in the corresponding standard distributed release.**
38. Requires QLogic driver 4.47.18 and BIOS 1.83.
39. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
40. Single HBA zoning is required regardless of the switch being utilized.
41. Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.
42. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
43. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
44. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
45. **This HBA is equivalent to the QLogic QLA2200.**

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
2. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
8. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
12. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
13. Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
14. Requires QLogic driver 4.47.18 driver disk, dd.img–i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
15. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
16. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
17. This kernel is limited to 110 devices, not 128.
18. **Supported with QLogic driver v6.04.02 or v6.05.00.**
19. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
20. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
21. FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
22. FC–SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC–SW available from selected channels.
23. Requires v6.0.5 or higher Navisphere host Agent/CLI.
24. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
25. Requires QLogic driver 4.47.18 and BIOS 1.83.
26. Install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
27. **Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.63a1. Emulex drivers are available at http://www.emulex.com. Supports SNIA HBA API.**
28. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
29. **Single HBA zoning is required regardless of the switch being utilized.**
30. **Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. **Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
32. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC–approved driver after installation.**

1. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
2. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
3. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
4. **An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
5. Requires v6.2.1 or higher Navisphere host agent/CLI.
6. Requires rev1_sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
7. Supported with QLogic driver v6.04.02.
8. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
9. **PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.**
10. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
11. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
12. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
13. Requires QLogic v6.04.02 driver.
14. Requires QLogic driver v6.04.00 or above.
15. Requires rev3_sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
16. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
17. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
18. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
19. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
20. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
21. **Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
22. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

1. Linux v2.4.x Kernels support a maximum of 128 devices per system.
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
3. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
4. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
5. Includes both Pentium PRO and XEON models
6. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
7. Supported with QLogic driver v6.04.02.
8. Requires rev1 sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
9. Requires v6.2.1 or higher Navisphere host agent/CLI.
10. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
11. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
    FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
    FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
14. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
15. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
16. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
17. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**
18. **Host must be offline for interfamily Symmetrix microcode upgrade.**
19. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
20. Requires QLogic v6.04.02 driver.
21. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
22. Requires QLogic driver v6.04.00 or above
23. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
24. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
25. **Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
26. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
27. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

1. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
2. Requires v6.2.1 or higher Navisphere host agent/CLI.
3. Requires rev1 sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
4. Supported with QLogic driver v6.04.02.
5. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
6. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
7. **This HBA is equivalent to the qLogic QLA2340.**
8. **This HBA is equivalent to the qLogic QLA2310.**
9. (QLA2200) For IBM xSeries and Netfinity servers only.
10. This server only supports 5 Volt HBAs. qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
12. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
13. Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.
14. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
15. **The kernel version listed is included in the corresponding standard distributed release.**
16. Linux v2.4.x Kernels support a maximum of 128 devices per system.
17. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**
18. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
19. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
20. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
21. **Host must be offline for interfamily Symmetrix microcode upgrade.**
22. Requires QLogic v6.04.02 driver.
23. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
24. Requires QLogic driver v6.04.00 or above.
25. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
26. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
27. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
28. **Requires rev1 sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
29. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
30. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
31. **Single HBA zoning is required regardless of the switch being utilized.**

Clustered Host

Microsoft Windows 2000

Bull

Bull – Microsoft Windows 2000						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type
1	Express 5800 180Rb7	Microsoft Windows 2000: Advanced Server SP3[6], Datacenter SP2[6, 7], Datacenter SP3[6], Datacenter SP4, Server SP4	Microsoft MSCS[5]	HA: 4	Emulex LP8000-EMC[1, 2, 3, 4]	FC-AL, FC-SW

1. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
2. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
3. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
5. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
6. EMC strongly recommends that HBAs of different vendors not be used in the same host server
7. PowerPath not supported. ATF is supported.

1. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
2. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
   PowerPath not supported. ATF is supported.
   FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
5. For CX200 direct-connect only, boot from array for clusters not supported.
6. PowerPath supported. ATF/CDE not supported.
7. If using ATF/CDE, requires 2.1.6 or greater..
8. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
9. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
10. Supported on CX600, CX400, CX200 and FC4700-2 only.
11. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
    VxVM not supported.
    PowerPath 3.0 supported.
12. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
13. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
14. GAB disks (membership and service group heartbeat disks) are not supported.
15. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
16. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
17. **An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. PowerPath supported. ATF/CDE not supported.
5. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
6. GAB disks (membership and service group heartbeat disks) are not supported.
7. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
8. If using ATF/CDE, requires 2.1.6 or greater..
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
10. **Must use standard PCI 32bit/33MHz slot for SCSI**

1. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
2. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
3. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
4. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
5. PowerPath not supported. ATF is supported.
6. CX600 only.
7. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
8. Supported on CX600, CX400, CX200 and FC4700-2 only.
9. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
   VxVM not supported.
   PowerPath 3.0 supported
10. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
11. Requires QLogic driver v6.04.02 and BIOS v1.34.
12. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
13. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
14. GAB disks (membership and service group heartbeat disks) are not supported.
15. PowerPath supported. ATF/CDE not supported.
16. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
17. If using ATF/CDE, requires 2.1.6 or greater.
18. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
19. HP NetServer LC2000 is only supported with two processors.Uni-Processor configurations are not supported
20. Includes both Pentium PRO and XEON models
21. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0
    . VxVm not supported. PowerPath 3.0 supported.
22. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
23. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
24. BIOS must be obtained from HP at http://h18000 www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
25. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
26. BL20p (G2) is not supported in a direct attach cluster configuration w/ CLARiiON CX200.

1. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
2. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
3. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
4. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
5. GAB disks (membership and service group heartbeat disks) are not supported.
6. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
7. PowerPath supported. ATF/CDE not supported.
8. If using ATF/CDE, requires 2.1.6 or greater..
9. This HBA is equivalent to the qLogic QLA2310.
10. IBM xSeries Servers only.
11. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
12. Supported on CX600, CX400, CX200 and FC4700-2 only.
13. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
    VxVM not supported.
    PowerPath 3.0 supported.
14. This HBA is equivalent to the qLogic QLA2340.
15. For CX200 direct-connect only, boot from array for clusters not supported.
16. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
17. If using ATF/CDE, requires 2.1.6 or greater.
18. **Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.**

19. MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
20. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
21 EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
22. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

1. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
2. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
3. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
4. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
5. PowerPath not supported. ATF is supported.
6. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
7. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
8. FC4500, FC4700 only.
9. PowerPath supported. ATF/CDE not supported.
10. If using ATF/CDE, requires 2.1.6 or greater..
11. GAB disks (membership and service group heartbeat disks) are not supported.

Microsoft Windows 2003

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server
2. PowerPath is not supported.
3. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
4. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
5. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
6. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
7. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
8. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

IBM

IBM – Microsoft Windows 2003						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type
1	xSeries: X330, X335, X340 (4500R), X342, x230, x232, x235, x240, x250, **x255**, **x345**, x350 (6000R), **x360**, x370, x440, **x445**	Microsoft Windows 2003: DataCenter[2, 3, 4], Enterprise Edition (Advanced Server)[2, 3, 4], Standard Edition (Server)[2, 3, 4]	Microsoft MSCS	HA: 4	Emulex: LP8000-EMC[6], LP9002-E (LP9002L-E), LP9002DC-E, LP9802-E, LP9802DC-E, LP982-E; IBM: 19K1246(QLA2310)[1], 24P0960(QLA2340)[5]; QLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	FC-AL, FC-SW
2	**eServer BladeCenter HS20 (Model 8678)[10]**	**Microsoft Windows 2003: DataCenter[2, 3, 4], Enterprise Edition (Advanced Server)[2, 3, 4], Standard Edition (Server)[2, 3, 4]**	**Microsoft MSCS[7, 8, 9]**	HA: 4	**IBM HS20 FC Expansion card 48P7061[11]**	**FC-SW**

1. This HBA is equivalent to the qLogic QLA2310.
2. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
3. PowerPath is not supported.
4. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
5. This HBA is equivalent to the qLogic QLA2340.
6. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
7. **MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.**
8. **Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.**
9. **Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.**
10. **EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.**
11. **When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"**

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

2	AViiON: AV2300, AV3704R, AV8950	Microsoft Windows NT 4.0 SP6A[1]	Microsoft MSCS[2]	HA: 2	Emulex: LP8000-EMC[3, 4, 5, 7, 8], LP9002-E (LP9002L-E)[3, 4, 5], LP9802-E[3, 4, 5], LP9802DC-E[3, 4, 5], LP982-E[3, 4, 5] QLogic: QLA2310F-E-SP[3, 4, 5, 6], QLA2340-E-SP[3, 4, 5], QLA2342-E-SP[3, 4, 5]	FC-AL, FC-SW

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows NT Server 4.0 Enterprise Edition.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
5. FC-AL for FC4700 requires Base Software or Access Logix 8.42 xx or higher
6. If using ATF/CDE, requires 2.0.9 or greater
7. LP8000 no longer has removable GBICs for copper cable support.
8. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

1. Maximum number of NWFS volumes that can be mounted is 64
2. Powerpath & ATF supported.
3. Novell Storage Services supported.
4.

FC-AL for CX200 requires the following:
1) QLA2340 driver version 6.50v available at
http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.

5. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
6. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
7. Requires NetWare patches: NWPAPT2A and NSS5J.

1. Maximum number of NWFS volumes that can be mounted is 64.
2. **Powerpath & ATF supported.**
3. Novell Storage Services supported.
4. Requires NetWare patches: NWPAPT2A and NSS5J.
5. FC-AL for CX200 requires the following:
   1) QLA2340 driver version 6.50v available at
   http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
   2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
6. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
7. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
8. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
9. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
10. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
11. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
12. Includes both Pentium PRO and XEON models

1. Maximum number of NWFS volumes that can be mounted is 64.
2. Novell Storage Services supported.
3. Powerpath & ATF supported.
4. This HBA is equivalent to the qLogic QLA2340.
5. FC-AL for CX200 requires the following:
   1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
   2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
6. If using ATF/CDE, requires 2.1.6 or greater.
7. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Requires NetWare patches: NWPAPT2A and NSS5J.
9. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).

1. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
2. Requires QLogic driver v6.04.02 and BIOS v1.34
3. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
4. **Watchdog Timer should be disabled in ocmargs.ora**
5. **Supported with QLogic driver v6.04.02 or v6.05.00.**
6. **OCFS (Oracle Cluster File System) is not supported.**
7. Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
8. An RPM from Dell may be used to install the QLogic v6.X driver. RPM may be obtained from the QLogic website.
9. QLogic driver is available with Dell/Oracle CC kit.
10. Requires patch p2646914_9202_LINUX.zip (Private Network Fix)
11. Oracle Cluster File System v1.0 supported with Linux v2.4.9-E9 through E12.
12. requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
13. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
14. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
15. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
16. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
17. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
18. **PowerPath is not supported.**
19. Review single attach VxVM notes for PowerPath and DMP restrictions.
20. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
21. GAB disks (membership and service group heartbeat disks) are not supported.
22. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**

1. Oracle Cluster File System v1.0 supported with Linux v2.4.9-E9 through E12.
2. Requires QLogic driver v6.04.02 and BIOS v1.34
3. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
4. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
5. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
6. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs
7. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
9. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
10. Host must be offline for interfamily Symmetrix microcode upgrade.
11. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
12. **Supported with QLogic driver v6.04.02 or v6.05.00.**
13. **Watchdog Timer should be disabled in ocmargs.ora**
14. **OCFS (Oracle Cluster File System) is not supported.**
15. Includes both Pentium PRO and XEON models
16. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support)
17. Review single attach VxVM notes for PowerPath and DMP restrictions.
18. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above
19. GAB disks (membership and service group heartbeat disks) are not supported.
20. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**

IBM

IBM – Red Hat Linux						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type

1. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
2. This kernel is limited to 100 devices, not 128.
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
4. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
5. Single HBA zoning is required regardless of the switch being utilized.
6. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
7. Firmware 3.0.2a or later required.
8. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
9. **Supported with QLogic driver v6.04.02 or v6.05.00.**
10. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D
11. Firmware v2.5.1b or later required
12. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
13. See Switched Fabric Topology Parameters for switch firmware levels.
14. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.
15. FC-AL direct-connect or McData fabric connect only. Brocade fabric attach is not currently supported.
16. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
17. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
18. **FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.**

19. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
20. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
21. **Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.**
22. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**
23. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

1. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
3. Firmware 3.0.2a or later required.
4. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
5. Firmware v2.5.1b or later required
6. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware. 1 x L1 or 2 x L2 ports per quad only.
7. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
8. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
9. Requires rev1_sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
10. Supported with QLogic driver v6.04.02.
11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
12. See Switched Fabric Topology Parameters for switch firmware levels.
13. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
14. Requires QLogic driver v6.04.00 or above.
15. Requires QLogic v6.04.02 driver.
16. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
17. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
18. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
19. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
20. **Requires rev1 sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
21. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
22. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
3. Shipped with Navisphere Manager.Integrator supports HP Open view 6.1.Tivoli NetView 6.0b. and Unicenter TNG 2.2 and 2.4.
4. Powerpath supported on FC4500, FC5300, FC4700, CX600, CX400, and CX200.
   PowerPath Base supported on FC4500, CX200 only.
   CLARiiON and Symmetrix can co-exist in the SAN with the same server.
5. **Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.**
6. This HBA is equivalent to the qLogic QLA2340.

Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
13. **Requires QLogic v6.04.02 or v6.05.00 driver.**
14. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
15. **CLARiiON and Symmetrix can co-exist in the SAN with the same server.**
16. **PowerPath supported on FC4500, FC4700, CX600, CX400, and CX200.**
17. **PowerPath Base is supported on the FC4500 and CX200 only.**
18. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
19. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
20. **Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
21. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
22. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

CLARiiON CX600/400

Base Connectivity

Do not use a LUN in the CLARiiON DAE2-ATA as a host OS boot device.Do not use a LUN in the CLARiiON DAE2-ATA as a host OS boot device.Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN. EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.

DG DG/UX

DG

DG – DG DG/UX							
No	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	AViiON: AV25000, AV35000[11, 12], AV3750	PCI	DG DG/UX R4.20MU07[2, 3]	Emulex LP8000-EMC[13]	FC-AL, FC-SW	N	See[1]
2	AViiON: AV25000, AV35000[11, 12], AV3750	PCI	DG DG/UX R4.20MU07[2, 3]	Emulex LP8000-F1[4, 5, 6, 7]	FC-AL, FC-SW[8, 9, 10]	N	See[1]
3	AViiON: AV25000, AV35000[11, 12], AV3750	PCI	DG DG/UX R4.20MU07[3]	Emulex LP8000-EMC[13]	FC-SW[8, 9, 10]	N	

1. For more information see http://athena.europe.dg.com
2. The release notice for DG/UX (included with the software release at path: "/usr/release/dgux*.rn) lists supported platforms.
3. FC4700 is only supported on DG/UX 4.20 MU07.
   Maximum of 2 fabrics, each with a maximum of 4 switches.
   Maximum of 4 FC4700s per fabric.
   Maximum of 16 HBAs per fabric.
   Maximum of 32 HBAs per FC4700 SP.
   Maximum of 6 DG/UX servers per FC4700.
   Maximum of 4 HBAs per AV3750 server (2 per fabric).
   Maximum of 4 HBAs per NUMA block (2 per fabric in non-clustered environments).
   FA4500 may be mixed within the same fabric with FC4700 running Access Logix, but must be separately zoned.
4. Requires firmware 3.20x4 using the native driver.
5. FC-AL support requires LP8000 BIOS version DB1.60A7 and firmware version DS3.20x4.
6. Only the Brocade FC switch connection is supported. Connectrix FC switch is not supported.
7. DG/UX automatically loads the firmware and BIOS onto the Emulex HBA during boot-up as needed. Current DG/UX R4.20MU06 OS supported firmware is V3.20x1 and BIOS V1.4.
8. DS-8B or DS-16B switches only: qualified with firmware v2 1.4a, v2.2, and v2.3.
9. FC4700 clusters must use FC-SW mode and switches.
10. Support for FC4500, FC4700, and FC5300.
11. ClarAlert is available to support FC4700 on AViiONs. ClarAlert is not compatible with other AViiON management software on the Navisphere management workstation.
12. AViiON 25000/35000 servers are not supported for direct server connections to FC4700.
13. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

HPQ - HPQ HP-UX							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
82	HP 9000 rp7400[11, 63]	PCI	HPQ HP-UX 11i v1.0 (HP-UX 11.11)[3, 64]	HPQ A5158A[1, 7, 65]	FC-AL, FC-SW[12]	Y[15, 29, 54]	
83	HP 9000 rp8400	PCI	HPQ HP-UX: 11.0 ACE[3, 9] 11i v1.0 (HP-UX 11.11) Sept 2001[3]	HPQ A6795A[19, 20, 21, 23, 26, 27, 45, 46]	FC-AL, FC-SW[12]	N	

1. HP A5158A FC-SW software requirement: FC-AL and FC-SW requires the HP A5158A Tachlite PCI Fibre Channel Adapter. The A5158A FC-SW software fabric driver version "AP0301", for HP-UX 11i is now available for download from HP's software depot site, http://www.software.hp.com under "drivers" . It is referred to as the "hp pci tachyon tl fibre channel adapter", and requires the installation of dependent patch PHKL_22874 prior to installing the fabric driver, patches may be superceded or have co-dependencies as defined by HP.
2. rp7400 A5158A requires: HP-UX 11i minimum driver version B11.11.06 or higher HP-UX 11.0 minimum driver version B11.00.06 or higher. rp8400 A5158A requires: HP-UX 11i minimum driver version B11.11.06 or higher
3. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
4. Virtual Partitions (VPAR) is supported on the rp7405 server with 4.x and 5.x Symmetrix models. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.02.00 or later. Partition Manager B.11.11.01.05 or later. Online Diagnostic revision B.11.11.07.23 or later. server PDC firmware 4.0 or later.
5. **Virtual Partitions (VPAR) is supported on the rp7405/7410 server with 4.x and 5.x Symmetrix models and DMX Series. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.02.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 4.0 or later.**
6. HP-UX 11.00 minimum driver revision B.11.00.06.
   HP-UX 11i minimum driver revision B.11.11.06.
   HP-UX 10.20 minimum driver revision B.10.20.01.
7. FC-AL, FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
8. See Technical Bulletin T010820 for supported patch levels.
9. With HP-UX 11.0, a failed-over LUN is not automatically restored to its parent SP following LCC removal and replacement on an FC4702 array. After the LCC has powered back up, the LUN can be restored by deactivating and activating the associated volume group using the command 'vgchange -a'. During other types of failover (disabling/reenabling SP ports on switch, etc.), the LUN "is" automatically restored.
10. L-Class requires minimum PDC firmware 40.26 or higher
11. rp5405, rp5430, rp5470, rp7400: (PA-8700 processors): Initial support with HP-UX 11.0 Sept 2001, 11i Sept 2001.
12. Switched fabric (FC-SW) first supported on FC4500, requires Core Software 6.32.05 or higher, Navisphere Agent 4.3 or higher, and Access Logix enabled (data access control enabled).
13. Direct attach only
14. For HP/UX 10.20 Driver J3630BA is required for A3404A, A3591A/B, A3740A, A6684A and A6685A adapters.
15. QuickLoop only or direct attach only.
    Virtual Partitions (VPAR) is supported on the N-class/rp7400 server.
    VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
    Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 42.06 or later. Powerpath support on Virtual Partitions has to be RPQed at this time.
17. Requires PDC firmware rp7400 (PA-8700) requires PDC firmware 41.36.
18. For HP/UX 11.00, minimum driver revision B 11.00.06.
19. HP-UX driver requirements: HP-UX 11.0 : A6795A HP PCI Tachyon TL/XL2 Fibre Channel driver B.11.00.10 or later release which supports this HBA. HP-UX 11i : A6684A/A6685A/A5158A/A6795A HP Tachyon TL/XL2 Fibre Channel driver B.11.11.09 or later release which supports this HBA.
20. Supported with CX600, CX400, FC4700. FC4700-2 supports 1 and 2 Gb modes. Restrictions apply in boot environments.
21. HP-UX 11.0 ACE required patch: PHKL_23939
    HP-UX 11i required patch: PHKL_23626
    NOTE: These patches must be installed before installing the driver.
22. PDC firmware 15.5 or later
23. QuickLoop support: HP A5223A/AZ, HP A5224A/AZ using parameters outlined in connectivity table.
    The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
    QuickLoop is not supported with Brocade 3900/12000, or ED-12000B.
    Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.

    All switch ports participating in the Quickloop must be set to 1 GBit speed.
24. HP-UX driver requirements: HP-UX 11.0 : A6684A/A6685A/A5158A/A6795A HP PCI Tachyon TL/XL2 Fibre Channel driver B.11.00.10 or later release which supports this HBA.
25. Supported with CX600, CX400, FC4500 and FC4700. FC4700-2 supports both 1GB and 2GB modes. Restrictions apply in a boot environment.
26. Minimum driver version for SNIA HBA API support with HP-UX 11.0 is B.11.00.10. Minimum driver version for SNIA HBA API support with HP-UX 11.11 is B.11.11.09.
27. Supported with HP-UX 11i (64-bit only). FC4700-2 minimum code level 8.44.x1.
28. HP-UX 11.0 minimum driver revision B.11.00.06. HP-UX 11i driver revision B.11.11.06.
29. Boot initialization negotiation at 1 Gb mode for Brocade switches.
    FC-SW - HBA port on the switch must be locked as a "G" port and locked in auto-negotiation mode.
30. Qualified with only CX600, CX400. FC4500 and FC4700 with the switches listed in connectivity section, fabric or QuickLoop.
31. Required dependent FCMS patches are required (patches may be superceded or have co-dependencies as defined by HP): HP-UX 11.0, PHKL_21834 HP-UX 11i: PHKL_23626.NOTE: These patches must be installed before installing the driver, available at http://us-support2.external.hp.com, HSC Tachlite driver available at http://www.software.hp.com, under "drivers" and locate Fibre Channel HSC Tachlite adapter (A6684A or A6685A).For HP-UX 11i, the driver is under "hp tachyon tl fibre channel adapter" which enables support for A6684A/A6685A/A5158A.
32. NDU Release 11 or higher
33. Dx90, Rx90 servers support a maximum of 2 A6684A HBAs. The first must be installed in the turbo slot 10/12 and the second in any HSC slot.
34. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC Symmetrix devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set. No additional patches are required for this option in HP-UX 11.0, HP-UX 11.11 and forward, however in HP-UX 10.x the "N" flag option was introduced with the following patches are required to be installed or patches which supercede or replace these in order to configured the logical volumes residing on Symmetrix devices in this manner: For all HP/UX 10.xx versions install the following Bad Block Reallocation Patch Pair: 10.01: PHKL_11294, PHKL_11890, PHCO_11288 (patches may be superseded or have co-dependencies as defined by HP). 10.10: PHKL_11816, PHCO_11817 (patches may be superseded or have co-dependencies as defined by HP). 10.20: PHKL_11086, PHKL_11903, PHCO_10964 (patches may be superseded or have co-dependencies as defined by HP).
35. For HP/UX 11.00 minimum driver revision B.11.00.06.
    For HP/UX 11i minimum driver revision B.11.11.06.
36. QuickLoop support. HP A5223A/AZ, HP A5224A/AZ using parameters outlined in Table 112 on page 293.
    The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
    QuickLoop is not supported with Brocade 3200/3800/12000, DS-16B2 or ED-12000B
    Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.
37. FC-AL, FC-SW
38. PDC 40.26 or later
39. 1GBit Quickloop supported beginning at firmware release v3.0.2h. all switch ports participating in the Quickloop must be set to 1 GBit speed.
40. Virtual Partitions (VPAR) is supported on the L-class/rp5470 server.
    VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
    Requirements: Minimum VPAR product release of A.02.01.00 or later. Partition Manager B.11.11.01.05 or later. Online Diagnostic revision B.11.11.07.23 or later. server PDC firmware 41.02 or later.
41. PA-8700 processors: Initial support with HP-UX 11.0 Sept 2001, HP-UX 11i Sept 2001.
42. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
43. Virtual Partitions (VPAR) is supported on the rp8400 server with 4.x and 5.x Symmetrix models and DMX Series. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.01.00 or later. Partition Manager B.11.11.01.05 or later. Online Diagnostic revision B.11 11 07.23 or later. server PDC firmware 4.0 or later.
44. rp8400 requires minimum PDC firmware 13.10 or higher.
45. 1GBit Quickloop supported beginning at firmware release v3.0.3h. all switch ports participating in the Quickloop must be set to 1 GBit speed.
46. Virtual Partitions (VPAR) is supported on the rp8400 server with the Clarion CX600 and FC4700.
    FC-AL only support. Requires PDC 16.009 or later.

    VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
    Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later. Online Diagnostic revision B.11.11.07.23 or later.
47. Virtual Partitions (VPAR) is supported on the rp8400 server with the Clarion CX600 and FC4700.
    FC-AL only support. Requires PDC 16.009 or later.

    VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
    Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later. Online Diagnostic revision B.11.11.07.23 or
48. QuickLoop support: HP A5223A/AZ, HP A5224A/AZ using parameters outlined in connectivity table.
    The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
    QuickLoop is not supported with Brocade 3900/12000, or ED-12000B
    Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.
49. Qualified with only CX600, CX400. FC4500 and FC4700 with the switches listed connectivity table, fabric or QuickLoop.

50. **HP-UX 11.0 minimum driver revision B.11.00.06. HP-UX 11i minimum driver revision B.11.11.06.**
51. Requires minimum PDC firmware 42.10
52. N-Class: Arbitrated loop boot with PDC rev 40.04 or higher.Fabric boot with PDC rev 40.25 or higher.
53. See Technical Bulletin T010820 for LVM supported patch levels.
54. The Brocade (Brocade, EMC, or HP models) switch port the HBA involved in a FC-SW topology boot process or FC-SW topology dump process is attached to, is required to be locked as G port when the boot or dump volume resides on the Symmetrix. This can be accomplished by executing the "portCfgGport port_number,1" command from a telnet session on the Brocade switch.The boot device can not be located more than two hops from the initiator involved in the boot process.
55. The A6685A is not supported in slots 10/0 and 10/8 of the K570 and K580. In the K570 and K580, there are restrictions for the number of A6685A HBA cards supported when graphics cards are installed.
56. HP-UX 10.20 requires patches (patches may be superceded or have co-dependencies as defined by HP):
    PHKL_16751. PHKL_17590 . PHSS_23581
    NOTE: These patches must be installed before installing the driver. available at http://us-support2.external.hp.com. HSC Tachlite driver available at http://www.software.hp.com, under "drivers" and locate Fibre Channel HSC Tachlite adapter (A6684A or A6685A)
    Depending on the patch level of the system, the following patches may be required:
    PHKL_16957PHKL_21595PHCO_16591PHSS_20999
    PHKL_17858PHKL_21661PHCO_18563PHNE_19936
    PHKL_20611PHKL_23419PHCO_21186
    Installation instructions available at:
    http://www.software.hp.com/cgi-bin/swdepot_parser.cgi/cgi/displayProductInfo.pl?productNumber=A6685A&oper=install
57. Qualified with only CX600, CX400, FC4500 and FC4700 with the switches listed in connectivity table, fabric or QuickLoop.
58. Requires minimum PDC firmware 41.33.
59. **Symm 6 is qualified with: HP-UX 11.00 Support Plus Sept '02 bundle = QPK1100 Sept '02 & HWE1100 Sept '02**
60. FC-AL
61. FC-AL direct attach 2-Gbit boot using A6795A is not supported.
    FC-SW 2-Gbit boot and/or dump using A6795A requires Auto-Negotiation flag to be enabled on the switch port the HBA is attached to.
62. FC-AL direct attach boot support only at 1 Gb. Requires the boot device port to be configured for 1 Gb operation.
63. Virtual Partitions (VPAR) is supported on the N-class/rp7400 server.
    VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
    Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 42.06 or later
64. HP-UX 11.00 minimum driver revision B.11.00.06.
    HP-UX 11i minimum driver revision B.11.11.06.
65. HP-UX 11i minimum driver revision B.11.11.06.
66. HP-UX required patches: HP-UX 11.0 ACE: PHKL_23939, HP-UX 11i : PHKL_23626
67. Qualified on FC4500 and later. Requires Access Logix 6.32.11 (FC4500) or 8.42.5x (FC4700) or higher with data access control enabled and Navisphere Agent 5.2 or higher.
68. Requires minimum PDC firmware 32.2 and PDHC 7.3 or higher
69. HP A5158A FC-SW software requirements: FC-AL and FC-SW requires the HP A5158A Tachlite PCI Fibre Channel Adapter. The A5158A FCSW software fabric driver version "AP0301", for HP-UX 11i is now available for download from HP's software depot site, http://www.software.hp.com under "drivers". It is referred to as the "hp pci tachyon ti fibre channel adapter", and requires the installation of dependent patch PHKL_22874 prior to installing the fabric driver. patches may be superceded or have co-dependencies as defined by HP.
70. Requires minimum PDC firmware 42.09.
71. Fabric SAN boot supported.
72. Requires minimum PDC firmware 16.09 or higher
73. Excludes the rp5470 (PA-8700).
74. PDC firmware 41.39 or higher: Arbitrated Loop (direct attach) or FC-SW
75. Dx90, Rx90 require minimum PDC firmware 41.35 or higher.
76. Requires minimum PDC firmware 42.06.
77. QuickLoop support: HP A5223A/AZ, HP A5224A/AZ using parameters outlined in connectivity table.
    The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
    QuickLoop is not supported with Brocade 3200/3800/12000, DS-16B2 or ED-12000B.
    Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.

HPQ Tru64 UNIX

1. Supported on CX600, CX400 and FC4700-2 only.
2. KGPSA-CA/KGPSA-DA(FCA2354). Minimum firmware revision 3.81A4.
3. KGPSA-CA/KGPSA-DA(FCA2354): Latest firmware revision 3.82A1
4. Identical to KGPSA-DA.
5. **Tru64 V5.1B latest qualified Patch Kit 2 (T64V51BB22AS0002-20030415).**
6. **AlphaServer GS1280,ES80,ES47: Minimum Tru64 V5.1B with Patch Kit 1 (T64V51BB1AS0001-20021229)**
7. KGPSA-BC. Latest firmware revision 3.20X7.
8. KGPSA-BC: Minimum firmware revision 3.03A1
9. KGPSA-BC/KGPSA-CA supported ONLY.
10. KGPSA-CA and KGPSA-DA(FCA2354) only supported on this server.
11. Tru64 UNIX V5.1A minimum requirement for ES45.
12. Tru64 UNIX V5.1A minimum requirement for DS25.
13. **FCA2384(KGPSA-EA): Latest firmware revision 1.00X6**
14. **FCA2384(KGPSA-EA): Minimum firmware revision 1.00X2**

1. IBM 6227 and IBM 6228 adapters are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server.
   6227 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f7.rte ;
   6228 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f9.diag, devices.pci/df1000f9.rte
2. Requires minimum HBA firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx .
3. AIX 5.1-32/64 bit kernel supported. Requires CLArrayS3.5.1 fileset support.
4. Includes support for FC4700, FC4700-2, CX600, CX400.
5. FC-SW and FC-AL are supported on the same server.
6. **Do not use a LUN in the CLARiiON DAE2-ATA as a host OS boot device.**
7. **System/Service processor combined microcode Version 20020920 dated 11/19/2002 or later.**
8. **Minimum Powerpath version 3.0.2. For Powerpath patches 3.0.x, the bootfix.sh script is required for boot support. See the EMC Primus case ID emc58938 for more details and the PowerPath Release Notes for installation**

9. **AIX 5.1 ML1, APAR IY21957 or higher.**
10. **For Powerpath version 3.0.3, minimum CLArray S3.5.1.0.6 version is required.**
11. **Fibre boot when used under AIX 5.1 requires APAR IY40885 which can be obtained from IBM at https://techsupport.services.ibm.com/server/fixes?view=pSeries.**
12. **System microcode CL020407 or later.**
13. **System/Service processor combined microcode Version SST01256/SS010614 dated 10/23/2001 or later.**
14. **System microcode MM020407 or later.**
15. **System microcode CM020407 or later.**
16. **System/Service processor combined microcode Version SPH02254/sh020307 dated 11/20/2002 or later.**
17. **System/Service processor combined microcode Version RH020413 dated 05/22/2002 or later.**
18. **System/Service processor combined microcode Version CLT02066/ct020307 dated 04/04/2002 or later.**
19. **System/Service processor microcode Version RK021120 dated 12/11/2002 or later.**
20. IBM Native Fibre Channel drivers with feature code 6227 and with feature code 6228 are supported on the same server. Feature 6228 and 6239 are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server. 6227 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte; 6228 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f9.diag, devices.pci.df1000f9.rte; 6239 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1080f9.diag, devices.pci.df1080f9.rte
21. Requires AIX 5.1 with minimum maintenance level 03 APAR IY32749.
22. Requires adapter firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx.
23. AIX 5.1 supported only with 32-bit kernel.
24. IBM 6227 and IBM 6228 adapters are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server. 6227 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f7.rte ; 6228 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f9.diag, devices.pci/df1000f9.rte
25. Requires adapter firmware 3.22A1, CLArrayS3.4.3.0.x fileset support. Supports FC4700 with minimum Flare code 8.46.xx .
26. The following link provides detailed data for all 9076-SP2 models and feature codes: http://www1.ibmlink.ibm.com/cgi-bin/master?request=salesmanual&parms=SMS&xh=NTZH*daEMSRi4n1USenGnN9332&xhi=usa.main%7Csalesmanual%5E&type=D&search=9076&title=T&product
27. Requires minimum AIX 5.1 maintenance level 02.
28. **System/Service processor combined microcode Version RR020822 dated 09/19/2002 or later.**
29. **Minimum AIX 4.3.3 ML9, APAR IY22024**
30. **For Powerpath version 3.0.3, minimum CLArray S3.4.3.0.8 version is required.**
31. **Fibre boot when used under AIX 4.3 requires APAR IY42989 which can be obtained from IBM at https://techsupport.services.ibm.com/server/fixes?view=pSeries.**
32. **System/Service processor combined microcode Version NAN02066/SC020308 dated 03/29/2002 or later.**
33. Requires adapter firmware 3.22A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum flare code 8.46.xx.
34. Requires minimum HBA firmware 3.82A1, CLArrayS3.4.3.0.x fileset support. Supports FC4700 with minimum Flare code 8.46.xx .
35. **System/Service processor combined microcode Version L02113/ag010611 or later.**
36. **Requires minimum HBA firmware 3.82A1. For all PCI-based hosts only: see HBA placement guidelines in the IBM document PCI Adapter Placement Reference SA38-0538-6, available at http://www-1.ibm.com/servers/eserver/pseries/library/hardware_docs/sa38/380538.pdf**
37. **Requires CLArrayS3.5.2.0.6**
38. **Fibre boot when used under AIX 5.2 requires APAR IY41028 which can be obtained from IBM at https://techsupport.services.ibm.com/server/fixes?view=pSeries.**
39. **System/Service processor combined microcode Version RK030206 dated 03/31/2003 or later.**
40. **Minimum microcode levels RH0 20413 dated 05/22/2002 or later.**
41. Requires minimum HBA firmware 1.00X5.
42. Requires AIX 5.1 with minimum maintenance level 04 APAR IY44478.
43. Requires AIX 5.2 with minimum maintenance level 01 APAR IY44479.

