

The Importance of a National Dementia Plan in Brazil

Paola Barbarino, CEO
Alzheimer's Disease International

About ADI

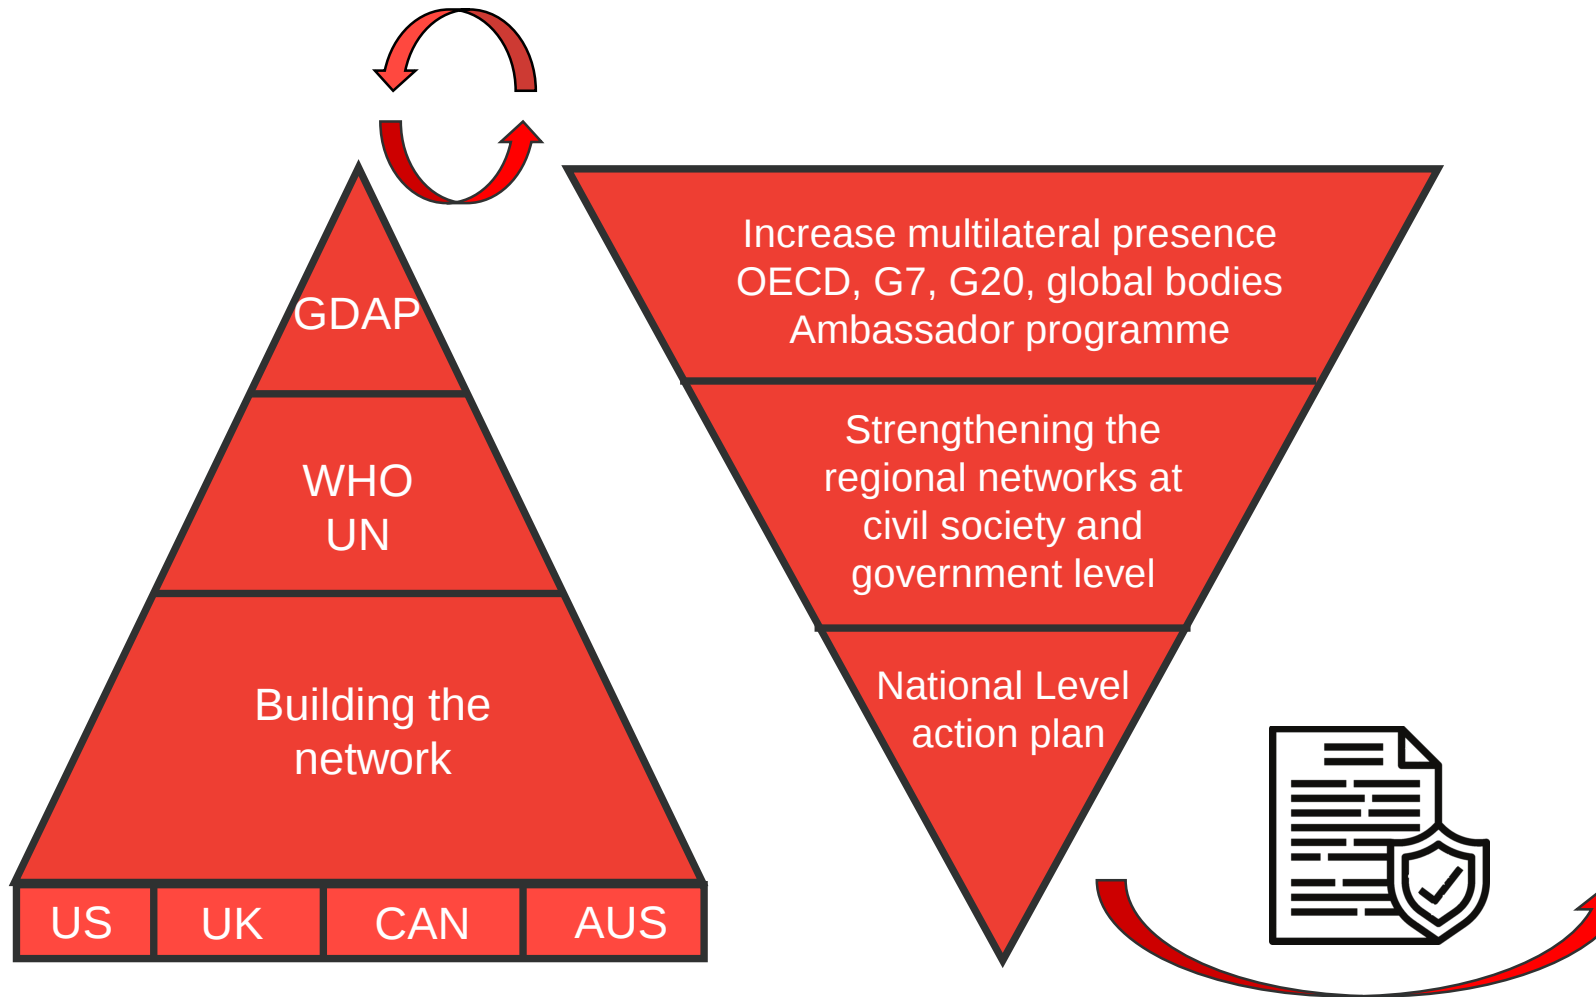

- Established in 1984
- Umbrella organisation of 105 Alzheimer and dementia associations around the world.
- Federação Brasileira das Associações de Alzheimer (Febraz) is ADI's Member in Brazil.
- We represent our members at the WHO, the UN, OECD and other global and regional bodies.
- Promoter of World Alzheimer's Month and Publisher of the World Alzheimer Report and others.

Our vision is prevention, care and inclusion today, and cure tomorrow

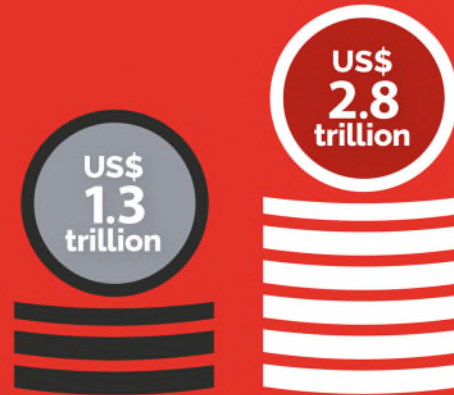

Our Strategy

Global Impact of Dementia

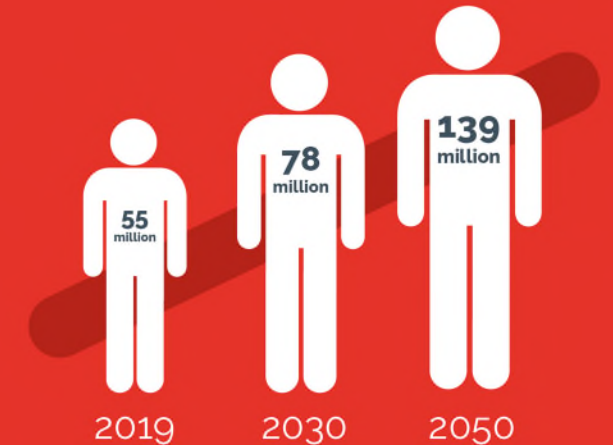

Every 3 seconds
someone in the world
develops dementia

The total estimated annual worldwide
cost of dementia is over US\$ 1.3 trillion.
This figure is forecast to rise to
US\$ 2.8 trillion by 2030*