Microsoft Windows 2000

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

Bull

Bull – Microsoft Windows 2000

No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	**Express 5800: 320La, 320La-R, 320Lb, 320Lb-R, 330Ma-R, 330Mb-R, 340Ha-R**	PCI	**Microsoft Windows 2000 Advanced Server: SP2[3, 7, 8], SP3[3, 7, 8]**	**QLogic QLA2310F-E-SP[5, 6]**	FC-AL, FC-SW	N	**See[4]**

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. Windows 2000 Professional is supported as the management workstation.
5. **Qlogic SANSurfer/SANBlade Manager is not supported.**
6. **Requires driver 8.2.1.20, and bios 1.33 for Stratus ftServers. Supports SNIA HBA API. Available at http://www.qlogic.com.**
7. **Refer to the Stratus, Bull or NEC documentation for hardware, software and non-storage related setup and configuration.**
8. **FC-AL supported for direct attach only. No support for hubs or Quickloop at this time.**

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
5. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
6. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
7. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
9. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
10. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
11. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
12. Supports PowerPath 3.0 or greater.
13. No MirrorView or SnapView used on boot LUNs.
14. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
15. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
16. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
17. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
18. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
19. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
20. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
21. **PowerPath supported. ATF/CDE not supported.**
22. **If using ATF/CDE, requires 2.1.6 or greater.**
23. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
24. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
25. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
5. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
6. **If using ATF/CDE, requires 2.1.6 or greater.**
7. **PowerPath supported. ATF/CDE not supported.**
8. EMC strongly recommends that HBAs of different vendors not be used in the same host server
9. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
10. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
11. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
12. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
13. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
14. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
15. Supports PowerPath 3.0 or greater.
16. No MirrorView or SnapView used on boot LUNs.
17. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
18. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
19. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
20. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
21. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
22. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
23. Not supported with Emulex LP8000-EMC HBA.
24. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
25. Supported on CX600, CX400, CX200 and FC4700-2 only.
26. PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.
27. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
28. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com

29 Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

1. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
2. The LP9002-E now ships with the LP9002L-E low profile adapter.
3. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
4. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
5. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
6. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
7. Symmetrix 8000 Series: 66/67 support at Windows 2000 SP1, SP2 and SP3 5568 support at Windows 2000 SP1, SP2 and SP3.
   Must use standard PCI 32bit/33MHz slot for SCSI
   CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
8. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
11. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
12. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
13. Windows 2000 Professional is supported as the management workstation.
14. CX200 available through selected channels.
15. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
16. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
   Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
3. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
4. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
5. Supports PowerPath 3.0 or greater.
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group.
   Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
11. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
12. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
13. **PowerPath supported. ATF/CDE not supported.**
14. **If using ATF/CDE, requires 2.1.6 or greater.**
15. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
16. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
17. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
18. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
19. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
20. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
21. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
22. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
23. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
24. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
25. Includes both Pentium PRO and XEON models
26. The LP9002-E now ships with the LP9002L-E low profile adapter.
27. Requires minimum BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
28. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
29. BIOS for the BL20p mezzanine card must be obtained from HP. Cannot use BIOS from Qlogic web site. EMC NVRAM settings must be configured manually. Refer to page 2-6 of the Readme document "EMC Fibre Channel with QLogic Host Bus Adapters in the Windows NT/Windows 2000 Environment" found at http://www.qlogic.com for the settings.
30. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
31. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
    BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
32. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
33. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
34. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
35. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

19.731

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. This HBA is equivalent to the qLogic QLA2310.
3. Windows 2000 Professional is supported as the management workstation.
4. CX200 available through selected channels.
5. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
6. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
7. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
8. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
9. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3 3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
10. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
11. This HBA is equivalent to the qLogic QLA2340.
12. PowerPath supported. ATF/CDE not supported.
13. For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: http://www-3.ibm.com/pc/support/site.wss/document.do?lndocid=MIGR-39723
14. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
15. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.
16. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
17. Supports PowerPath 3.0 or greater.
18. No MirrorView or SnapView used on boot LUNs.
19. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
20. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
21. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
22. MSCS cluster configurations are supported with CX600, CX400 and FC4700
23. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
24. This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
25. The LP9002-E now ships with the LP9002L-E low profile adapter
26. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
27. **If using ATF/CDE, requires 2.0.9 or greater.**
28. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
29. **If using ATF/CDE, requires 2.1.6 or greater.**
30. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
31. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
32. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
33. **When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"**

    This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
34. **This server has a built-in FC-SW and must be direct-attached to the external storage.**
35. **Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.**
36. **IBM BIOS 1.34, EMC Approved Qlogic Driver Version 8.2.2.25. Available at http://www.qlogic.com.**
37. **EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.**
38. **IBM HS20 Fibre Channel Expansion Card (48P7061)**
39. **Booting Windows 2000 systems through ISLs (inter-switch links) in heterogenous fabrics is not currently supported.**
40. **Booting Windows 2000 systems through ISLs (inter-switch links) via homogeneous fabrics is supported with a maximum of 2 hops.**
41. **MSCS cluster configurations are supported. PowerPath 3.0 or greater required.**
42. **Host must be offline for interfamily Symmetrix microcode upgrade.**
43. **Symmetrix 8000 Series: 66/67 support at Windows 2000 SP1, SP2 and SP3 5568 support at Windows 2000 SP1, SP2 and SP3.**

1. Windows 2000 Professional is supported as the management workstation.
2. **Qlogic SANSurfer/SANBlade Manager is not supported.**
3. **Requires driver 8.2.1.20, and bios 1.33 for Stratus ftServers. Supports SNIA HBA API. Available at http://www.qlogic.com.**
4. **Refer to the Stratus, Bull or NEC documentation for hardware, software and non-storage related setup and configuration.**
5. **EMC strongly recommends that HBAs of different vendors not be used in the same host server.**
6. **FC-AL supported for direct attach only. No support for hubs or Quickloop at this time.**

SUPERMICRO

SUPERMICRO – Microsoft Windows 2000							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	Super P3TDL3[17]	PCI	Microsoft Windows 2000 Advanced Server: SP2[13], SP3[13], SP4; Microsoft Windows 2000: Datacenter SP4, Server SP2[13], Server SP3[13], Server SP4	Emulex LP850-EMC[18]	FC-AL, FC-SW	N	See[1, 2]
2	Super: P3TDL3[17], S2DL3[17]	PCI	Microsoft Windows 2000 Advanced Server: SP2[13], SP3[13], SP4; Microsoft Windows 2000: Datacenter SP4, Server SP2[13], Server SP3[13], Server SP4	Emulex: LP8000-EMC[18, 24], LP9002-E (LP9002L-E)[18, 22, 23], LP9002DC-E[16, 22, 25, 26], LP9802-E[14, 15, 16], LP9802DC-E[14, 15, 16], LP982-E[14, 15, 16, 22]; QLogic: QLA2310F-E-SP[20, 21], QLA2340-E-SP[19, 20], QLA2342-E-SP[19, 20]	FC-AL, FC-SW	Y[3, 4, 5, 6, 7, 8, 9, 10, 11, 12]	See[1, 2]

1. Windows 2000 Professional is supported as the management workstation.
2. CX200 available through selected channels.
3. Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
4. If using ATF/CDE with Emulex, requires v2.1.5 or greater. Only Emulex driver 2.11a2 is supported with ATF.

5. If using ATF/CDE with QLogic, requires v2.1.6 or greater.
6. Supports PowerPath 3.0 or greater
7. No MirrorView or SnapView used on boot LUNs.
8. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
9. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
10. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
11. MSCS cluster configurations are supported with CX600, CX400 and FC4700.
12. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
13. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
14. CLARiiON CX200 NOTE. Requires 1.00x3 for direct-connect configurations only.
15. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
16. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
17. 64-bit slots for 3.3v HBAs only.
18. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
19. **PowerPath supported. ATF/CDE not supported.**
20. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
21. **If using ATF/CDE, requires 2.1.6 or greater.**
22. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
23. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
24. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
25. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
    NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
26. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

Stratus

Stratus – Microsoft Windows 2000							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments

1 CX600 only.
2. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
3. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
4. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
5. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
6. **Requires driver 8.2.2.25, and bios 1.34. Supports SNIA HBA API. Available at http://www.qlogic.com.**
7. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
8. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. ATF/CDE is not supported with driver 2.20a12. For ATF/CDE, use driver version 2.11a2. Supports SNIA HBA API. Emulex drivers are available at http://www.emulex.com. NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC. Supports SNIA HBA API.
9. The LP9002-E now ships with the LP9002L-E low profile adapter.
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. Windows 2000 Professional is supported as the management workstation.
12. CX200 available through selected channels.
13. PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.
14. **If using ATF/CDE, requires 2.1.6 or greater.**
15. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.
16. Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.62a1. Emulex drivers are available at http://www.emulex.com. For Unisys servers, use driver 2.11a2 and firmware 3.90a7 available at http://www.support.unisys.com. Supports SNIA HBA API.
NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

Microsoft Windows 2003

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. Requires STORPort driver version 1.00a15, and firmware 3.90a7. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb:[LN];817789
2. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. PowerPath is not supported.
5. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
6. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb:[LN];817789
7. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
8. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
9. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
10. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
11. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
12. Requires STORPort driver version 1.00a15, and firmware 1.00a4. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb:[LN];817789

1. Requires STORPort driver version 1.00a15, and firmware 3.90a7. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb:[LN];817789

2. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
3. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
4. PowerPath is not supported.
5. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
6. This HBA is equivalent to the qLogic QLA2340.
7. This HBA is equivalent to the qLogic QLA2310
8. PowerPath supported. ATF/CDE not supported.
9. Requires STORPort driver version 1.00a15, and firmware 1.00a4. Available at http://www.emulex.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. **IBM HS20 Fibre Channel Expansion Card (48P7061)**
12. **Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.**
13. **This server has a built-in FC-SW and must be direct-attached to the external storage.**
14. **IBM BIOS 1.34, EMC Approved Qlogic STORPort Driver Version 8.2.2.20. Available at http://www.qlogic.com.**
15. **When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"**

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

16. **EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.**

Microsoft Windows NT

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash during booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual

memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server
2. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
3. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
4. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
5. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
6. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
7. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
8. If using ATF/CDE, requires 2.0.9 or greater.
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

11	PowerEdge: 1750, 2650, 4600, 6650	PCI-X	Microsoft Windows NT 4.0 SP6A[3]	Emulex: LP9002-E (LP9002L-E)[1, 7], LP9802-E[6, 7, 8], LP9802DC-E[6, 7, 8], LP982-E[6, 8]	FC-AL, FC-SW	Y
12	PowerEdge 6600	PCI-X	Microsoft Windows NT 4.0 SP6A[3]	Emulex LP982-E[6, 7, 8]	FC-AL, FC-SW[12]	Y

1. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com
2. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
5. If using ATF/CDE, requires 2.0.9 or greater.
6. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
7. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
8. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
9. Dell PowerEdge supports a maximum of 2 Emulex HBAs at one time and the total power cannot exceed 20 Watts.
10. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
11. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
12. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
13. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
3. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
4. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
5. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
6. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
7. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
8. Requires BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
9. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
10. Includes both Pentium PRO and XEON models
11. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
12. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
13. If using ATF/CDE, requires 2.0.9 or greater.
14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. Requires driver 8.1.5.21, and bios 1.34. Available at http://www.qlogic.com. Supports SNIA HBA API.
3. This HBA is equivalent to the qLogic QLA2310.
4. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
5. For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: http://www-3.ibm.com/pc/support/site.wss/document.do?lndocid=MIGR-39723
6. It is recommended that the QLogic QLA2340 is not installed in Slot 1.
7. CLARiiON CX200 NOTE: Requires 1.00x3 for direct-connect configurations only.
8. Requires driver 2.20a12, firmware 1.00a4, and bios 1.62a1. Supports SNIA HBA API. Drivers available at http://www.emulex.com.
9. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
10. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. ATF/CDE not supported with driver 2.20a12. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at http://www.emulex.com.
11. This HBA is equivalent to the qLogic QLA2340.
12. If using ATF/CDE, requires 2.0.9 or greater.
13. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
15. The LP9002-E now ships with the LP9002L-E low profile adapter.
16. PowerPath supported. ATF/CDE not supported.
17. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.

Edit config.sys with the following: Files=100 Buffers=99
When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditons exist where several LUNs are initially created and you perform your first install. NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.

3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. Requires NetWare patches: NWPAPT2A and NSS5J
5. Novell Storage Services supported.
6. Powerpath & ATF supported.
7. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
8. Remote boot not supported with PERC controllers enabled in system BIOS.
9. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
10. No MirrorView or SnapView used on boot LUNs.
11. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability
12. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
13. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
14. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
15. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT C: partition will.
16. PowerPath and ATF supported.
17. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
18. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
19. Driver installation with NetWare 5.0 SP6A: Do not load cpqnmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc> Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot
20. Symmetrix 8000 Series. 66/67 support at NetWare 5.x, 5568 support at Netware 5.1.
21. Maximum number of NWFS volumes that can be mounted is 64.
22. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
23. Symmetrix 8000 Series: 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1.
24. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
25. DOS boot device maximum accessible capacity is 2GB. Netware SYS volume must be in LUN 0.
26. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
27. Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)

28. PowerPath supported. ATF/CDE not supported.
29. Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
30. This HBA is equivalent to the qLogic QLA2340.
31. QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.
32. This HBA is equivalent to the qLogic QLA2310.
33. (QLA2200) For IBM xSeries and Netfinity servers only.
34. Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.
35. For ATF on Pre CX series, Multipath support or connections to the secondary port are not supported at this time. One path per SP, 2 HBAs per host.
36. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
37. CX200 available through selected channels.
38. Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.
39. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
40. Requires HBA firmware revision 1.83 and HBA driver revision 6.50v, available at http://www.qlogic.com
Requires SP4 or higher for NetWare 5.00.
41. Requires HBA bios 1.83 and driver 6.50v.
42. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts
43. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
44. Requires NWPA.NLM V.3.07A update from Novell website.
45. Requires driver version 2.02e and firmware 3.90a7.
46. PowerPath not currently supported.
47. Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.

1. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
2. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
3. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
4. Maximum number of NWFS volumes that can be mounted is 64.
5. Must use standard PCI 32bit/33MHz slot for SCSI
6. Requires NWPA.NLM V.3.07A update from Novell website.

7. Symmetrix 8000 Series: 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1.
8. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
9. PCI–X servers must use single 5 volt PCI slot for Adaptec 2944 family.
10. Edit config.sys with the following: Files=100 Buffers=99
11. When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditons exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
12. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
13. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
14. Requires driver version 2.02e and firmware 3.90a7.
15. PowerPath not currently supported.
16. Symmetrix 8000 Series: 66/67 support at NetWare 5.x, 5568 support at Netware 5.1.

1. Edit config.sys with the following: Files=100 Buffers=99
2. When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditons exist where several LUNs are initially created and you perform your first install. NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. Novell Storage Services supported.
5. Powerpath & ATF supported.
6. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
7. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
8. No MirrorView or SnapView used on boot LUNs.
9. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
10. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
11. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
12. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
13. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will
14. PowerPath and ATF supported.
15. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
16. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
17. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
18. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
19. Maximum number of NWFS volumes that can be mounted is 64.
20. Requires NetWare patches: NWPAPT2A and NSS5J.
21. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
22. **Requires HBA bios 1.83 and driver 6.50v.**
23. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
24. PowerPath supported. ATF/CDE not supported.
25. Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
26. Symmetrix 8000 Series: 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1
27. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
28. **Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.**
29. Symmetrix 8000 Series: 66/67 support at NetWare 5.x, 5568 support at Netware 5.1.
30. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
31. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
32. Includes both Pentium PRO and XEON models
33. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
34. **Requires NWPA.NLM V.3.07A update from Novell website.**
35. **NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
36. **Requires driver version 2.02e and firmware 3.90a7.**
37. **PowerPath not currently supported.**
38. **Requires driver version 2.20a12, firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**
39. **CX200 available through selected channels.**
40. **Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.**
41. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**

1. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
2. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
3. **(QLA2200) For IBM xSeries and Netfinity servers only.**
4. **Requires HBA bios 1.83 and driver 6.50v. Driver and documentation available from www.qlogic.com.**
5. Maximum number of NWFS volumes that can be mounted is 64.
6. Support for CX600, CX400, CX200, FC4500, FC4700, and FC5300 (FC5300 requires copper to Fibre transceiver.)
7. FC-SW applies only to CX600, CX400, CX200, FC4500 FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Requires NetWare patches: NWPAPT2A and NSS5J.
9. Novell Storage Services supported.
10. Powerpath & ATF supported.
11. FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
12. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
13. No MirrorView or SnapView used on boot LUNs.
14. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
15. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
16. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
17. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
18. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT C: partition will.
19. PowerPath and ATF supported.
20. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
21. **Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.**
22. Requires driver 6.50v and BIOS 1.34. Driver and documentation available from www.qlogic.com
23. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
24. Edit config.sys with the following: Files=100 Buffers=99
25. When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of boot servers have been reached. Conditions exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs
26. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
27. PowerPath supported. ATF/CDE not supported.
28. Symmetrix 8000 Series: 66/67 support at NetWare 5.x, 5568 support at Netware 5.1.
29. Symmetrix 8000 Series: 66/67 support at NetWare 4.11, 5.x, 5568 support at Netware 5.1.
30. **This HBA is equivalent to the qLogic QLA2310.**
31. **Host must be offline for interfamily Symmetrix microcode upgrade.**
32. **This HBA is equivalent to the qLogic QLA2340.**

33. **Requires driver 6.50v, BIOS 1.34 available from Qlogic.**
34. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
35. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
36. This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
37. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD
38. **Requires NWPA.NLM V.3.07A update from Novell website.**
39. **NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
40. **Requires driver version 2.02e and firmware 3.90a7.**
41. **PowerPath not currently supported.**
42. **Requires driver version 2.20a12. firmware version 3.90a7, and BIOS 1.62a1. Supports SNIA HBA API. Available at http://www.emulex.com.**
43. **Requires HBA bios 1.83 and driver 6.50v.**
44. **CX200 available through selected channels.**
45. **Optical cables apply to CX600, CX400, CX200, FC4500 and FC4700.**
46. **Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.**

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
   Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
   Requires v6.2.1 or higher Navisphere host agent/CLI.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group.
   Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
12. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
13. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
14. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
15. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
16. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
17. This kernel is limited to 110 devices, not 128.
18. **Supported with QLogic driver v6.04.02 or v6.05.00.**
19. Requires QLogic driver 4.47.18 and BIOS 1.83.
20. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
21. Requires v6.0.5 or higher Navisphere host Agent/CLI.
22. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
23. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
24. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
25. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
26. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
    Booting from EMC storage arrays is NOT supported with PowerPath.
27. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
28. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
29. **Single HBA zoning is required regardless of the switch being utilized.**
30. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.**

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
2. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7.

EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.

8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
12. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
13. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
14. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
15. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
16. Supported with QLogic driver v6.04.02 or v6.05.00.
17. Requires v6.0.5 or higher Navisphere host Agent/CLI.
18. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
19. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
20. **An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
21. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
22. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
23. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
24. This kernel is limited to 110 devices, not 128
25. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
26. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
27. Requires QLogic driver 4.47.18 and BIOS 1.83.
28. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
29. **Requires v6.05 or higher Navisphere host agent/CLI.**
30. This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
31. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
32. **Single HBA zoning is required regardless of the switch being utilized.**
33. **Host must be offline for interfamily Symmetrix microcode upgrade.**
34. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
35. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.

Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
2. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
   Access Logic required, direct connect or fabric. (no booting through switch inter-switch links)
   No MirrorView or SnapView used on boot LUNs
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group.
   Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
12. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
13. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
14. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
15. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
16. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
17. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
18. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
19. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
    Booting from EMC storage arrays is NOT supported with PowerPath.
20. Includes both Pentium PRO and XEON models
21. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
22. **Supported with QLogic driver v6.04.02 or v6.05.00.**
23. Requires v6.0.5 or higher Navisphere host Agent/CLI
24. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
25. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
26. This kernel is limited to 110 devices, not 128.
27. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
28. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
29. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
30. This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
31. Requires QLogic driver 4.47.18 and BIOS 1.83.
32. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
33. **Single HBA zoning is required regardless of the switch being utilized.**
34. **Host must be offline for interfamily Symmetrix microcode upgrade.**

35. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.**
36. **The kernel version listed is included in the corresponding standard distributed release.**
37. **For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.**
38. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable)
39. PowerPath v3.02 not supported on this system.
40. **Requires v6.05 or higher Navisphere host agent/CLI.**
41. **This HBA is equivalent to the qLogic QLA2340.**
42. **This HBA is equivalent to the qLogic QLA2310.**
43. **(QLA2200) For IBM xSeries and Netfinity servers only.**
44. **Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.**
45. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
46. Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
47. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
48. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
49. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
50. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
51. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

1. Requires v6.2.1 or higher Navisphere host agent/CLI.
2. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
3. No MirrorView or SnapView used on boot LUNs.
4. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
5. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
6. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
7. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
8. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
9. (QLA2200) For IBM xSeries and Netfinity servers only.
10. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
11. **Host must be offline for interfamily Symmetrix microcode upgrade.**
12. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
13. **This HBA is equivalent to the qLogic QLA2340.**
14. PowerPath v3.02 not supported on this system
15. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
16. This HBA is equivalent to the qLogic QLA2310.
17. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
18. Supported with QLogic driver v6.04.02 or v6 05.00.
19. Requires v6.0.5 or higher Navisphere host Agent/CLI.
20. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
21. This server only supports 5 Volt HBAs. qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
22. This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
23. PowerPath v3.0.2 b069 is not supported on this system.
24. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
25. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
26. This kernel is limited to 110 devices, not 128.
27. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
28. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
29. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
30. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. Requires QLogic driver 4.47 18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65

32. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
33. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
34. **Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.**
35. **For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.**
36. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
37. **The kernel version listed is included in the corresponding standard distributed release.**
38. Requires QLogic driver 4.47.18 and BIOS 1.83.
39. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
40. Single HBA zoning is required regardless of the switch being utilized.
41. Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.
42. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
43. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
44. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
45. **This HBA is equivalent to the QLogic QLA2200.**

1. Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.
2. Requires Emulex driver 4.20Q driver disk and BIOS 1.61a1 available from http://www.emulex.com/ts/docoem/framemc.htm
3. Requires v6.2.1 or higher Navisphere host agent/CLI.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric. (no booting through switch inter–switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
8. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
12. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
13. Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
14. Requires QLogic driver 4.47.18 driver disk, dd.img–i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
15. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
16. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
17. This kernel is limited to 110 devices, not 128.
18. **Supported with QLogic driver v6.04.02 or v6.05.00.**
19. Requires Emulex drivers v4.20Q and firmware v3.90a7. Available from http://www.emulex.com.
20. FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
21. FC–SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC–SW available from selected channels.
22. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
23. Requires v6.0.5 or higher Navisphere host Agent/CLI.
24. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
25. Requires QLogic driver 4.47.18 and BIOS 1.83.
26. Install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
27. **Requires driver 2.20a12, firmware 3.90a7, and BIOS 1.63a1. Emulex drivers are available at http://www.emulex.com. Supports SNIA HBA API.**
28. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
29. **Single HBA zoning is required regardless of the switch being utilized.**
30. **Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. **Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
32. **Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC–approved driver after installation.**

1. Uses native HBA driver and firmware
2. RPQ only.
3. FC–AL and FC–SW can run concurrently on separate HBAs on the same Host.
4. PCI–FC–1P–OPT–B supports a data rate of 2 Gb/sec.
5. CX600, CX400, and FC4700 do not require a MIA and are both FC–AL and FC–SW.
6. A MIA is required for FC5500
7. No support for CX600, CX400, and FC4700.
8. FC5500 and Origin 2000 only.

1. Requires rev2_sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
3. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
4. **An RPM from Dell may be used to install the QLogic v6.04.02 or v6.05.00 drivers and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
5. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
6. Supported with QLogic driver v6.04.02.
7. Requires rev1_sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
8. Requires v6.2.1 or higher Navisphere host agent/CLI.
9. **PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.**
10. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
11. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
12. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
13. Requires QLogic driver v6.04.00 or above.
14. Requires rev3_sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
15. Requires QLogic v6.04.02 driver.
16. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
17. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
18. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
19. **Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
20. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
21. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
    Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65

1. Linux v2.4.x Kernels support a maximum of 128 devices per system.
2. Requires rev2. sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
3. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
4. Includes both Pentium PRO and XEON models
5. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
6. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
7. Supported with QLogic driver v6.04.02.
8. Requires rev1_sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
9. Requires v6.2.1 or higher Navisphere host agent/CLI.
10. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
11. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
12. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
13. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
14. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
15. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
16. **Host must be offline for interfamily Symmetrix microcode upgrade.**
17. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
18. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**

19. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
20. Requires QLogic driver v6.04.00 or above.
21. Requires QLogic v6.04.02 driver.
22. Requires rev3 sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
23. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
24. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
25. **Requires rev1 sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
26. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
27. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

1. Supported with QLogic driver v6.04.02.
2. Requires v6.2.1 or higher Navisphere host agent/CLI.
3. Requires rev1 sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
4. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
5. **This HBA is equivalent to the qLogic QLA2340.**
6. **Requires QLogic driver v6.04.02 or v6.05.00and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
7. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
8. **This HBA is equivalent to the qLogic QLA2310.**
9. (QLA2200) For IBM xSeries and Netfinity servers only.
10. This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
11. Requires rev2 sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
12. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
13. Requires driver 8.1.5.20, and bios 1.79. Available at http://www.qlogic.com. Supports SNIA HBA API.
14. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
15. **The kernel version listed is included in the corresponding standard distributed release.**
16. Linux v2.4.x Kernels support a maximum of 128 devices per system.
17. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**
18. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
19. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
20. **Requires QLogic driver v6.04.02 or v6.05.00 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
21. **Host must be offline for interfamily Symmetrix microcode upgrade.**
22. Requires QLogic v6.04.02 driver
23. Requires rev3_sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
24. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
25. Requires QLogic driver v6.04.00 or above
26. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
27. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
28. **Requires rev1 sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
29. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
30. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
31. **Single HBA zoning is required regardless of the switch being utilized.**

Sun – Sun Solaris							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
30	**Sun Fire 15K**	PCI	**Sun Solaris: 8[11, 12], 9[20]**	**Emulex: LP9002-E (LP9002L-E)[8, 9, 10, 22], LP9802-E[8, 10, 21]**	FC-AL[13] FC-SW[15, 16]	N	**See[1, 2, 3]**

1. Optical cables apply to CX600, CX400, FC4500 and FC4700.
2. Sun "clone" hosts are not supported
3. Veritas DMP coexistence with EMC CLARiiON failover packages:
   VERITAS DMP can be enabled and coexist on the same host with ATF or PowerPath. VERITAS Volume Manager 3.5 is the curently recommended version.
   VERITAS DMP, as part of Volume Manager 3.2, can be used to manage CLARiiON arrays without ATF or PowerPath by using CLR-ASL.
4. Emulex LP8000-EMC/LP9002-E/LP9002L-E/LP9002DC-E/LP9802-E requires fcode 1.33a1 Emulex LP9002S-E requires fcode 2.33a0.
5. Requires at least Rev 03 of LP8000-N1 HBA (part # 118031355-03)
6. PCI Boot support is from 1 or 2 servers for FC-AL and from 1 to 4 servers for FC-SW.
7. Note: Boot with DS-8B/DS-16B switches using 2.2.1a or 2.3 switch firmware requires HBA fcode v1.12a1 or higher.
8. See the EMC price book for HBA vendor ordering information. This HBA is not sold by EMC.
9. Requires driver lpfc-SPARC V5.01e. Emulex LP8000-EMC/LP9002-E/LP9002L-E/LP9002C-E/LP9002DC-E/LP9002S-E requires firm-ware 3.90A7, LP9802-E requires firmware 1.00A4, all available at http://www.emulex.com. Supports SNIA HBA API.
10. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
11. **EMC required Sun patches for Solaris 8:**
    108528-21 SunOS 5.8: kernel update patch.
    108974-30 SunOS 5.8: data, uata, dad, sd, and scsi patch.
    109657-09 SunOS 5.8: isp driver patch (for X1062A and X1065A HBAs only).
    109885-12 SunOS 5.8: glm driver patch (for X6541A HBA only).
12. For new installations, core software minimum requirement with
    CX600
    Array software - Access Logix 02.02.1.60.5.005
    Array software - Non-Access Logix 02.02.0.60.5.005
    CX400
    Array software - Access Logix 02.02.1.40.5.006
    Array software Non-Access Logix 02.02.0.40.5.006
13. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
14. FC-AL and FC-SW topologies can co-exist on the same server but not on the same HBA, provided that the different topologies are attached to different HBAs
15. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
16. FC-SW applies only to CX600, CX400, FC4500 and FC4700
17. Requires Qlogic GUI 1.26 and driver 4.09.
    QCP2202F-E-SP/QLA234x-E-SP requires fcode v2.00.06. Fcode should be loaded on all HBA's at the time of installation.
    The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
20. **EMC required Sun patches for Solaris 9:**
    112233-06 Sun OS 5.9: kernel patch
    112834-02 Sun OS 5.9: patch SCSI
    113277-11 Sun OS 5.9: sd and ssd patch
21. Requires driver rev lpfc-SPARC v5.01e and firmware V1.00a4.
22. **The LP9002-E now ships with LP9002L-E low profile adapter. The older full form factor LP9002-E will not fit into the Sun Fire 12K or 15K.**
23. EMC required Sun patches for PCI at Solaris 7: 106541-24 SunOS 5.7: kernel update patch
24. 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.
25. **If ATF is used, requires at least v3.3.0 ATF.**
26. Support for FC-AL or FC-SW.
27. Mixing JNI and Emulex SBUS HBAs on the same host connected to the same storage system is not supported. If there is a business reason to do so, submit an RPQ.
28. EMC required Sun patches for SBUS at Solaris 7: 106541-24 SunOS 5.7: kernel update patch
29. EMC required Sun patches for Solaris 2.6:
    105181-34 SunOS 5.6: kernel update patch
    105356-21 SunOS 5.6: /kernel/drv/ssd and /kernel/drv/sd patch.
    105580-19 SunOS 5.6: /kernel/drv/glm patch (for X6541 HBA only).
30. The Emulex LP9002L-F2 HBA requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can be either 3.3 VDC or 5.0 VDC signaling interface.
31. Dynamic Reconfiguration is supported (Enterpnse 10000 SBus only); requires ATF v3.1.2 or higher
32. **Supports DR on Sun 12K and 15K.**

1. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
2. Virtual Partitions (VPAR) is supported on the rp7405 server with 4.x and 5.x Symmetrix models. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.02.00 or later. Partition Manager B.11.11.01.05 or later. Online Diagnostic revision B.11.11.07.23 or later. server PDC firmware 4.0 or later.
3. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
4. HP-UX 11.0: MC/SG 11.13 and 11.14 LVM only.
   HP-UX 11i: MC/SG 11.13 and 11.14 can be used with LVM, VxVM 3.1 and VxVM 3.2. No DMP node failover supported at this time.
5. Refer to MC/Service Guard Release Notes at www.docs.hp.com for patch requirements.
6. Can mix HP-UX 11.00 and HP-UX 11i in same cluster. all nodes must be MC/SG 11.09, 11.13 or later.
7. See Technical Bulletin T010820 for supported patch levels.
8. 2-node clusters require special configurations. See Support Note S010106A on Customer Service web site.
9. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
10. HP A5158A is enabled in March 2000 HWCR Bundle XSWHWR1100.48 Additional patches may be required for support.
11. Supported with CX600, CX400, FC4500 and FC4700.
12. PA-8700 processors: Initial support with HP-UX 11.0 Sept 2001, HP-UX 11i Sept 2001.
13. Switched fabric (FC-SW) first supported on FC4500, requires Core Software 6.32.05 or higher, Navisphere Agent 4.3 or higher, and Access Logix enabled (data access control enabled).
14. **Virtual Partitions (VPAR) is supported on the rp7405/7410 server with 4.x and 5.x Symmetrix models and DMX Series. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.02.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 4.0 or later.**
15. Patch PHSS_21996 or patches replaced or superseded by are required with HP-UX 11i.
16. Supported in 2-CPU systems only (2-way).
17. Virtual Partitions (VPAR) is supported on the rp8400 server with 4.x and 5.x Symmetrix models and DMX Series. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.01.00 or later. Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 4.0 or later.
18. rp5470, rp7400: (PA-8700 processors) : Initial support with HP-UX 11.0 Sept 2001, 11i Sept 2001 .
19. K2xx, K3xx, K4xx,K5xx
20. Supported with cx600, cx400,fc4500, fc4700
21. For driver versions refer to Base Connectivity Section
22. GAB disks (membership and service group heartbeat disks) are not supported.
23. Review the single attach table for supported PowerPath versions and volume manager restrictions.
24. Symm 6 is qualified with: HP-UX 11i Support Plus Sept '02 bundle = GOLDAPPS11i June '02, GOLDBASE11i June '02 & HWEnable11i Sept '02.
25. Minimum OS version is HP-UX 11.0 990P.
26. Virtual Partitions (VPAR) is supported on the L-class/rp5470 server.
    VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
    Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 41.02 or later.
27. rp5405, rp5430, rp5470, rp7400: (PA-8700 processors): Initial support with HP-UX 11.0 Sept 2001, 11i Sept 2001. Symmetrix microcode supported: 5266.40.28 or higher. 5566.41.28 or higher. 5267.27.19 or higher. 5567.34.19 or higher.
28. Virtual Partitions (VPAR) is supported on the N-class/rp7400 server with 4.x and 5.x Symmetrix models. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later. Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 42.06 or later.
29. VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
    Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or
30. rp8400 requires minimum PDC firmware 13.10 or higher.
31. **rp5405, rp5430, rp5470, rp7400: (PA-8700 processors): Initial support with HP-UX 11.0 Sept 2001, 11i Sept 2001.**
32. For rp7405 and rp7410 required minimum PDC firmware is 15.005

1. Supported on CX600, CX400 and FC4700-2 only.
2. Identical to KGPSA-DA.
3. KGPSA-CA/KGPSA-DA(FCA2354): Minimum firmware revision 3.81A4.
4. KGPSA-CA/KGPSA-DA(FCA2354): Latest firmware revision 3.82A1.
5. **Tru64 V5.1B latest qualified Patch Kit 2 (T64V51BB22AS0002-20030415).**
6. **AlphaServer GS1280,ES80,ES47: Minimum Tru64 V5.1B with Patch Kit 1 (T64V51BB1AS0001-20021229)**
7. KGPSA-BC/KGPSA-CA supported ONLY.
8. KGPSA-BC: Latest firmware revision 3.20X7.
9. KGPSA-BC: Minimum firmware revision 3.03A1
10. Tru64 UNIX V5.1A minimum requirement for DS25.
11. KGPSA-CA and KGPSA-DA(FCA2354) only supported on this server.
12. Tru64 UNIX V5.1A minimum requirement for ES45.
13. **FCA2384(KGPSA-EA): Latest firmware revision 1.00X6**
14. **FCA2384(KGPSA-EA): Minimum firmware revision 1.00X2**

1. AIX 5.1-32/64 bit kernel supported. Requires CLArrayS3.5.1 fileset support.
2. Includes support for the FC4700, FC4700-2, CX600, CX400.
3. Minimum PowerPath 3.0.2 is supported.
4. FC-SW and FC-AL are supported on the same server.
5. PowerPath is supported with LVM and JFS
6. GAB disks (membership and service group heartbeat disks) are not supported.
7. Supported in SMP and LPAR modes.
8. For IBM AIX 4.3.3: requires Oracle RAC9i (9.0.1), HACMP/ES 4.4.x. PowerPath 3.0.2 or greater is supported.
   A SAN implementation with ISLs will observe significant delay in failover times if link failures non-contiguous to host HBA occur.
   For IBM AIX 5.1:requires Oracle RAC9i (9.2), HACMP/ES 4.4.x. PowerPath 3.0.2 or greater is supported.
   A SAN implementation with ISLs will observe significant delay in failover times if link failures non-contiguous to host HBA occur.
9. Minimum CLArrayS3.4.3.0.x fileset is supported. Supports FC4700, FC4700-2, with minimum Flare code 8.46.xx.
10. Minimum Powerpath version 3.0.2 is supported.
11. AIX 5 1 supported with 32-bit kernel. Requires minimum EMC ODM fileset support 5.0.0.0.
12. IBM 6227 and IIBM 6228 adapters are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server.
    6227 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f7.rte ;
    6228 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f9.diag, devices.pci/df1000f9.rte
13. Requires minimum PSSP 3.4 APAR IY33448.
14. Requires minimum AIX 4.3.3 with APAR IY22024, Requires PSSP 3.4 with APAR IY32625
15. Refer to Primus case #1.0.128870403.2749464 for configuration instructions.
16. Includes support for FC4700, FC4700-2, CX600. CX400.
17. Minimum CLArrayS3.4.3.0.x fileset is supported. Supports FC4700, FC4700-2 with minimum Flare code 8.46.xx.
18. Minimum Powerpath version 3.0.2 is supported
19. Requires minimum PSSP 3.2 APAR IY18172, IY31012
20. The following link provides detailed data for all 9076-SP2 models and feature codes:
    http://www1.ibmlink.ibm.com/cgi-bin/master?request=salesmanual&parms=SMS&xh=NTZH*daEMSRi4n1USenGnN9332&xhi=usa.main%7Csalesmanual%5E&type=D&search=9076&title=T&product=
    Requires minimum PSSP 3.2 APAR IY18172
    AIX 5.1 supported with 32/64 bit kernel.
23. IBM Native Fibre Channel drivers with feature code 6227 and with feature code 6228 are supported on the same server. Feature 6228 and 6239 are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server. 6227 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte; 6228 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f9.diag, devices.pci.df1000f9.rte; 6239 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1080f9.diag, devices.pci.df1080f9.rte
24. Requires minimum PSSP APAR IY38509
25. Requires minimum AIX5 1 with maintenance level 03 APAR IY32749
26. Minimum Powerpath version 3.0.3 is supported.
27. PSSP 3.5 supports a 32 or 64 bit kernel.
28. Requires adapter firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx.
29. For minimum Powerpath version 3 0.3, minimum CLArray S3 5 1 0.6 version is required.
30. Requires AIX 5.1 with minimum maintenance level 03 APAR 1Y32749.
31. AIX 5 1 supported only with 32-bit kernel.
32. Requires adapter firmware 3.22A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum flare code 8.46.xx.