*WHO Global status report 2021

Estimated growth in number of
people with dementia 2019–2050*

*WHO Global status report 2021

WHO Global Action Plan

Dementia as a public health priority

Dementia awareness and friendliness

Dementia risk reduction

Dementia diagnosis, treatment, care and support

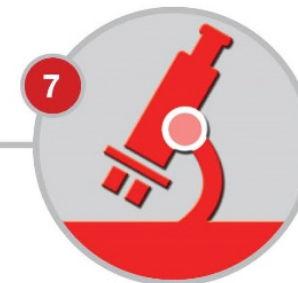

Support for dementia carers

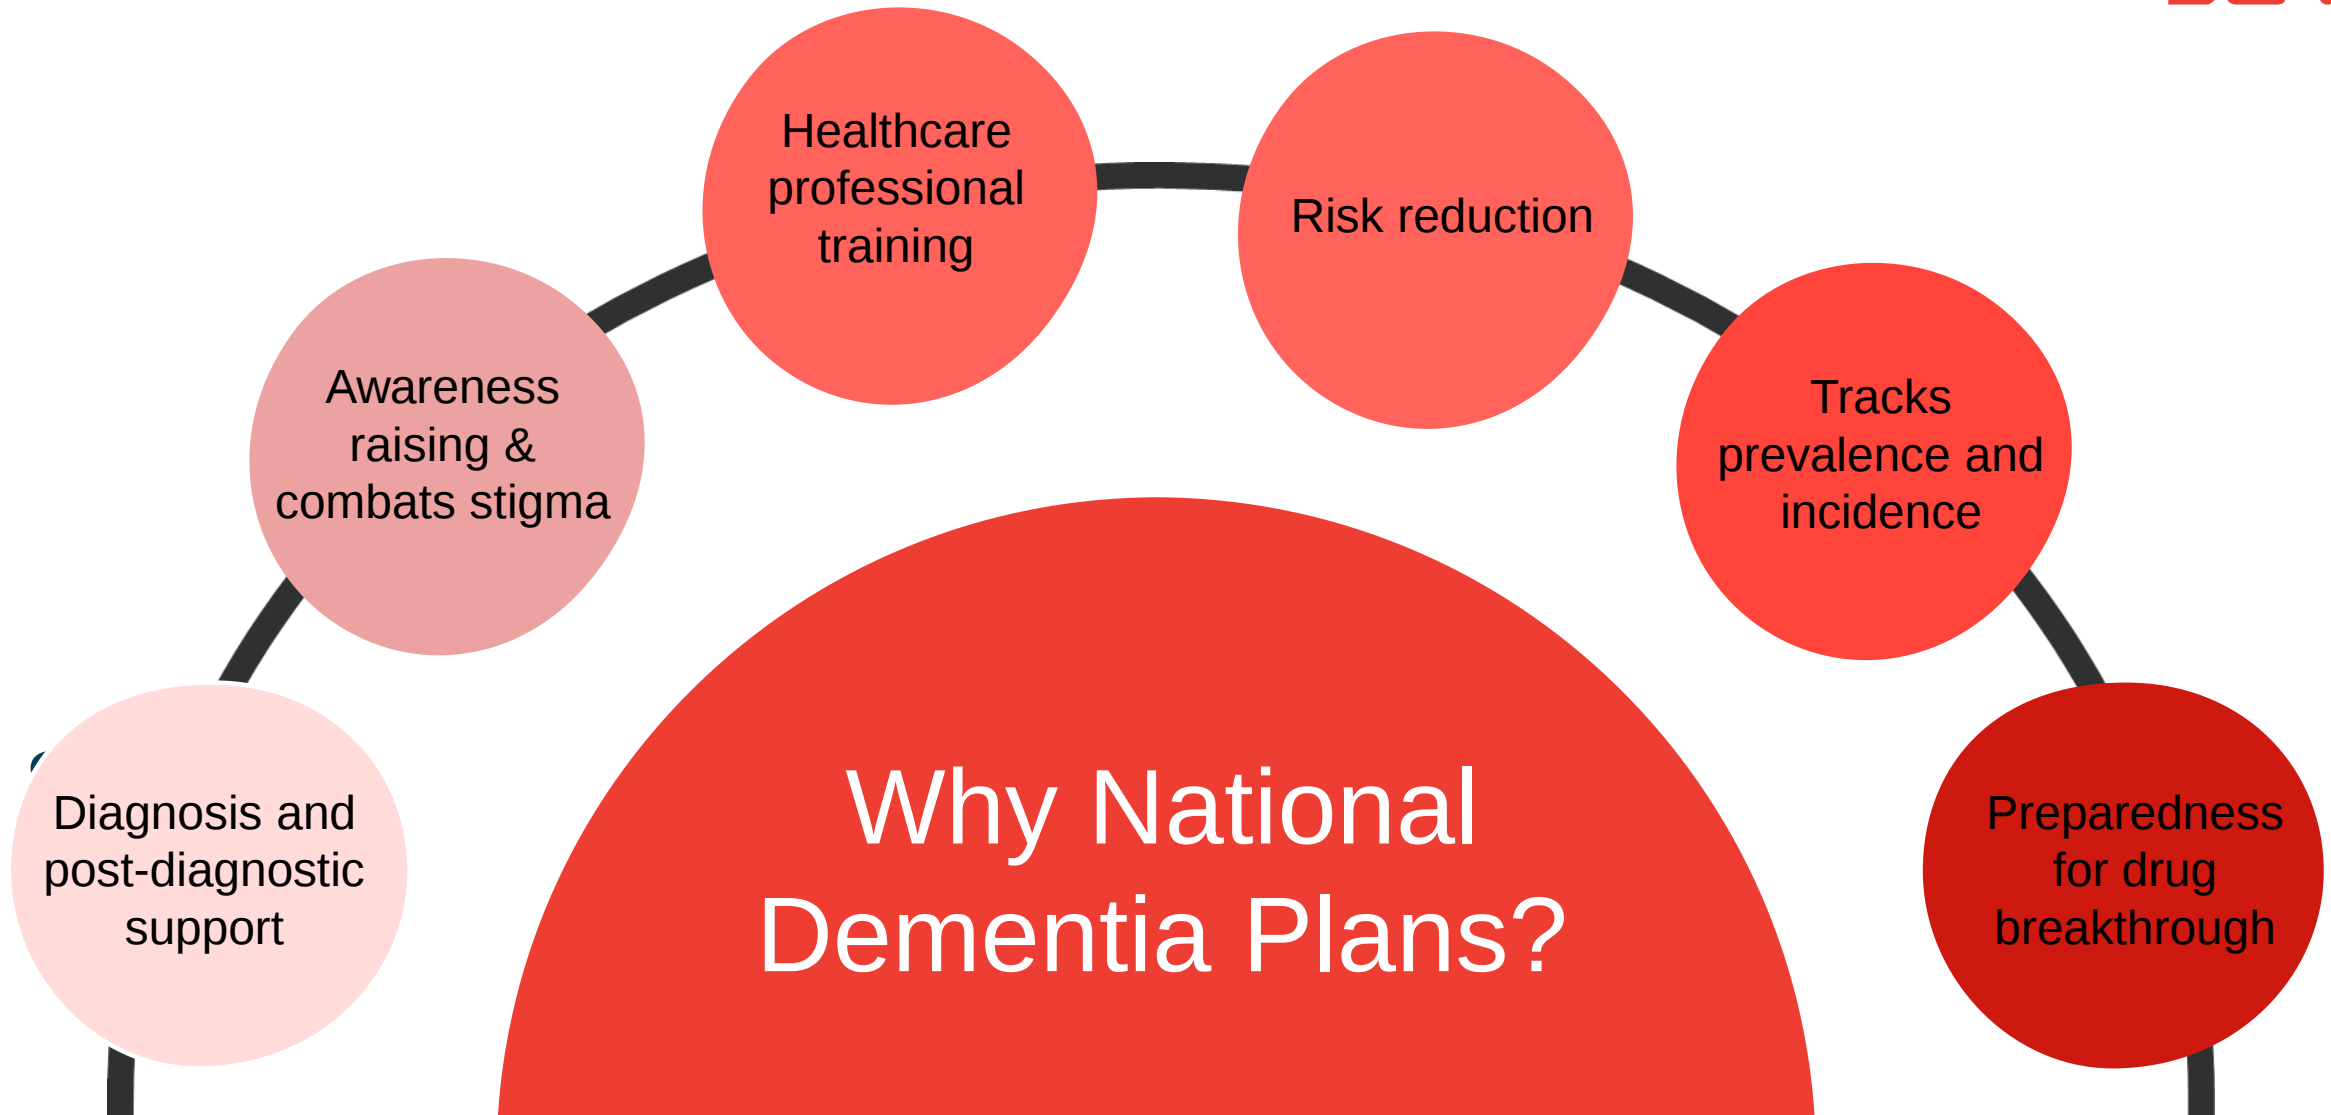