Microsoft Windows 2000

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.

5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

Bull

Bull – Microsoft Windows 2000						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type
1	Express 5800 180Rb7	Microsoft Windows 2000: Advanced Server SP3[6] Datacenter SP2[6, 7], Datacenter SP3[6], Datacenter SP4, Server SP4	Microsoft MSCS[5]	HA: 4	Emulex LP8000-EMC[1, 2, 3, 4]	FC-AL, FC-SW

1. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
2. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
3. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
5. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
6. EMC strongly recommends that HBAs of different vendors not be used in the same host server
7. PowerPath not supported. ATF is supported.

1. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
2. PowerPath not supported. ATF is supported.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. PowerPath supported. ATF/CDE not supported.
5. If using ATF/CDE, requires 2.1.6 or greater.
6. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
7. For CX200 direct-connect only, boot from array for clusters not supported.
8. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
9. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
10. Supported on CX600, CX400, CX200 and FC4700-2 only.
11. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
    VxVM not supported.
    PowerPath 3.0 supported.
12. GAB disks (membership and service group heartbeat disks) are not supported.
13. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
14. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
3. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
4. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
5. PowerPath supported. ATF/CDE not supported.
6. GAB disks (membership and service group heartbeat disks) are not supported.
7. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
8. If using ATF/CDE, requires 2.1.6 or greater..
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
10. **Must use standard PCI 32bit/33MHz slot for SCSI**

1. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
2. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
3. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
4. PowerPath not supported. ATF is supported.

19/53

5. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
6. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
7. CX600 only.
8. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
   VxVM not supported.
   PowerPath 3.0 supported
9. Supported on CX600, CX400, CX200 and FC4700-2 only
10. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
11. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
12. Requires QLogic driver v6.04.02 and BIOS v1.34.
13. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
14. GAB disks (membership and service group heartbeat disks) are not supported.
15. PowerPath supported. ATF/CDE not supported.
16. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
17. If using ATF/CDE, requires 2.1.6 or greater..
18. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
19. HP NetServer LC2000 is only supported with two processors.Uni-Processor configurations are not supported
20. Includes both Pentium PRO and XEON models
21. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0
    . VxVm not supported. PowerPath 3.0 supported.
22. Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
23. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
24. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
25. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb:[LN];817789

IBM – Microsoft Windows 2000						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type
26	**eServer BladeCenter HS20 (Model 8678)[21, 22]**	**Microsoft Windows 2000 Advanced Server: SP2[11], SP3[11], SP4;** **Microsoft Windows 2000 Datacenter: SP2[11], SP3[11], SP4;** **Microsoft Windows 2000 Server: SP2[11], SP3[11], SP4**	**Microsoft MSCS[6, 18, 19]**	HA: 4	**IBM HS20 FC Expansion card 48P7061[20]**	FC-SW

1. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
2. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
3. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
4. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
5. GAB disks (membership and service group heartbeat disks) are not supported.
6. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
7. PowerPath supported. ATF/CDE not supported.
8. If using ATF/CDE, requires 2.1.6 or greater..
9. This HBA is equivalent to the qLogic QLA2310.
10. IBM xSeries Servers only:
11. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
12. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
    VxVM not supported.
    PowerPath 3.0 supported.
13. Supported on CX600, CX400, CX200 and FC4700-2 only.
14. For CX200 direct-connect only, boot from array for clusters not supported.
15. This HBA is equivalent to the qLogic QLA2340.
16. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
17. If using ATF/CDE, requires 2.1.6 or greater.
18. **Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.**
    MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
    When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

    This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
21. **Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).**
22. **EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.**

1. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
2. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
3. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
4. PowerPath not supported. ATF is supported.
5. EMC strongly recommends that HBAs of different vendors not be used in the same host server
6. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
7. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
8. FC4500, FC4700 only.
9. PowerPath supported ATF/CDE not supported
10. If using ATF/CDE, requires 2.1.6 or greater..
11. GAB disks (membership and service group heartbeat disks) are not supported.

Microsoft Windows 2003

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

Dell

Dell – Microsoft Windows 2003						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type
1	PowerEdge: 2600, 2650, 4600, 6400, 6450, 6600, 6650, 8450	Microsoft Windows 2003: DataCenter[1, 2, 3], Enterprise Edition (Advanced Server)[1, 2, 3], Standard Edition (Server)[1, 2, 3]	Microsoft MSCS	HA: 4	Emulex: LP8000-EMC[4], LP9002-E (LP9002L-E), LP9002DC-E, LP9802-E, LP9802DC-E, LP982-E; QLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	FC-AL, FC-SW

1. PowerPath is not supported
2. EMC strongly recommends that HBAs of different vendors not be used in the same host server
3. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

Fujitsu Siemens

Fujitsu Siemens – Microsoft Windows 2003						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type

1. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
2. PowerPath is not supported.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
5. Requires driver 8.2.1.20, and bios 1.34. Supports SNIA HBA API. Driver and BIOS available at http://www.qlogic.com.
6. Requires STORPort driver version 8.2.2.20, and BIOS 1.34. Available at http://www.qlogic.com. This driver requires Microsoft STORPort hotfix Q817789 available from Microsoft. Refer to: http://support.microsoft.com/default.aspx?scid=kb;[LN];817789
   Booting off of an EMC storage array is not currently supported with the HPQ BL20P.
7. BIOS must be obtained from HP at http://h18000.www1.hp.com/products/servers/proliant-bl/p-class/20p/index.html instead of BIOS on Qlogic web site. EMC NVRAM settings must be configured manually. Refer to EMC Fibre Channel documentation for QLogic HBAs for the settings.
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

IBM

IBM – Microsoft Windows 2003						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type

2	**eServer BladeCenter HS20 (Model 8678)[11]**	**Microsoft Windows 2003: DataCenter[2, 3, 4], Enterprise Edition (Advanced Server)[2, 3, 4], Standard Edition (Server)[2, 3, 4]**	**Microsoft MSCS[7, 8, 9]**	HA: 4	**IBM HS20 FC Expansion card 48P7061[10]**	**FC-SW**

1. This HBA is equivalent to the qLogic QLA2310
2. PowerPath is not supported.
3. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
4. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
5. This HBA is equivalent to the qLogic QLA2340.
6. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
7. **Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.**
8. **Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.**
9. **MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.**
10. **When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"**

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

11. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.

Unisys – Microsoft Windows 2003						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type
1	ES7000/100; ES7000/200; ES7000/230; ES7000/500	Microsoft Windows 2003: DataCenter[1, 2, 3], Enterprise Edition (Advanced Server)[1, 2, 3], Standard Edition (Server)[1, 2, 3]	Microsoft MSCS	HA: 4	Emulex: LP8000-EMC[4], LP9002-E (LP9002L-E), LP9002DC-E, LP9802-E, LP9802DC-E, LP982-E; QLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	FC-AL, FC-SW

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. Windows 2003 is only supported on 32-Bit Intel platforms. 64-Bit Itanium systems supported by RPQ only.
3. PowerPath is not supported.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

Microsoft Windows NT

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur.Events that could cause a system to crash when booting from external storage are:
1)Lost connection to external storage (pulled or damaged cable connection).
2)External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
3)External storage director failures including failed lasers on Fibre Channel directors.
4)External storage power failure.
5)Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
6)Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

2	AViiON: AV2300, AV3704R, AV8950	Microsoft Windows NT 4.0 SP6A[1]	Microsoft MSCS[2]	HA: 2	Emulex: LP8000-EMC[3, 4, 5, 7, 8], LP9002-E (LP9002L-E)[3, 4, 5], LP9802-E[3, 4, 5], LP9802DC-E[3, 4, 5], LP982-E[3, 4, 5]; QLogic: QLA2310F-E-SP[3, 4, 5, 6], QLA2340-E-SP[3, 4, 5], QLA2342-E-SP[3, 4, 5]	FC-AL, FC-SW

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows NT Server 4.0 Enterprise Edition.
3. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
4. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
5. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
6. If using ATF/CDE, requires 2.0.9 or greater.
7. LP8000 no longer has removable GBICs for copper cable support.
8. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

	Proliant 850[7]	Microsoft Windows NT 4.0 SP6A[1]	Microsoft MSCS[2]	HA: 2	Emulex: LP8000-EMC[3, 4, 5, 10, 11], LP9802-E[3, 4, 5], LP9802DC-E[3, 4, 5], LP982-E[3, 4, 5]; QLogic: QLA2310F-E-SP[3, 4, 5, 12]; QLA2340-E-SP[3, 4, 5]; QLA2342-E-SP[3, 4, 5]	FC-AL, FC-SW

1. EMC strongly recommends that HBAs of different vendors not be used in the same host server.
2. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows NT Server 4.0 Enterprise Edition.
3. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
4. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
5. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
6. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
7. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
8. Includes both Pentium PRO and XEON models
9. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. LP8000 no longer has removable GBICs for copper cable support.
12. If using ATF/CDE, requires 2.0.9 or greater.

1. Requires NetWare patches: NWPAPT2A and NSS5J.
2. Powerpath & ATF supported.
3. Novell Storage Services supported.
4. Maximum number of NWFS volumes that can be mounted is 64.
5. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
6. FC-AL for CX200 requires the following:
   1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
   2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
7. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
9. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
10. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
11. Includes both Pentium PRO and XEON models

1. Powerpath & ATF supported.
2. Novell Storage Services supported.
3. Maximum number of NWFS volumes that can be mounted is 64.
4. FC-AL for CX200 requires the following:
   1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
   2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
5. This HBA is equivalent to the qLogic QLA2340.
6. If using ATF/CDE, requires 2.1.6 or greater.
7. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Requires NetWare patches: NWPAPT2A and NSS5J.
9. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).

1. Requires QLogic driver v6.04.02 and BIOS v1.34
2. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
3. **OCFS (Oracle Cluster File System) is not supported.**
4. **Watchdog Timer should be disabled in ocmargs.ora**
5. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
6. **Supported with QLogic driver v6.04.02 or v6.05.00.**
7. Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
8. An RPM from Dell may be used to install the QLogic v6.X driver. RPM may be obtained from the QLogic website.
9. QLogic driver is available with Dell/Oracle CC kit.
10. Oracle Cluster File System v1.0 supported with Linux v2.4.9-E9 through E12.
11. Requires patch p2646914_9202_LINUX.zip (Private Network Fix).
    requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
12. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
    Booting from EMC storage arrays is NOT supported with PowerPath.
14. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
15. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
16. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
17. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
18. **PowerPath is not supported.**
19. GAB disks (membership and service group heartbeat disks) are not supported.
20. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
21. Review single attach VxVM notes for PowerPath and DMP restrictions.
22. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**

2. Oracle Cluster File System v1.0 supported with Linux v2.4.9-E9 through E12.
   Requires QLogic driver v6.04.02 and BIOS v1.34
3. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
   Booting from EMC storage arrays is NOT supported with PowerPath.
4. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
5. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
6. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
7. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
8. Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
9. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
10. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
11. Host must be offline for interfamily Symmetrix microcode upgrade.
12. **OCFS (Oracle Cluster File System) is not supported.**
13. **Supported with QLogic driver v6.04.02 or v6.05.00.**
14. **Watchdog Timer should be disabled in ocmargs.ora**
15. Includes both Pentium PRO and XEON models
16. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
17. GAB disks (membership and service group heartbeat disks) are not supported.
18. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
19. Review single attach VxVM notes for PowerPath and DMP restrictions.
20. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**

Sun – Sun Solaris						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Adapter Type
98	Netra: 1120, 1125, 1400, 1405; Ultra: 30, 60, 80, Enterprise 10000, Enterprise 3000, Enterprise 3500, Enterprise 6000, Enterprise 6500	Sun Solaris. 7[2], 8	Veritas Cluster Server (VCS) 2.0[1, 23]	HA: 8	Emulex LP9002DC-E	FC-AL[6] FC-SW[4, 5]
99	Ultra: 220R[7], 250, 420R[7], 450	Sun Solaris: 8[11], 9	Veritas DBED/AC for 9iRAC 3.5[1, 8, 16, 17, 18]	RAC: 4 [15]	Emulex LP9002DC-E	FC-AL[6] FC-SW[4, 5]
100	Sun Fire, 12K, 15K	Sun Solaris. 8[11], 9	Veritas DBED/AC for 9iRAC 3.5[1, 8, 16, 17, 18]	RAC: 4 [15]	Emulex: LP9002-E (LP9002L-E), LP9802-E, QLogic: QLA2340-E-SP, QLA2342-E-SP	FC-AL[6] FC-SW[4, 5]

1. GAB disks (membership and service group heartbeat disks) are not supported.
2. No OPS support for Solaris 7.
3. FC-AL and FC-SW topologies can co-exist on the same server but not on the same HBA, provided that the different topologies are attached to different HBAs
4. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
5. FC-SW applies only to CX600, CX400, FC4500 and FC4700
6. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
7. 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.
8. Supported with Powerpath 3.x configuration only. Native names only, no "power devices". Review the ESN topology guide section on Oracle DBED/AC case studies for configuration restrictions
9. Supported with VCS 3.5 Maintenance Patch 1
10. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
11. Requires Solaris 8 update 7.
12. PowerPath support for Sun Cluster 2.2 with Solaris 8 only FC4700 with Flare level 08.45 only. ODS is not available at this time.
13. Support for FC4500, FC4700 and FC5300, FC5500, FC5700.
14. Clusters with more than 4 nodes require VCS patch P2 and VxVM v3.1 patch P4
15. Veritas MP1 is required for clusters with more than 2 servers
16. Veritas HA clusters are supported with FC-SW only
17. If all FC connectivity to the array is lost (without a server shutdown), then after connectivity is restored, the user must execute a vxdctl enable command, before the VCS Oracle 9iRAC service group is brought back online.
18. Review the ESN Topology Guide section on Oracle DBED/AC Case Studies for configuration restrictions.
19. Supported with VCS only.
20. **For new installations, core software minimum requirement with**
    CX600
    Array software – Access Logix 02.04.1.60.5.002
    Array software – Non-Access Logix 02.04.0.60.5.002
    CX400
    Array software – Access Logix 02.04.1.40.5.002
    Array software – Non-Access Logix 02.04.0.40.5.002
    FC4700
    Array software – Access Logix 08.49.51
    Array software – Non-Access Logix 08.49.01

    Solaris 9:
    Core software minimum requirements same as new installations (above)
    Support for Veritas Volume Manager VxVM 3.2 Patch 03 and Solaris Volume Manager require an RPQ.

    Solaris 8:
    Supported on CX600, CX400 running release core software, FC4700 running Flare level 08.46 or later. Requires PowerPath 3.0.2 or later, no ATF support.
    Greater than 2-node OPS, RAC configurations supported on CX600 running 02.02.1.60.5.005, CX400 running 02.02.1.40.5.006 level core software (or later), FC4700 running Flare level 08.47 or later.
    If using VxVM, requires VxVM 3.2 patch 03. Do not install VxVM patch 112388-01.
21. OPS, RAC, or greater than 2-node HA are supported with FC-SW only.
22. See the EMC price book for HBA vendor ordering information. This HBA is not sold by EMC.
23. Supported on CX600, CX400, FC4500, FC4700 Only
24. Review single attach VxVM notes for PowerPath and DMP coexistence rules and restrictions.
25. Dynamic Reconfiguration is supported (Enterprise 10000 SBus only); requires ATF v3.1.2 or higher.
26. Cluster with more than 4 nodes requires VCS patch P2 and VxVM v3.1 patch P4
27. Please review Veritas support pages for latest patch information.
28. **EMC required Sun patches for Solaris 9:**
    112233-06 Sun OS 5.9: kernel patch
    112834-02 Sun OS 5.9: patch SCSI
    113277-11 Sun OS 5.9: sd and ssd patch
29. **Requires RPQ**
30. **Supported only on VxVM 3.2 P03, VxVM 3.5 MP1, and SDS 4.2.1**
31. **Supported only on VxVM 3.5 MP1 and SVM**

Fibre Connectivity: Hub

Please refer to the fibre channel cables and connectors reference file: EPIc_FibreCablesConnectors.pdf.Please refer to the Base Connectivity Interoperability Application for details concerning kernel versions, minimum driver and BIOS / firmware revisions.

HPQ HP-UX

HPQ HP-UX									
No.	Operating System	Host Bus Adapter	Hub	Fanin	Fanout	Luns/Storage Port	Luns/HBA	Luns/Loop	Comments
1	HPQ HP-UX: 11.0[3], 11.0 990P[3], 11.0 ACE[3], 11i v1.0 (HP-UX 11.11)[3]	HPQ: A3404A, A3591B, A3740A, A5158A, A6684A, A6685A, A6795A	Gadzoox FCL1063TW; HPQ: A3724A/AZ[4], A4839A/AZ[4]	1	4	256	256	128	See[1, 2]

1. Fanout represents the maximum initiators (host adapters) per CLARiiON port. Fanin represents the number of CLARiiON ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see CLARiiON Open Systems Configuration Guide
2. Hubs not supported for FC4700, CX600, CX400, CX200.
3. For HP-UX systems only LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror[illegible] should not be set.
4. HP optical Hubs (HP models A3724A and A4839A) have been qualified, but are not sold by EMC

1. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
2. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
3. Requires at least v5.11.09 of FC5700 Core Software (a.k.a. Flare), v5.32.01 of FC4500 Core Software or v5.24.00 of FC5300 Core Software.
4. Switch support can be QuickLoop dedicated to any HP hosts in Table 84 on page 226 or heterogeneous fabric with HP FC-SW (fabric) hosts in that table. For FC4700, one port on each SP may be used for QuickLoop when the other port is used for FC-SW. QuickLoop support requires chargeable model DSBQLP-0D.
5. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
6. CX600
7. CX400
8. QuickLoop is not supported with Brocade 3200/3800/12000 or DS-16B2, ED-12000B.
9. FC4700-2 supported at 1 Gb and 2 Gb.
10. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
11. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware. 1 x L1 or 2 x L2 ports per quad only.
12. **Supported Server model: rp5470 PDC 42.06**
13. NDU Release 11
14. During initial switch configuration, the Persistent FC ID's must be enabled on the Vsan that contains any HPUX HBAs. If Persistent FC IDs are enabled to an existing Vsan containing non HPUX HBAs, the process may be disruptive. See MDS 9000 Family Configuration Guild for details.
15. Supported server model: rp7410 PDC 16.009

1. Supported on CX600, CX400 and FC4700-2 only.
2. CX600/CX400: 255 LUNs/HBA -- FC4700 223 LUNs/HBA
3. CX600
4. CX400
5. DS-8B or DS-16B switches only; qualified with firmware v2.1.4a, v2.2, and v2.3.
6. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
7. Firmware v3.0.2d or later is required with the DS-16B2 switch.
8. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
9. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
10. **Tru64 V5.1B latest qualified Patch Kit 2 (T64V51BB22AS0002-20030415).**
11. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.
12. KGPSA-CA / Cisco MDS 9xxx: Tru64 host bootup may fail if switch port speed is hard-set to 1 Gb/s. Switch port should be set to Auto-Negotiate.

19.23

1. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
2. This kernel is limited to 100 devices, not 128.
3. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
4. Requires v6.2.1 or higher Navisphere host agent/CLI.
5. Single HBA zoning is required regardless of the switch being utilized.
6. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
7. Firmware 3.0.2a or later required.
8. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
9. **Supported with QLogic driver v6.04.02 or v6.05.00.**
10. Firmware v2.5.1b or later required
11. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
12. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
13. See Switched Fabric Topology Parameters for switch firmware levels.
14. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.
15. FC-AL direct-connect or McData fabric connect only. Brocade fabric attach is not currently supported.
16. **FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.**
17. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
18. **FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.**
19. **This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.**
20. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
21. **Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.**
22. **Requires Emulex driver v4.20Q and firmware v1.00a4. Available from http://www.emulex.com.**
23. **Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
24. **Refer to Table 71 on page 202 for single-vendor and mixed-vendor switched fabrics and supported switch firmware.**
25. **CX600**
26. **CX400**
27. **ED-64 and ED-1032 not supported for FC5300.**
28. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
29. **Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**

SGI IRIX

SGI IRIX

1. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ
2. Requires rev2 _sles7upg2418.patch available from ftp://ftp.emc.com/pub/elab/linux
3. Firmware 3.0.2a or later required.
4. Firmware v2.5.1b or later required
5. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
6. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
7. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
8. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
9. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
10. Supported with QLogic driver v6.04.02.
11. Requires rev1_sles7.patch available from ftp://ftp.emc.com/pub/elab/linux for CLARiiON attach only.
12. See Switched Fabric Topology Parameters for switch firmware levels.
13. Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
14. Requires QLogic v6.04.02 driver
15. Requires QLogic driver v6.04.00 or above.
16. Requires rev3 _sles8.patch available from ftp://ftp.emc.com/pub/elab/linux.
17. Requires QLogic driver v6.04.02 and BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
18. **QLogic v6.x series drivers and Emulex driver v4.20Q support persistent binding and only support Class 3.**
19. **Requires QLogic driver v6.04.02 and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
20. **EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.**
21. **Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.**
22. **Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**

1. CX600
2. CX400
3. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
4. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L1 or 2 x L2 ports per quad only.
5. ED-64 and ED-1032 not supported for FC5300.
6. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only.
7. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
   EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
   No boot support at this time.

Application Software

Fujitsu Technology Solutions Solaris

Fujitsu Technology Solutions Solaris			
No.	Operating System	Host Bus Adapter	Application Software
1	Fujitsu Technology Solutions Solaris: 2.6, 7, 8, 9	Emulex: LP8000-EMC[1], LP9002-E (LP9002L-E)	PowerPath: 3.0.3, 3.0.4, **4.0.0[2, 3]**, **4.0.1[2, 3]**

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. **Powerpath supported on FC4500, FC4700, CX600, and CX400.**
   CLARiiON and Symmetrix can co-exist in the SAN with the same server.
3. **ATF/CDE and PowerPath cannot co-exist in the same server.**

HPQ HP-UX

EMC storage (Clariion & Symmetrix) interoperability support is listed as part of the Base Connectivity, Clustered Host and Switch Interoperability tables of the EMC Support Matrix. It should be understood that arrays with matching matrix configurations can be used in a shared SAN, Shared Server or Shared HBA, unless explicitly noted. PowerPath and other load balancing software versions must be reviewed independently for mutual array support or coexistence concerns.

HPQ HP-UX				
No.	Operating System	Host Bus Adapter	Application Software	Comments
1	HPQ HP-UX, 11.0[1], 11i v1.0 (HP-UX 11.11)[1]	HPQ A3591B	PowerPath 3.0.2 b41[5]	See[3]
2	HPQ HP-UX: 11.0[1], 11i v1.0 (HP-UX 11.11)[1]	HPQ: A3404A, A3591B, A3740A, A5158A, A6684A, A6685A, A6795A	MirrorView 1.7[6]; Navisphere: Agent/CLI 6.4, Analyzer 6.4, Integrator 6.2.0[2], Manager, Event Monitor 6.4.1[2, 11]; **SAN Copy v1.0[8, 9, 10];** SnapView 2.1[6, 7]; admsnap 2.1[6, 7]	
3	HPQ HP-UX, 11.0[1], 11i v1.0 (HP-UX 11.11)[1]	HPQ: A3404A, A3740A, A5158A, A6684A, A6685A, A6795A	PowerPath 3.0.2 b41[5]	See[3, 4]

1. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
2. Shipped with Navisphere Manager.Integrator supports HP Open view 6.1,Tivoli NetView 6.0b, and Unicenter TNG 2.2 and 2.4.
3. For new installations, core software minimum requirement with
   CX600
   Array software – Access Logix 02.04.1.60.5.002
   Array software – Non-Access Logix 02.04.0.60.5.002
   CX400
   Array software – Access Logix 02.04.1.40.5.002
   Array software – Non-Access Logix 02.04.0.40.5.002
4. CLARiiON and Symmetrix can coexist in the SAN with the same server.
5. Supported with HP-UX 11.0, 11i only
6. For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
7. A Snapshot must not be in a clustered Storage Group.
8. **SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.**
9. **Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, IRIX, and Linux**
10. **SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 arrays. Data movement is supported in and between CX Series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.**
11. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.31_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