Information systems for dementia

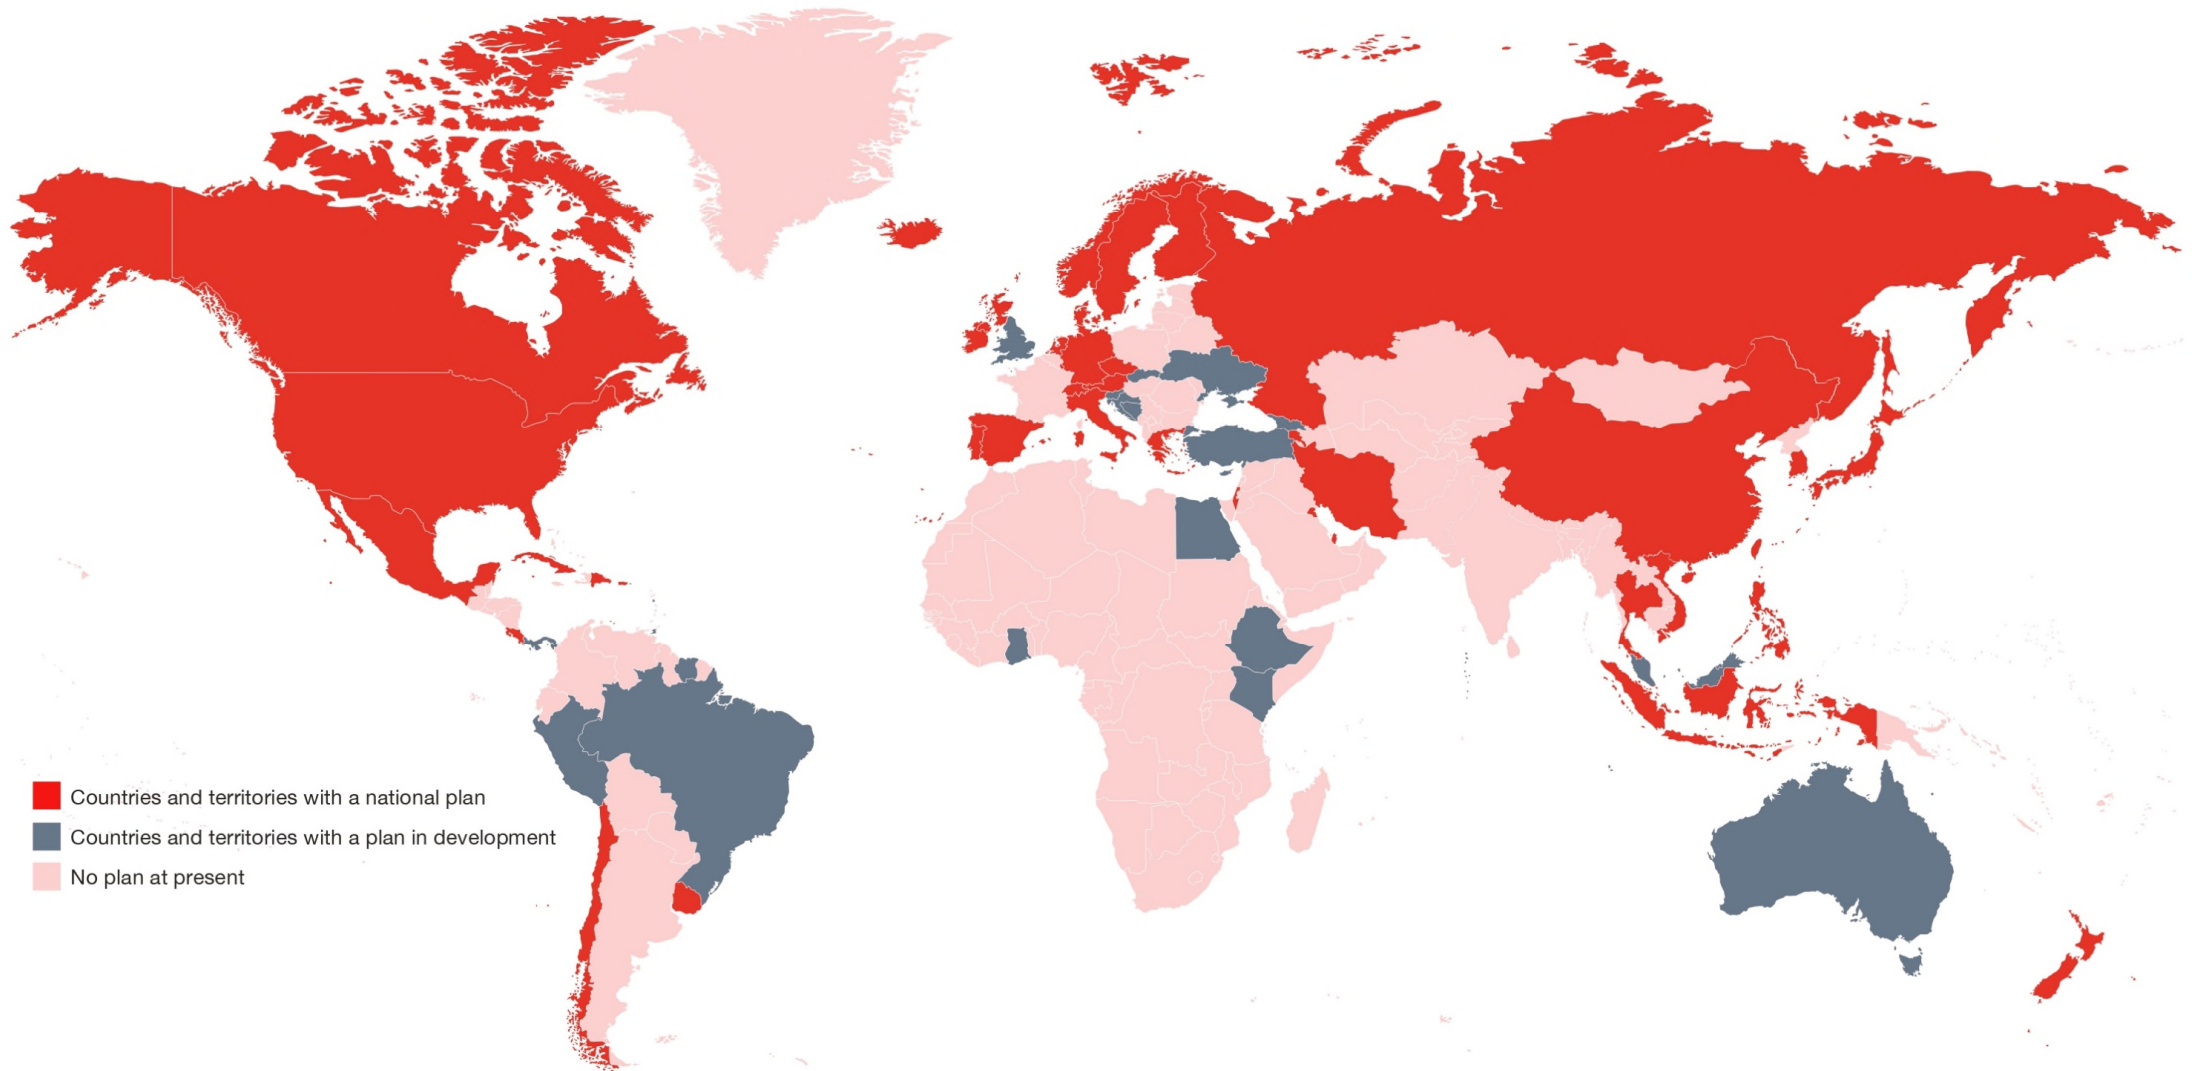

Dementia research and innovation

National Dementia Plans

National Dementia Plans

Spotlight on PAHO

- 8 countries in PAHO region have national plans, although not all sufficiently funded and operational. These include:
- 7 countries within the region are currently developing a National Dementia Plan
- However Large gaps remain

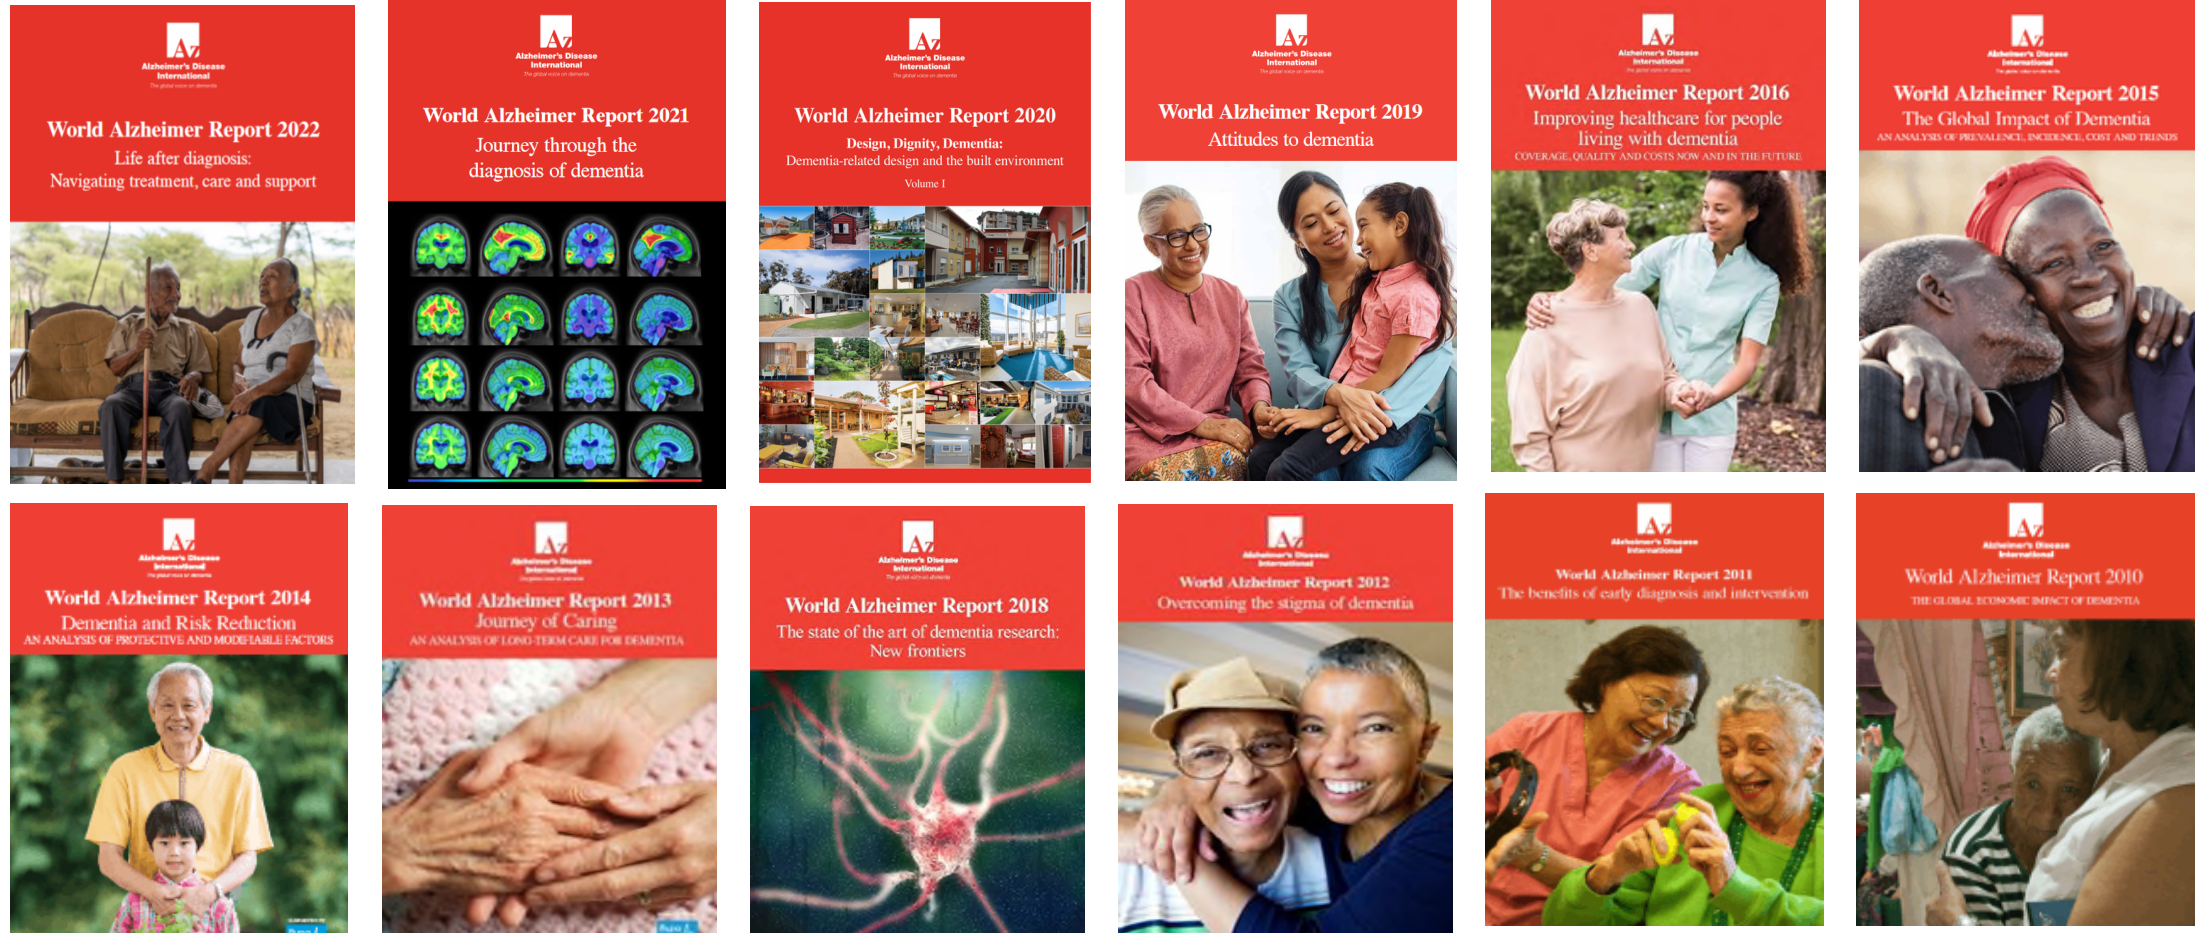

Spotlight on Brazil

- Dementia was the 2nd leading cause of death in individuals aged 70 and above in 2016.
- 1.8 million people were expected to be living in Brazil with dementia in 2019.
- This figure is expected to rise to 5.6 million by 2030
- Brazil does not currently have a National Dementia Plan.
- Brazil was one of seven countries to participate in Strengthening responses to dementia (STRIDE)

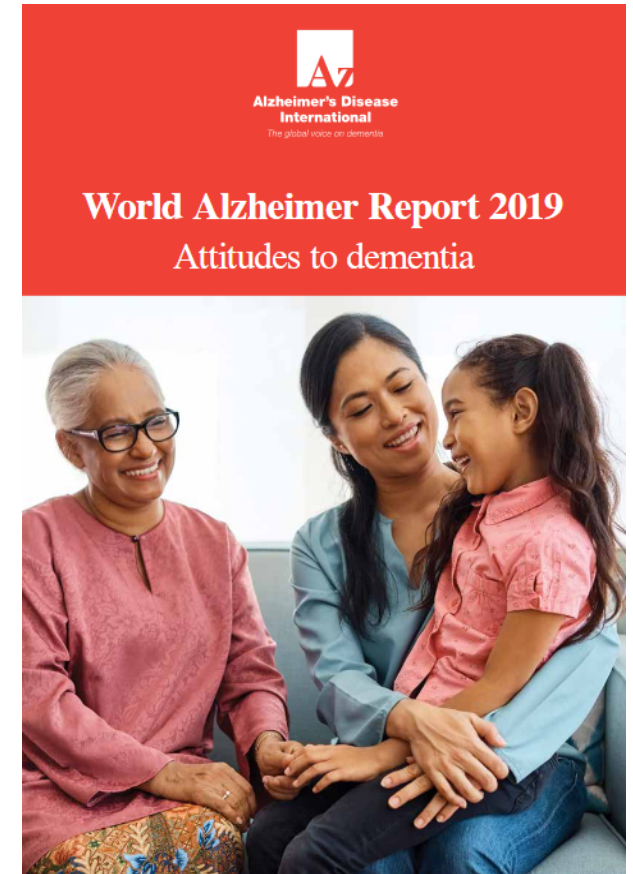

World Alzheimer Reports

World Alzheimer Report 2019

- The report reveals the results of the largest attitudes to dementia survey ever undertaken, with almost 70,000 people across 155 countries and territories completing the survey.
- Brazil was the largest respondent to the survey of any country.

Conclusion

- We wish to thank the Senate of Brazil for inviting Alzheimer's Disease International to speak during this public hearing.
- Brazil is one of the most populous countries in the world and the largest in South America, it has the capacity to be a leader in this area and show smaller nations that it can be done.
- Accordingly, it is our hope that Brazil will prioritise dementia during its upcoming presidency of the G20 in 2024.
- We hope that together you will do all that you can to expedite progress towards the development and implementation of a National Dementia Plan.
